## PSYCHIATRIC NURSING SKILLS

Lippincott Williams & Wilkins  
 Rev. ed. of: Foundations of psychiatric mental health nursing / [edited by] Elizabeth M. Varcarolis, Margaret Jordan Halter. 6th ed. c2010.  
*Concepts and Case Studies in Nursing* Jones & Bartlett Publishers  
 Created especially for nurses, the Clinical Decision Making series helps to bridge the gap between content

knowledge and clinical application. Case Studies in Medical-Surgical, Pharmacologic, and Psychiatric Nursing provides 120 nursing case histories that include critical thinking questions and answers based on real-life client situations. Every case contains a blueprint of variables that must be considered while evaluating a particular scenario, and are pertinent concerning the client nursing protocol and setting of care. Examples of these variables include age,

gender, cultural influences, pre-existing conditions, legal issues, or communication skills. Each blueprint and case is different just as each clinical situation is unique. By simulating the decision-making process, learners gain the confidence needed to make informed clinical judgments that will make them successful practitioners. Simply stated, Clinical Decision Making shortens the distance between theory and practice like no other educational tool!

**51 Case Histories  
Related to Psychiatric  
Community Mental  
Health Nursing** Delmar

Pub

Manual of Psychiatric Nursing Skills guides nursing students and practicing nurses towards enhancing fundamental psychiatric nursing skills competency in specific assessment and interventions for the selected psychiatric disorders. A nursing skill book in a manual format, this text is handy at the clinical site and encourages readers to

translate their theoretical knowledge and psychiatric nursing skills into clinical practice. Topics include therapeutic communication techniques, assessment and interventions for depression, bipolar disorder, schizophrenia, and suicide attempts, and crisis management skills for psychiatric emergencies. Included in the appendices are essential insights into ego defense mechanisms, Erickson's Psychosocial Developmental Stages, Freud's Stages of

Psychosexual Development, and Piaget's Stages of Cognitive Development.

**Evolve Apply** Jones & Bartlett Learning Get much-needed exposure to real-world clinical scenarios and psychiatric evaluations, with this invaluable guide to positive, effective psychiatric advance practice nursing care. For an expert guide to providing patient-centered, evidence-based psychiatric care, keep Psychiatric Case Studies for Advanced Practice by

your side. Practical and easy-to-follow, these more than 50 case scenarios clearly display the complaints, diagnoses, and treatments of the most common psychiatric disorders, supporting the critical decision-making skills of nurses practicing in a broad range of settings. Psychiatric, family, emergency, and general practice nurse practitioners of all experience levels will find this an invaluable aid for creating an informed, holistic practice. Follow the real-life cases and

expert analysis of psychiatric patients of a wide variety of ages, backgrounds, and conditions . . . Real-world child, adolescent, adult, and geriatric inpatient and outpatient psychiatric case studies that emphasize problem-based learning and an evidence-based practice Current diagnostic content from the Diagnostic and Statistical Manual of Mental Disorders, 5th Edition (DSM-5), that includes DSM-5's newer diagnoses—gender dysphoria, binge eating

disorder, and autism spectrum, plus current treatments for alcohol and opiate addiction Sample routine screening tools that offer convenient checklists and handouts to support patient treatment Content presented in a simple format—organized by age and indexed by diagnostic category for quick reference Each case presented in a standard format: chief complaint, history, mental status, diagnosis, differential diagnosis, treatment plan, and rationale for

treatment prescribed—with questions at the end that guide you to create a diagnosis using the DSM-5 Cases addressing a wide range of disorders and supporting all experience levels in a variety of treatment settings—counseling centers, correctional facilities, homeless shelters, inpatient psychiatric units, and hospital consultation and liaison services Treatments and rationales that represent current, evidence-based

research—treatment sections divided into psychopharmacology, diagnostic tests, referral, psychotherapy, and psychoeducation Supplemental teaching tool for graduate psychiatric nurse practitioner/APN programs [Acp Clinical Decision Making: Case Studies in Psych Pkg](#) Wiley-Blackwell Mastering critical thinking skills can be challenging for student nurses. Case studies help but can be flat and predictable. Instead, this book uses unfolding case studies

that provide new information as the reader goes along, teaching critical skills and the knowledge to apply what is learned in nursing school to real-life on-the-job situations. **Medical-Surgical, Pediatric, Maternity, and Psychiatric** Springhouse Publishing Company Focusing on what psychiatric nurses actually do in everyday practice, *Psychiatric Mental Health Nursing*, 5th Edition, uses a balanced nursing-medical

approach to cover all of the most common disorders and treatments. The text's full-color illustrations and straightforward style help you make sense of challenging material. And its strong emphasis on the nursing process, updated DSM-IV-TR diagnostic criteria, interdisciplinary interventions, and the latest mental health practices boost your confidence in managing clients and prepare you for success on the NCLEX® examination. UNIQUE! Balanced nursing-medical

