

Jackaroo; n. a male station hand. That is according to the "Australian Slang Dictionary" whereas the Macquarie Dictionary gives a more realistic version. "A jack of all trades". Certainly a jackaroo is far more than 'a male station hand', which will be evident as the reader moves through this recount of the writer's five years of 'Station Management Apprenticeship"', possibly a more precise definition of the word. ('Station' being a large sheep and/or cattle property/ranch). The origin of the word 'jackaroo' has been debated as long as the word has been in existence, but the most popular belief is that early English migrants, who worked on stations in the Australian Outback, were given the name of "Jack Raw", being raw to the ways of the Australian bush. One such English migrant, whose name was Jack Carew may have had an influence on the foundation of the word. There is also the more recent female counterpart, known as a jillaroo. It is however, generally agreed that the word has no connection with the famed Australian icon, the kangaroo.

Engines covered: \* 1.6L Diesel (engine code: CK, CR, JK) \* 1.6L Turbo-Diesel (engine code: CY)

**The Jackaroo** Owen Genty

Meet Donald Lam, he's a private detective or at least, he is by the end of the book. A more unlikely looking P.I. you'll never meet, as he is constantly reminded. At 5 and a half feet tall and 127 pounds, he's simply not intimidating at all. But what he lacks in brawn he more than makes up for in brains, a fact that is not lost on his new employer, Bertha Cool of the B.L. Cool Agency, was sharp enough to spot. Now, Bertha Cool is also not the most likely head figure of a detective agency, although physically impressive she most certainly is. She's sixty-something with grey hair, sparkling eyes and a grandmotherly expression. She weighs in at over 300 pounds and is described as having the majesty of a snow capped mountain and the assurance of a steamroller. When Lam gets the job he is put to work immediately because if there's one thing Bertha Cool believes in it's getting her money's worth. His first job is to serve divorce papers on Morgan Birks, husband of Sandra Birks who claims he has been abusing her. It seems a straightforward enough job, and it is. But it's only after the papers have been served that the real fireworks begin. It's in the moments of confusion that quickly follow a seemingly successful job that Lam's genius is uncovered as he works his way through deduction after deduction and then comes up with a brilliant solution that is as impressive in its cunning as it is in its simplicity. As the first book of a series of 29, it provides a terrific start combining an interesting duo with a clever mystery. With the promise of many more such stories to follow, it's bound to leave you begging for more.

By now Jacques Derrida's legacy has taken the form of a veritable (post-

)deconstructive Babel. Its lasting presence is marked by a crucial oscillation between the echoes of its earlier success and the claims of a radically different sensibility. This volume takes stock of the controversy in three main fields: philosophy, literary studies, and law. For all those who are confronted with the variety of Derrida's legacy this book serves as an invaluable map and takes a reconstructive approach to move beyond deconstruction.

Entrepreneurs—and entrepreneurial companies—live or die by the quality of their plans and proposals. Whether it's to get funding for a new product line or business from a client, writing hard-hitting prose that answers essential questions and makes specific requests is an indispensable skill. Entrepreneur, ad man, and writing teacher Dennis Chambers shows how entrepreneurs can persuade people, through skillful writing, to pony up capital or contracts. This ability—which can be learned—is rare in today's media-saturated world. But it counts more than ever if an entrepreneur wants to make it over the magical five-year hump and on into lasting business success. Numerous examples and exercises ensure that entrepreneurs understand how the writing game is played—and that they play it well. Unfortunately, most don't play this game well. Most business writers mistakenly believe their task is to inform. They write

to fill an information gap or to update the reader on a particular project. Or they write about what's important to them. What these writers do not take into account is that the speed of today's work world has reached overdrive. The typical reader simply doesn't have time to ponder dense, poorly organized information and intuit the appropriate action. And readers don't give a hoot about what's important to the writer—they want to know what's in it for themselves. Business writers need to use all the tools at their command to persuade, inspire action, and in general move a project forward. This book is about how to be persuasive in two key skills in business: writing proposals and writing business plans. Step by step, Dennis Chambers illustrates the techniques of effective business writing, with numerous examples throughout. Whether the objective is to secure financing from an investor, lay out a marketing strategy, or secure a large contract, getting results requires crafting an effective structure for the proposal, and using words that sell. Chambers is an able guide in saving entrepreneurs time and undue effort while reaching the goal of long-term business success.
