Is this the America you want? If not, here's how to claim the power to change your country. We are in an age of epic political turbulence in America. Old hierarchies and institutions are collapsing. From the election of Donald Trump to the upending of the major political parties to the spread of grassroots movements like Black Lives Matter and \$15 Now, people across the country and across the political spectrum are reclaiming power. Are you ready for this age of bottom-up citizen power? Do you understand what power truly is, how it flows, who has it, and how you can claim and exercise it? Eric Liu, who has spent a career practicing and teaching civic power, lays out the answers in this incisive, inspiring, and provocative book. Using examples from the left and the right, past and present, he reveals the core laws of power. He shows that

all of us can generate power-and then, step by step, he shows us how. The strategies of reform and revolution he lays out will help every reader make sense of our world today. If you want to be more than a spectator in this new era, you need to read this book.

The supportive role of urban spaces in active aging is explored on a world scale in this unique resource, using the WHO's Age-Friendly Cities and Community model. Case studies from the U.S., Canada, Australia, Hong Kong, and elsewhere demonstrate how the model translates to fit diverse social, political, and economic realities across cultures and continents, ways age-friendly programs promote senior empowerment, and how their value can be effectively assessed. Age-friendly criteria for communities are defined and critiqued while extensive empirical data describe challenges as they affect elders globally and how environmental support can help meet them. These chapters offer age-friendly cities as a corrective to the

overemphasis on the medical aspects of elders' lives, and should inspire new research, practice, and public policy.

Included in the coverage:  
A critical review of the WHO Age-Friendly Cities Methodology and its implementation. Seniors' perspectives on age-friendly communities. The implementation of age-friendly cities in three districts of Argentina. Age-friendly New York City: a case study. Toward an age-friendly European Union. Age-friendliness, childhood, and dementia: toward generationally intelligent environments. With its balance of attention to universal and culture-specific concerns, Age-Friendly Cities and Communities in International Comparison will be of particular interest to sociologists, gerontologists, and policymakers. "Given the rapid adoption of the age-friendly perspective, following its development by the World Health Organization, the critical assessment offered in this volume is especially welcome". Inside the Campaign is a behind-the-scenes look at the people involved in an election campaign and the work they do. Each chapter reveals the duties and obstacles faced during the heat of a campaign. Practitioners and political scientists collaborate to present real-world insights that demystify over a dozen occupations, including campaign chairs, fundraisers, advertisers, platform designers, communication personnel, election administrators, political staff, journalists, and pollsters. Inside the Campaign provides an inside look at, and unparalleled understanding of, the nuts and bolts of running a federal campaign in Canada.

Since its introduction in 1979, CHEAPO, a computer based economic analysis program, has allowed users of the Stand

Prognosis Model to evaluate silvicultural alternatives from an economic point of view. Subsequent modifications to the Prognosis Model have rendered CHEAPO obsolete. This users guide covers a new computer model, CHEAPO II, which is compatible with version 5.1 of the Prognosis Model and expands its economic analysis capabilities.

George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature – his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While 1984 and Animal Farm are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In Politics and the English Language, the second in the Orwell's Essays series, Orwell takes aim at the language used in politics, which, he says, 'is designed to make lies sound truthful and

murder respectable, and to give an appearance of solidity to pure wind'. In an age where the language used in politics is constantly under the microscope, Orwell's Politics and the English Language is just as relevant today, and gives the reader a vital understanding of the tactics at play. 'A writer who can – and must – be rediscovered with every age.' — Irish Times

An impressive line-up of international contributors provides a comprehensive and accessible introduction to politics in the developing world. The first four parts explore the theoretical approaches, the changing nature and role of the state, and the major policy issues that confront all developing countries. The final parts set out a diverse range of country case studies, representing all the main geographical regions. These country case studies illustrate the themes introduced in the thematic chapters and highlight the developing world as a place of diversity and rapid transformations. Readers are provided with

the tools to appreciate the perspectives of developing countries. The fifth edition has been thoroughly updated to address topical issues and themes, including refugee movements; the rise of the so-called Islamic State; organised crime; gender; the role of new forms of communication in political mobilization; and the replacement of Millennium Development Goals by Sustainable Development Goals. Two new country case studies have been added: Syria and the Sudan. The text is supported by an Online Resource Centre with the following student resources: \* Additional country case studies to encourage students to consider the political situations in different developing countries\* A flashcard glossary to allow students to test their knowledge of important concepts\* Study questions encourage readers to think critically about each chapter\* Web links encourage students to go beyond the textbook and read more widely. Edward Elgar Publishing This volume has been designed as a key resource in the field of international political leadership research. Written by a team of

distinguished leadership scholars from three continents and nine countries, the original chapters gathered in this volume cover all the major fields of political leadership, from executive, legislative and party leadership to leadership in social movements and international organizations. The special value and appeal of this book relates to its genuinely comparative focus that characterizes all chapters.

