A timeless novel about the kindness of strangers Near a little cove where a brook runs out to the sea live a girl and her grandmother. All alone with no neighbors at all, the two lead a peaceful existence. They have a house, dine on sea kale and mussels and sand snails, and build fires from driftwood. But the grandmother is very old. When the time comes that the girl must bury the woman, she makes up a funeral song about the birds she is watching: Two crows never fly alone, and death is never, ever past. The next day the same crows seem to beckon her, and so the Crow-Girl begins her journey, one in which she will meet people both warm and cold, hurt and hurtful. And the Crow-Girl, before she knows it, has the makings before her of a new family . . . This lyrical story, with its characters' moments of darkness always overcome through incredible humanity, introduces a strong new voice for American readers. Bogmarkedet Farrar, Straus and Giroux (BYR)

\*THIS BOOK IS AVAILABLE AS OPEN ACCESS BOOK ON SPRINGERLINK\* This open access book is the product of ICMI Study 22 Task Design in Mathematics

Education. The study offers a state-of-the-art summary of relevant research and goes beyond that to develop new insights and new areas of knowledge and study about task design. The authors represent a wide range of countries and cultures and are leading researchers, teachers and designers. In particular, the authors develop explicit understandings of the opportunities and difficulties involved in designing and implementing tasks and of the interfaces between the teaching, researching and designing roles – recognising that these might be undertaken by the same person or by completely separate teams. Tasks generate the activity through which learners meet mathematical concepts, ideas, strategies and learn to use and develop mathematical thinking and modes of enquiry. Teaching includes the selection, modification, design, sequencing, installation, observation and evaluation of tasks. The book illustrates how task design is core to effective teaching, whether the task is a complex, extended, investigation or a small part of a lesson; whether it is part of a curriculum system, such as a textbook, or promotes free standing activity; whether the task comes from published source or is devised by the teacher or the student.

## MUNDTLIGE PRØVEOPGAVER TIL 9. & 10. KLASSE

Gyldendal Uddannelse

A young student hitch-hiking home from college meets an old man with an incredible story to tell. Taken from his collection Tell Tale, A Wasted Hour is an ingenious and witty short story sure to delight Jeffrey Archer's many fans and proves why the Mail on Sunday has said that he is 'probably the greatest storyteller of our age'. If you loved this

story be sure to look out for The Year of Short Stories, a collection of digital short stories which celebrate the talent of this incredible bestselling author, including The Endgame and The Man Who Robbed His Own Post Office.

Beginning in the middle of crisis, then  
accelerating through plots that grow  
stranger by the page, Naja Marie Aidt's  
stories have a feel all their own. Though  
they are built around the common  
themes of sex, love, desire, and gender,  
Aidt pushes them into her own  
desperate, frantic realm. In one, a whore  
shows up unannounced at a man's  
apartment, roosts in his living room, and  
then violently threatens him when he  
tries to make her leave. In another, a  
wife takes her husband to a city where it  
is women, not men, who are the

dominant sex? but was it all a  
hallucination when she finds herself tied  
to a board and dragged back to his car?  
And in the unforgettable "Blackcurrant,"  
two young women who have turned  
away from men and toward lesbianism  
abscond to a farm, where they discover  
that their neighbor's son is  
experimenting with his own kind of  
sexuality. The first book from the widely  
lauded Aidt to reach the English  
language, Baboon delivers audacious  
writing that careens toward bizarre, yet  
utterly truthful, realizations.

## og cykelvikar i Gentofte 1940-1943, i skolehistorisk perspektiv Gyldendal Uddannelse

This book is one of the first to attempt a  
systematic in-depth analysis of  
assessment in mathematics education in  
most of its important aspects: it deals  
with assessment in mathematics  
education from historical, psychological,  
sociological, epistemological, ideological,  
and political perspectives. The book is  
based on work presented at an invited  
international ICMI seminar and includes  
chapters by a team of outstanding and  
prominent scholars in the field of  
mathematics education. Based on the  
observation of an increasing mismatch  
between the goals and accomplishments  
of mathematics education and prevalent  
assessment modes, the book assesses  
assessment in mathematics education  
and its effects. In so doing it pays  
particular attention to the need for and  
possibilities of assessing a much wider  
range of abilities than before, including  
understanding, problem solving and  
posing, modelling, and creativity. The  
book will be of particular interest to  
mathematics educators who are  
concerned with the role of assessment in  
mathematics education, especially as  
regards innovation, and to everybody

working within the field of mathematics education and related areas: in R&D, curriculum planning, assessment institutions and agencies, teacher trainers, etc.

Love in the Afternoon and Other Delights  
Samfundslitteratur

Youth around the world are fittingly described as digital natives because of their comfort and skill with technological hardware and content. Recent studies indicate that an overwhelming majority of children and teenagers use the Internet, cell phones, and other mobile devices. Equipped with familiarity and unprecedented access, it is no wonder that adolescents consume, create, and share copious amounts of content. But is there a cost? *Digital Youth: The Role of Media in Development* recognizes the important role of digital tools in the lives of teenagers and presents both the risks and benefits of these new interactive technologies. From social networking to instant messaging to text messaging, the authors create an informative and relevant guidebook that goes beyond description to include developmental theory and implications. Also woven throughout the book is an international sensitivity and understanding that clarifies how, despite the widespread popularity of digital communication, technology use varies between groups globally. Other specific topics addressed include: Sexuality on the Internet. Online identity and self-presentation. Morality, ethics, and civic engagement. Technology and health. Violence, cyberbullying, and victimization. Excessive Internet use and addictive behavior. This comprehensive volume is a must-have reference for researchers, clinicians, and graduate students across such disciplines as

developmental/clinical child/school psychology, social psychology, media psychology, medical and allied health professions, education, and social work.

Faglig Læsning for Matematiklæreren

Gyldendal Uddannelse

From the No 1 Bestselling author PENNY VINCENZI - LOVE IN THE AFTERNOON AND OTHER DELIGHTS brings together searing journalism, ten short stories and other work in a single edition for the first time. 'A charming miscellany... brought to life with touching, Nora Ephron-like honesty' Daily Mail As well as ten stunning short stories, Penny also shares some of her thoughts on a huge range of subjects from love and relationships to work and families, and gives us a peek at the tantalising first chapter of her new novel, A KIND OF PROMISE - making LOVE IN THE AFTERNOON AND OTHER DELIGHTS a must-have for any Vincenzi fan.
