Common Sense Cliffs Notes

Classic Books Library presents this brand new edition of “The Federalist Papers”, a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. “The Federalist”, as it was previously known, was constructed by

American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755–1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799–1800 and founded the Federalist Party, the system that governed the nation's finances. His contributions to the Constitution and leadership made a significant and lasting

impact on the early development of the nation of the United States.

While current literature stresses the importance of teaching about the 9/11 attacks on the US, many questions remain as to what teachers are actually teaching in their own classrooms. Few studies address how teachers are using of all of this advice and curriculum, what sorts of activities they are undertaking, and how they go about deciding what they will do. Arguing that the events of 9/11 have become a "chosen trauma" for the US, author Cheryl Duckworth investigates how 9/11 is being taught in classrooms (if at all) and what narrative is being passed on to today's students about that day. Using quantitative

and qualitative data gathered from US middle and high school teachers, this volume reflects on foreign policy developments and trends since September 11th, 2001 and analyzes what this might suggest for future trends in U.S. foreign policy. The understanding that the "post-9/11 generation" has of what happened and what it means is significant to how Americans will view foreign policy in the coming decades (especially in the Islamic World) and whether it is likely to generate war or foster peace.