**Necessary Trouble** U.S. Government Printing Office

**Necessary Trouble** is the definitive book on the movements that are poised to permanently remake American politics. We are witnessing a moment of unprecedented political turmoil and social activism. Over the last few years, we've seen the growth of the Tea Party, a twenty-first-century black freedom struggle with BlackLivesMatter, Occupy Wall Street, and the grassroots networks supporting presidential candidates in defiance of the traditional party elites. Sarah Jaffe leads readers into the heart of these movements, explaining what has made

ordinary Americans become activists. As Jaffe argues, the financial crisis in 2008 was the spark, the moment that crystallized that something was wrong. For years, Jaffe crisscrossed the country, asking people what they were angry about, and what they were doing to take power back. She attended a people's assembly in a church gymnasium in Ferguson, Missouri; walked a picket line at an Atlanta Burger King; rode a bus from New York to Ohio with student organizers; and went door-to-door in Queens days after Hurricane Sandy. From the successful fight for a 15 minimum wage in Seattle and New York to the halting of Shell's Arctic drilling program, Americans are discovering the effectiveness of making good, necessary trouble. Regardless of political alignment, they are boldly challenging who wields power in this country.

The timely book takes stock of the state of the art and future of electronic democracy, exploring the history and potential of e-democracy in global perspective. Analysing the digital

divide, the role of the internet as a tool for political mobilisation, internet Voting and Voting Advice Applications, and other phenomena, this volume critically engages with the hope for more transparency and political participation through e-democracy.

*Models of Political Linkage*

Palgrave Macmillan Classic Books Library presents this brand new edition of "The Federalist Papers", a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. "The Federalist", as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755–1804) was an American lawyer, journalist and highly

influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation's finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship

between you and your clients, colleagues and the courts.

**Economic Inequality and Political Power in America** Harvard

Business Review Press Economic inequality is at a record high in the United States, but public demand for redistribution is not rising with it. Meghan Condon and Amber Wichowsky show that this paradox and other mysteries about class and US politics can be solved through a focus on social comparison. Powerful currents compete to propel attention up or down—toward the rich or the poor—pulling politics along in the wake. Through an astute blend of experiments, surveys, and descriptions people offer in their own words, *The Economic Other* reveals that when less-advantaged Americans compare with the rich, they become more accurate about their own status and want more from government. But American society is structured to prevent upward comparison. In an increasingly divided, anxious nation, opportunities to interact with the country's richest are shrinking, and people prefer to compare to

those below to feel secure. Even when comparison with the rich does occur, many lose confidence in their power to effect change. Laying bare how social comparisons drive political attitudes, *The Economic Other* is an essential look at the stubborn plight of inequality and the measures needed to solve it.

The idea of "The Green Book" is to give the Motorist and Tourist a Guide not only of the Hotels and Tourist Homes in all of the large cities, but other classifications that will be found useful wherever he may be. Also facts and information that the Negro Motorist can use and depend upon. There are thousands of places that the public doesn't know about and aren't listed. Perhaps you know of some? If so send in their names and addresses and the kind of business, so that we might pass it along to the rest of your fellow Motorists. You will find it handy on your travels, whether at home or in some other state, and is up to date. Each year we are compiling new lists as

some of these places move, or go out of business and new business places are started giving added employment to members of our race.

With this platform, we the Republican Party reaffirm the principles that unite us in a common purpose.

We believe in American exceptionalism. We believe America is exceptional because of our historic role - first as refuge, then as defender, and now as exemplar of liberty for the world to see. We believe our constitutional system - limited government, separation of powers, federalism, and the rights of the people - must be preserved uncompromised for future generations. We believe political freedom and economic freedom are indivisible. When political freedom and economic freedom are separated - both are in peril; when united, they are invincible. We believe that people are the ultimate resource - and that the people, not the government, are the best stewards of our country's God-given natural resources. As Americans and as Republicans we wish for peace - so we insist on strength. We will make America safe. We seek friendship with all peoples and all nations, but we recognize and are prepared to deal with evil in the world. Based on these principles, this platform is an invitation and a roadmap. It invites every American to join us and shows the path to a stronger, safer, and more

prosperous America.

