Simon and Schuster

"I don't know when I've been so wowed by a new author" –Chip Health, co-author of *The Power of Moments* and *Switch* A talented journalist reveals the hidden patterns behind what we call "luck" -- and shows us how we can all improve outcomes despite life's inevitable randomness. "Do you believe in luck?" is a polarizing question, one you might ask on a first date. Some of us believe that we make our own luck. Others see inequality everywhere and think that everyone's fate is at the whim of the cosmos. Karla Starr has a third answer: unlucky, "random" outcomes have predictable effects on our behavior that often make us act in self-defeating ways without even realizing it. In this groundbreaking book, Starr traces wealth, health, and happiness back to subconscious neurological processes, blind cultural assumptions, and tiny details you're in the habit of overlooking. Each chapter reveals how we can cultivate personal strengths to overcome life's unlucky patterns. For instance:

- Everyone has free access to that magic productivity app—motivation. The problem? It isn't evenly distributed. What lucky accidents of history explain patterns behind why certain groups of people are more motivated in some situations than others?
- If you look like an underperforming employee, your resume can't override the gut-level assumptions that a potential boss will make from your LinkedIn photo. How can we make sure that someone's first impression is favorable?
- Just as people use irrelevant traits to make assumptions about your intelligence, kindness, and trustworthiness, we also make inaccurate snap judgments. How do these judgments affect our interactions, and what should we assume about others to maximize our odds of having lucky encounters? We don't always realize when the world's invisible biases work to our advantage or recognize how much of a role we play in our own lack of luck. By ending the guessing game about how luck works, Starr allows you to improve your fortunes while expending minimal effort.

Money in the Streets is more than one man's journey in hard-knocks New York. It's more than the recounting of risking it all to win. Told with heart and laced with the sentiment of tremendous gratitude, Barry Habib deftly weaves tales of his upbringing to take the reader back in time. From his childhood, where he'd pick up the discarded toys of other children because he had so few of his own to play with on into the sales world, where Habib got creative as a sort-of street vendor, *Money in the Streets* blends humor and hardship through the incredulous moments of Habib's life. He wrote this book to answer a compulsion to share what worked for him as he scaled the ladder—creating multiple successful companies, growing into an international speaker, and frequenting major media networks as well as producing various entertainment productions—most notably as the driving force and lead producer of one of the longest-running shows on Broadway (later made into a film): *Rock of Ages*. Habib offers his life as proof that you can keep going no matter what. He shares some of his most painful memories while also exulting in personal and business triumphs to encourage everyone to aim for the same. Of particular note are the mindset tactics in *Money in the Streets* that are road-tested and personal practices of Habib, who treats each day as a reason to be thankful. No matter

the struggle, whether self-doubt, negativity, loss, stress, or being "stuck" in life, *Money in the Streets* is a resolution roadmap. An easy read that will play on the reader's every emotion, this standout work and Habib's voice are unforgettable. He writes as if you are the only person in the room...because to Habib, you are.

"Brilliant. One of those rare books that forces you to ask what the hell you're doing with your life." --George Monbiot, *The Guardian* **One of Forbes' 13 Best Books for Summer 2017** We've all heard the saying "seize the day." But what does it really mean--and how can we use it to jumpstart our lives? In the age of distraction, *carpe diem* is more essential than ever, and yet many of us simply don't employ it in our lives. In this thought-provoking and empowering book, cultural writer Roman Krznaric unpacks the history, philosophy, and modern-day applications of "seizing the day" and delivers a rousing call to action for anyone who wants to improve their lives--or our world. *Carpe Diem* is a far-ranging read, drawing on everything from the neuropsychology of regret to the anthropology of play, from medieval carnival rites to religious conceptions of the afterlife and early Japanese cinema. Offering food for thought as well as inspiring takeaways, the book examines not just the contributions of great thinkers throughout history, but also reveals insights from the lives of great seize-the-day practitioners including nightclub dancers, war photographers, bored housewives, and committed revolutionaries--offering a wide range of solutions to the daunting challenge of leading a meaningful life.