approach offers strong baseline coverage of the nursing process and interdisciplinary interventions and focuses on what psychiatric nurses actually do. Complete coverage of the nursing process features the six-step problem-solving method and how to put it into practice. DSM-IV-TR Criteria boxes list categories of mental disorders and the criteria for diagnosing them. Nursing care plans provide care guidelines for each plan and include a brief case study,

followed by assessment, diagnosis, goal setting, interventions with rationales, and evaluation. UNIQUE! Clinical Alert boxes address issues critical to the safety or well-being of the client. Case studies depict effective nursing care strategies and promote critical thinking. Research for Evidence-Based Practice boxes discuss the implications of current research studies. Client and Family Teaching Guidelines boxes focus on the issues confronting families when

a member suffers from mental illness. UNIQUE! Medication Key Facts boxes highlight the most common psychopharmacologic interventions along with safe and effective use. Nursing Assessment Questions boxes include questions that should be asked in the assessment of a particular disorder. Clinical Symptoms boxes help you apply content to the real world. Additional Treatment Modalities boxes summarize other modalities and interventions used in

conjunction with nursing interventions in the treatment of a particular disorder. Chapter summaries conclude each chapter with the most significant ideas to remember. Review questions with answers in the appendix offer immediate reinforcement of chapter content and help you prepare for the NCLEX Examination. Glossary provides concise definitions of key terms. Objectives and key terms emphasize the most important concepts from each chapter.

Hone your ability to make sound clinical nursing judgment via a conceptual approach to teaching and learning with Harding & Snyder's Clinical Reasoning Cases in Nursing, 7th Edition. This time-tested case study approach is highly regarded for its clinically relevant and thought-provoking cases. With each adoption, you'll be able to tap into 150 unique case studies covering all four clinical

practice areas: medical-surgical, pediatric, OB/maternity, and psychiatric nursing, all newly organized to facilitate a conceptual approach to teaching and learning. Each case covers a common patient problem, drawn from actual clinical experiences and written by nurses who are clinical experts. Cases include integrated content on pharmacology, nutrition, and diagnostic/laboratory tests to encourage you to think critically about all aspects of patient care.

The 7th edition features a new concept-based organization, an enhanced focus on interprofessional collaboration and QSEN, 20 all-new case studies, and updated content throughout to reflect the most current standards of clinical practice. Awarded second place in the 2019 AJN Book of the Year Awards in Medical-Surgical category. Comprehensive assortment of 150 case studies draws from actual clinical experiences in medical-surgical, pediatric, OB/maternity,

and psychiatric clinical areas to help you think critically, prioritize, and deliver proactive nursing care. Critical thinking approach helps you learn to identify changes, anticipate possible complications, and initiate therapeutic interventions. Progressive case complexity builds on previous learning to help you gradually develop more and more expertise. NEW & UNIQUE! Concept-based organization mirrors the growing use of concept-based curricula and conceptual

approaches to teaching and learning in nursing education. NEW! 20 all-new cases and four extensively-revised cases that address important contemporary healthcare issues and allow for better coordination with Giddens, HESI, and other exemplar lists. NEW! Updated content throughout reflects the latest evidence-based clinical practice, including national and international treatment guidelines. NEW! Enhanced focus on interprofessional collaboration identifies

opportunities for interprofessional collaboration are discussed. NEW! Greater consistency with the NCLEX Exam includes revisions like the elimination of most drug trade names and the inclusion of Canadian lab values. Enhanced QSEN safety emphasis is highlighted with a "target" icon to communicate "caution" or "safety." NEW! Increased emphasis on sepsis and antibiotic resistance throughout that addresses the growing problem of sepsis

(a new Joint Commission "core measure") and antibiotic resistance where appropriate throughout. NEW! Improved answer spacing ensures that space left for answers reflects what is actually needed.

Critical Thinking in Nursing: Case Studies Across the Curriculum, 1e (Package) SIGMA Theta Tau International Case Studies in Nursing Case Management provides portrayals of health care organizations around the nation that have successfully

implemented case management programs. It reports on how case management is being used in inpatient, ambulatory, operating room, intensive care, home health, and subacute settings. Specific populations such as pediatric, maternity, dialysis, geriatric, psychiatric, and AIDS/HIV patients are also addressed. Case managers' roles in managed care and community-based settings as well as insurance companies are

described.

A Caring Approach  
McGraw-Hill Education  
(UK)

A case study companion to the leading textbook on psychotherapy for advanced practice psychiatric nurses Case Study Approach to Psychotherapy for Advanced Practice Psychiatric Nurses is a case study companion to the groundbreaking and award-winning textbook Psychotherapy for the Advanced Practice Psychiatric Nurse, edited by Kathleen Wheeler.

