Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to: -Build an accurate threat model for your vehicle -Reverse engineer the CAN bus to fake engine signals -Exploit vulnerabilities in diagnostic and data-logging systems -Hack the ECU and other firmware and embedded systems -Feed exploits through infotainment and vehicle-to-vehicle communication systems -Override factory settings with performance-tuning techniques -Build physical and virtual test benches to try out exploits safely If you're curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker's Handbook your first stop.

In JERRI, A Black Woman's Life In the Media, author Jerri Lange has written a personal, candid revelation of the situation of a black woman in the early days of media. As its publisher, Ishmael Reed, of Ishmael Reed Publishing Company, comments: "JERRI, A Black Woman's Life In the Media reminds us of a time when heroes like Ms. Lange challenged powerful institutions, no matter the consequences." Armed with her father's admonition to not allow anyone to interfere with her dreams, Jerri Lange set out on a life's journey that would take her to the pinnacle of San Francisco's media and political power. A single mother, Ms. Lange accomplished this while raising three distinguished sons, including Michael, a director, producer and Malcolm X delineator, and Ted, a regular on the television series "Love Boat." Ms. Lange's journalistic career began at the San Francisco Chronicle, where she worked along side such luminaries as Art Hoppe, Charles McCabe and Count Marco, and her mentor, Scott Newhall. She continued with tours at stations KEMO, KBHK, KGO and KQED Television. The dream ended when Ms. Lange delivered her famous speech, "Blacks In Broadcasting," in which she criticized the negative images of blacks in the media. After this speech she found the industry that had formerly welcomed her as the token pioneering African-American newswoman and television host, began to give her the cold shoulder. She was eventually, in her words, black balled.' But if some members of the segregated San Francisco

media thought that they had defeated Jerri Lange, they underestimated the resiliency of Laura and Turner Wilson's daughter. Ms. Lange began to tour the world, which provided her with the opportunity to draw revealing portraits of a dictator's wife, Arnold Toynbee, and others. Along the way she was feted by members of the British aristocracy and was an invited guest to a king's wedding. Ms. Lange also gives the reader revealing portraits of Malcolm X, Shirley MacLaine, Sammy Davis, Jr. and Daisaku Ikeda. She continued her career at KHET, a public television station in Hawaii. With African American faces disappearing from television news rooms, and the media establishment having abandoned their goal of diversifying the industry by the year two thousand, a challenge made by the late Robert Maynard, Ms. Lange's effort as a pioneer African-American news woman is especially timely.

The first edition of this book was written six years ago. Since then, there have been some significant developments in the area of car audio (and video). In addition, many of the products featured in the first edition are now obsolete. While the first edition of the book continues to sell, we have seen a bit of a slow-down at major accounts. This edition promises to be even more successful than the last. Car Stereo Cookbook, 2e is a completely revamped edition of a hugely successful title that continues to sell. This revised book will include new information on mobile video, satellite radio, mp3, wma, digital broadcast radio, and will eliminate the out-of-date products that are no longer pertinent.

The Culture of Diagram is about visual thinking. Exploring a terrain where words meet pictures and formulas meet figures, the book foregrounds diagrams as tools for blurring those boundaries to focus on the production of knowledge as process. It outlines a history of convergence among diverse streams of data in real-time: from eighteenth-century print media and the diagrammatic procedures in the pages of Diderot's Encyclopedia to the paintings of Jacques-Louis David and mathematical devices that reveal the unseen worlds of quantum physics. Central to the story is the process of correlation, which invites observers to participate by eliciting leaps of imagination to fill gaps in data, equations, or sensations. This book traces practices that ran against the grain of both Locke's clear and distinct ideas and Newton's causality—practices greatly expanded by the calculus, probabilities, and protocols of data sampling. Today's digital technologies are rooted in the ability of high-speed computers to correct errors when returning binary data to the human sensorium. High-tech diagrams echo the visual structures of the Encyclopedia, arraying packets of dissimilar data across digital spaces instead of white paper. The culture of diagram broke with the certainties of eighteenth-century science to expand the range of human experience. Speaking across disciplines and discourses, Bender and Marrinan situate our modernity in a new and revealing light.