How does gender influence social movements? How do social movements deal with gender? In *Gender and Social Movements*, Jo Reger takes a comprehensive look at the ways in which people organize around gender issues and how gender shapes social movements. Here gender is more than

an individual quality, it is a part of the very foundation of social movements, shaping how they recruit, mobilize and articulate their strategies, tactics and identities. Moving past the gender binary, Reger explores how movements can shift understandings of gender and how backlash and countermovements can often follow gendered movement successes. Adopting both an intersectional and global lens, the book introduces readers to the idea that gender as a form of societal power is integral in all efforts for social change. With a critical overview across different types of movements and gender activism, such as the women's liberation, #MeToo and transgender rights movements, this book offers a solid foundation for those seeking to understand how gender and social movements interact.

Johnson focuses not so much on the development of new technologies and products as on the implementation of new business models. A successful business model depends on four aspects—a customer value proposition (CVR), a profit formula, and the key resources and processes that need to be in place in order to deliver value to the customer. Building on this simple model, Johnson explores, using a number of case studies, how companies can move into transforming existing markets, creating new markets, and emerging in a strong position from times of industry upheaval. With his insightful and wide-ranging theory of recognition, Axel Honneth has decisively reshaped the Frankfurt School tradition of critical social theory. Combining insights from philosophy, sociology, psychology, history, political economy, and cultural critique, Honneth's work proposes nothing less than an account of the moral infrastructure of human sociality and its relation to the perils and promise of contemporary social life. This book provides an accessible overview of Honneth's main contributions across a variety of fields, assessing the strengths and weaknesses of his thought. Christopher Zurn clearly explains Honneth's multi-faceted theory of recognition and its relation to diverse topics: individual identity, morality, activist movements, progress, social pathologies, capitalism, justice, freedom, and critique. In so doing, he places Honneth's theory in a broad intellectual context, encompassing classic social theorists such as Kant, Hegel, Marx, Freud, Dewey, Adorno and Habermas, as well as contemporary trends in social theory and political philosophy. Treating the full range of Honneth's corpus, including his major new work on social freedom and democratic ethical life, this book is the most up-to-date guide available. Axel Honneth will be invaluable to students and scholars working across the humanities and social sciences, as well as anyone seeking a clear guide to the work of one of the most influential theorists writing today. The God of the Bible is alive and active in our world today. Warren Curtis-Smith has captured a collection of exciting encounter stories where in the name of Jesus he has seen God do many miraculous things. "In 1987 my life took on new meaning. Through a supernatural encounter I realized Frank Sinatra's self-centred song 'My Way' was not the right road to tread. I became filled with an excitement and love for others that changed my life's direction. Moments that had previously passed me by became wonderful opportunities to share what I had discovered. "I was told that a little bit of faith could move mountains. I decided to put this idea to the test. Seizing the Moment is a collection of short stories - encounters I have been privileged to be part of, which I would like to share with you the reader." - Warren Curtis-Smith

Should governments be involved in economic affairs? Challenging prevailing wisdom about the benefits of self-regulating markets, Nina Bandelj and Elizabeth Sowers offer a uniquely sociological perspective to emphasize that states can never be divorced from economy. From defining property rights and regulating commodification of labor to setting corporate governance standards and international exchange rules, the state continuously manages the functioning of markets and influences economic outcomes for individuals, firms and nations. The authors bring together classical interventions and cutting-edge contemporary research in economic sociology to discuss six broad areas of economy/state connection: property, money, labor, firms, national economic growth, and global economic exchange. A wealth of empirical examples and illustrations reveals that even if the nature of state influence on economy varies across contexts, it is always dependent on social forces. This accessible and engaging book will be essential reading for upper-level students of economic sociology, and those interested in the major economic dilemmas of our times. .