Designed for both the novice and experienced advanced practice psychiatric nurse, it provides complementary content and activities to help students and professionals master the art and science of conducting psychotherapy. The case studies address a wide range of diverse theoretical approaches and varied client problems and psychiatric diagnoses. Each chapter follows a consistent format to allow for comparison, beginning

with the author's personal experience, providing the reader with the understanding of how various theoretical orientations were chosen. This is followed by background on philosophy and key concepts, as well as mental health and psychopathology, therapeutic goals, assessment perspectives, and therapeutic interventions. The chapter then presents background on the client and a selection of verbatim transcript segments from the beginning, middle,

and final phase of therapy. The therapeutic process is illustrated by client-therapist dialogues, which are supplemented with process commentaries that explain the rationale for the interventions. A final commentary on the case is presented to enhance the reader's clinical reasoning skills. Key Features: Augments the groundbreaking *Psychotherapy for the Advanced Practice Psychiatric Nurse* Features case studies that address a range of theoretical

approaches and varied client problems and psychiatric diagnoses Offers comprehensive coverage of the approach, psychopathology, therapeutic goals, assessment perspectives, therapeutic interventions, and verbatim transcripts from the beginning, middle, and final phases of therapy Includes reflection questions to help the reader apply the material to their personal lives and offer guidelines for continuing to work with the theoretical orientation

Highly regarded for its  
clinically relevant and  
thought-provoking  
content, Winningham's  
Critical Thinking Cases in  
Nursing, 6th Edition  
features 150 case studies  
that cover all four clinical  
practice areas: medical-  
surgical, pediatric,  
OB/maternity, and  
psychiatric nursing. Each  
case covers a common  
patient problem, drawn  
from actual clinical  
experiences and written  
by nurses who are clinical

experts. This edition  
reflects the most current  
standards of clinical  
practice, including  
content on pharmacology,  
nutrition, and  
diagnostic/laboratory  
tests to prepare you for all  
aspects of patient care.  
From nursing educators  
Mariann Harding and Julie  
Snyder, this workbook  
helps you develop your  
clinical nursing judgment  
and bridge the gap from  
nursing knowledge to  
nursing practice.  
Comprehensive case  
study approach uses  
cases drawn from actual

clinical experiences to help you identify changes, anticipate possible complications, and initiate therapeutic interventions. Progressive case complexity builds on previous learning and helps you develop more and more expertise. 150 case studies cover all major clinical areas, including medical-surgical, pediatric, OB/maternity, and psychiatric cases, providing you with many diverse clinical situations and opportunities to apply knowledge and develop

critical thinking skills. Body system organization makes the book easier to use with medical-surgical nursing textbooks and courses. NEW! QSEN icons highlight essential safety content. NEW! Increased emphasis on NCLEX® Exam-style alternate-format questions includes multiple-response, prioritization, and illustration-based questions, offering better NCLEX Examination preparation. NEW! Additional documentation questions and a NEW Chart View design provide

more experience in documenting patient care based on real-world electronic chart formats. NEW! Reorganized format presents cases in three parts: 1) medical-surgical cases; 2) pediatric, maternity, and women's health cases; and 3) psychiatric and alternative therapies cases. NEW! Increased difficulty level includes more questions about care of older adults and multi-system situations. UPDATED content includes the latest clinical treatment guidelines,

issues, and practice standards.

**Nursing Case Studies on Improving Health-Related Quality of Life in Older Adults** Mosby

Everything you need to know about Mental Health Nursing...at a Glance! From the publishers of the market-leading at a Glance series comes the perfect companion for study and revision for pre-registration mental health nursing students.

This brand new nursing title is the perfect accompaniment for pre-

registration nursing courses, and is the revision aid that you have been waiting for! Divided into three sections, this book first explores the essential clinical skills needed by nurses, using the NMC Essential Skills Clusters as an organising framework. The second section goes on to look at common disorders and approaches. The third section then discusses the leadership and organisational skills required by nurses, again derived from the NMC standards. Key features:

Breaks down complex aspects of mental health care in an accessible and un-intimidating way The perfect revision and consolidation textbook Linked closely with the NMC standards for pre-registration nursing education, and the essential skills clusters framework Explores a broad range of mental health disorders, from care of children right up to care of older people Looks at mental health nursing in all settings, including acute, forensic and community Highly

visual colour presentation  
Includes boxes, summary  
boxes, reflective  
opportunities and case  
studies to improve the  
learning experience  
Varcarolis' Foundations of  
Psychiatric Mental Health  
Nursing Springer  
Publishing Company  
Perfect for: • Diploma of  
Nursing Students. Apply  
theory to practice with the  
Clinical Cases textbook  
series! Clinical Cases:  
Nursing Care Studies is  
the perfect textbook for  
nursing students  
completing their Diploma.  
This nursing book offers a

variety of case studies  
based on common real-  
life examples that you are  
likely to encounter in  
practice. Written by  
Margaret Webb and Ellie  
Kirov, Nursing Care  
Studies focusses on key  
nursing care topics,  
including: Vital Signs, Skin  
Integrity and Wound Care,  
Community-based Care,  
General Health  
Assessment, Medications  
and Palliative Care.  
Benefit from the logical  
structure of this nursing  
book, where each case  
study begins with an  
introduction of the

presenting condition and  
associated symptoms. As  
the scenario develops,  
more information is  
provided, such as the  
patient's condition,  
medications, tests and  
other important factors.  
Best of all, the conclusion  
of each case study  
emphasises patient  
outcomes and emphasises  
key points, providing you  
a great summary to  
reflect on. Make the most  
of Clinical Cases: Nursing  
Care Studies by using it in  
conjunction with  
Tabbner's Nursing Care:  
Theory and Practice, 6th

Edition by Gabby Koutoukidis, Kate Stainton and Jodie Hughson as you progress through your Diploma of Nursing. Used together, these nursing textbooks provide a strong foundation for your knowledge of important themes and issues in nursing care. Support your nursing education by purchasing the other great titles available in the Clinical Cases textbook series. Other titles in this series: • Clinical Cases: Fundamentals of Nursing Case Studies by Natashaia

Scully and Damian Wilson. • Clinical Cases: Medical-Surgical Nursing Case Studies by Janine Bothe. Other formats: This book is also available as an App via the Apple App Store <https://itunes.apple.com/au/app/clinical-cases-nursing-care/id659030265?mt=8> • Easy-to-understand, logical layout. • 24 case studies covering key topics in nursing care. • Multiple choice questions to test your knowledge throughout the textbook. • Rationales provided for all answers. • References

for further reading and research. • Designed as an exam preparation and revision tool.

## **CASE STUDIES IN PSYCHIATRIC NURSING**

Elsevier Health Sciences Psychiatric and Mental Health Nursing in the UK is an adaptation of Australia and New Zealand's foremost mental health nursing text and is an essential resource for both mental health nursing students and qualified nurses. Thoroughly revised and updated to reflect current

research and the UK guidelines as well as the changing attitudes about mental health, mental health services and mental health nursing in UK. Set within a recovery and patient framework, this text provides vital information for approaching the most familiar disorders mental health nurses and students will see in clinical practice, along with helpful suggestions about what the mental health nurse can say and do to interact effectively with patients and their

families. Gives readers a thorough grounding in the theory of mental health nursing. Case studies throughout the text allow readers to understand the application of theory in every day practice. Includes critical thinking challenges and ethical dilemmas to encourage the reader to think about and explore complex issues. Exercises for class engagement complement learning and development in the classroom environment.

Interactive Case  
Studies for Psychiatric  
and Mental Health**  
Addison-Wesley  
"This is a modern multi-  
disciplinary text  
confronting a complex  
age and journey into  
recovery. It is a roadmap  
for every student of  
mental health who wants

to put the most up-to-date practice fuel into their tank. The case study approach offers an authentic insight into life experiences of service users and allows the reader to re-think the relationship they have with vulnerable people in the middle of sensitive life challenges." Dr Dean-David Holyoake, University of Wolverhampton, UK This engaging book consists of 27 case studies which offer a realistic and insightful view into the experience of mental ill-

health. A range of mental health problems are considered for people at different stages of the lifespan, from common problems such as anxiety or depression, through to severe and enduring conditions such as schizophrenia. Part of a new Case Book series, the book is written in an informative and clear style and utilises the latest evidence-based interventions and resources. The approach adopted: Incorporates recovery based principles Emphasizes the

importance of collaborative working Values the person's perspective Actively empowers and advocates for the person to make their own decisions and choices Written and edited by academic experts and experienced clinicians, the cases all take a positive, person-centred approach focusing on recovery outcomes. The book addresses the biological, psychological, social and physical aspects in scenarios and includes areas of mental health

which are often overlooked, such as alcohol and substance misuse amongst older adults. Mental health nurse training involves focusing on working with individuals one-to-one in a

range of settings, and this case book will reflect and complement the skills and situations students face while training and on placement. Contributors: Geoffrey Amoateng, Jean-

Louis Ayivor, May Baker, Alison Coad, Hilary Ford, Sally Goldspink, John Harrison, Mark McGrath, Michael Nash, Cliff Riordan, Heather Rugg, Noel Sawyer, Vanessa Skinner, Steve Wood.