Can a country be a democracy if its government only responds to the preferences of the rich? In an ideal democracy, all citizens should have equal influence on government policy--but as this book demonstrates, America's policymakers respond almost exclusively to the preferences of the economically advantaged. *Affluence and Influence* definitively explores how political inequality in the United States has evolved over the last several decades and how this growing disparity has been shaped by interest groups, parties, and elections. With sharp analysis and an impressive range of data, Martin Gilens looks at thousands of proposed policy changes, and the degree of support for each among poor, middle-class, and affluent Americans. His findings are staggering: when preferences of low- or middle-income Americans diverge from those of the affluent, there is virtually no relationship between policy outcomes and the desires of less advantaged groups. In contrast, affluent

Americans' preferences exhibit a substantial relationship with policy outcomes whether their preferences are shared by lower-income groups or not. Gilens shows that representational inequality is spread widely across different policy domains and time periods. Yet Gilens also shows that under specific circumstances the preferences of the middle class and, to a lesser extent, the poor, do seem to matter. In particular, impending elections--especially presidential elections--and an even partisan division in Congress mitigate representational inequality and boost responsiveness to the preferences of the broader public. At a time when economic and political inequality in the United States only continues to rise, *Affluence and Influence* raises important questions about whether American democracy is truly responding to the needs of all its citizens.

In times of constant

change, adaptive leadership is critical. This Harvard Business Review collection brings together the seminal ideas on how to adapt and thrive in challenging environments, from leading thinkers on the topic--most notably Ronald A. Heifetz of the Harvard Kennedy School and Cambridge Leadership Associates. The Heifetz Collection includes two classic books: *Leadership on the Line*, by Ron Heifetz and Marty Linsky, and *The Practice of Adaptive Leadership*, by Heifetz, Linsky, and Alexander Grashow. Also included is the popular Harvard Business Review article, "Leadership in a (Permanent) Crisis," written by all three authors. Available together for the first time, this collection includes full digital editions of each work. Adaptive leadership is a practical framework for dealing with today's mix of urgency, high stakes, and uncertainty. It has been used by individuals, organizations, businesses, and governments worldwide. In a world of challenging environments, adaptive leadership serves as a guide to distinguishing the essential from the expendable, beginning

the meaningful process of adaption, and changing the status quo. Ronald A. Heifetz is a cofounder of the international leadership and consulting practice Cambridge Leadership Associates (CLA) and the founding director of the Center for Public Leadership at the Harvard Kennedy School. He is renowned worldwide for his innovative work on the practice and teaching of leadership. Marty Linsky is a cofounder of CLA and has taught at the Kennedy School for more than twenty-five years. Alexander Grashow is a Senior Advisor to CLA, having previously held the position of CEO.

It is clearly written and will engage scholars interested in Latin America from a wide range of disciplines. Jonathan di John, Journal of Agrarian Change This collection of essays on the political economy of the Andean region goes to the heart of the struggle these smaller economies face in completing crucial reforms and achieving higher growth. Andrés Solimano has brought together the best and the brightest talent from each country, the result being the most compelling analysis ever of how enclave development and a historical dependence on primary exports renders these countries distinctly Andean. As the essays argue, the political solutions and economic remedies must address

this phenomenon, rather than mimicking those strategies of the larger emerging market countries in the region. Carol Wise, University of Southern California, US The contributors to this authoritative volume analyze the impact of political crises and social conflict on economic performance in the Andean region of Latin America. The blend of theory and case studies is also relevant for understanding other complex societies in the developing world and transition economies. The book provides illuminating insights on how to understand, and survive, the complicated interactions between volatile politics, unstable democracies, violence, social inequality and

uneven economic performance. Recent political economy theories are combined with valuable quantitative and qualitative information on presidential crises, breakdowns of democracy, constitutional reforms, quality of institutions, and social inequality and exclusion to understand actual country realities. Part I provides the conceptual framework and a regional perspective of the book. Part II contains five political economy country studies Bolivia, Colombia, Ecuador, Peru and Venezuela written by leading scholars in the field and former senior policymakers, including a former President. Together, the chapters highlight the detrimental effects of political instability and social

conflict on economic growth and stability, as well as the feedback effects from poor economic performance on political instability and institutional fragility. The country studies warn that narrow economic reforms that do not pay adequate attention to politics, institutions and social structures are bound to fail in bringing lasting prosperity and stability to complex societies. Examining new and rich information on episodes of political turmoil, military interventions, forced presidential resignations, constitutional reforms and social uprisings, this book will be required reading for all those interested in the interface of politics and economic development.