Sumac Lottery is nine years old and the self-proclaimed "good girl" of her (VERY) large, (EXTREMELY) unruly family. "Great careers are improvised." There are women who wait and women who don't. Author Angela Priestley once fell into the former camp. "I waited for things to happen to me rather than making them happen myself. It wasn't a matter of being lazy or unambitious but rather of simply believing the success I wanted and the things I desired from my career would simply arrive for me..." *Women who Seize the Moment* addresses the common issues that many women face in their careers. In our society it is not uncommon for people to dislike their job but still work extremely hard. There is an assumption that we will get that raise, eventually, we will get promoted, eventually, I will get my dream job, eventually. *Women who Seize the Moment* reveals 11 steps women should take to stop waiting for these turning points and make them happen. Coming up with excuses is easy, waiting to finish a diploma, waiting for the perfect job opening, waiting until you're 25, 30, 35, waiting to get that industry experience. However embracing all opportunities is what will turn your career around. Turning points are so important in shaping a woman's career. Women still have so many challenges to overcome in order to achieve the success they want; you don't want to also be your own enemy. Society has certainly come a long way however managing the competing interests of caring responsibilities with paid work, conscious and unconscious bias in the office, and battling a male-based hierarchy of leadership style still exists in many industries. In *Women who Seize the Moment*, Angela shares stories from women who've made the most of career turning points: those turning points they have created themselves and those that were beyond their control. They're the women who didn't wait to get the career they wanted, and still don't wait to get the success they desire. Scholastic Inc.

"A colorful introduction to one of the most influential businessmen in history" (*The New York Times Book Review*), Jacob Fugger—the Renaissance banker "who wrote the playbook for everyone who keeps score with money" (Bryan Burrough, author of *Days of Rage*). In the days when Columbus sailed the ocean and Da Vinci painted the *Mona Lisa*, a German banker named Jacob Fugger became the richest man in history. Fugger lived in Germany at the turn of the sixteenth century, the grandson of a peasant. By the time he died, his fortune amounted to nearly two percent of European GDP. In an era when kings had unlimited power, Fugger dared to stare down heads of state and ask them to pay back their loans—with interest. It was this coolness and self-assurance, along with his inexhaustible ambition, that made him not only the richest man ever, but a force of history as well. Before Fugger came along it was illegal under church law to charge interest on loans, but he got the Pope to change that. He also helped trigger the Reformation and likely funded Magellan's circumnavigation of the globe. His creation of a news service gave him an information edge over his rivals and customers and earned Fugger a footnote in the history of journalism. And he took Austria's Habsburg family from being second-tier sovereigns to rulers of the first empire where the sun never set. "Enjoyable...readable and fast-paced" (*The Wall Street Journal*), *The Richest Man Who Ever Lived* is more than a tale about the most influential businessman of all time. It is a story about palace intrigue, knights in battle, family tragedy and triumph, and a violent clash between the one percent and everybody else. "The tale of Fugger's aspiration, ruthlessness, and greed is riveting" (*The Economist*).

Seizing Opportunity in an Unpredictable World Penguin

In the story of every great company and career, there is one defining moment when luck and skill collide. This book is about making that moment happen. According to Frans Johansson's research, successful people and organizations show a common theme. A lucky moment occurs and they take advantage of it to change their fate. Consider how Diane von Furstenberg saw Julie Nixon Eisenhower on TV wearing a matching skirt and top, and created the timeless, elegant wrap-dress. That was a "click moment" of unexpected opportunity. Johansson uses stories from throughout history to illustrate the specific actions we can take to create more click moments, place lots of high-potential bets, open ourselves up to chance encounters, and harness the complex forces of success that follow.

The *New York Times* bestselling authors of *Switch* and *Made to Stick* explore why certain brief experiences can jolt us and elevate us and change us—and how we can learn to create such extraordinary moments in our life and work. While human lives are endlessly variable, our most memorable positive moments are dominated by four elements: elevation, insight, pride, and connection. If we embrace these elements, we can conjure more moments that matter. What if a teacher could design a lesson that he knew his students would remember twenty years later? What if a manager knew how to create an experience that would delight customers? What if you had a better sense of how to create memories that matter for your children? This book delves into some fascinating mysteries of experience: Why we tend to remember the best or worst moment of an experience, as well as the last moment, and forget the rest. Why "we feel most comfortable when things are certain, but we feel most alive when they're not." And why our most cherished memories are clustered into a brief period during our youth. Readers discover how brief experiences can change lives, such as the experiment in which two strangers meet in a room, and forty-five minutes later, they leave as best friends. (What happens in that time?) Or the tale of the world's youngest female billionaire, who credits her resilience to something her father asked the family at the dinner table. (What was that simple question?) Many of the defining moments in our lives are the result of accident or luck—but why should we leave our most meaningful, memorable moments to chance when we can create them? *The Power of Moments* shows us how to be the author of richer experiences.
