"Warmly delightful, vigorously affirmative." - The Wall Street Journal. Told with vivid gusto by a young, fiercely determined widow, this towering classic of American frontier life paints a candid portrait of her work, travels, neighbors, and harsh existence on a Wyoming ranch in the early 1900s. Includes 6 original illustrations by N.C. Wyeth.

Now a Netflix film starring and directed by Chiwetel Ejiofor, this is a gripping memoir of survival and perseverance about the heroic young inventor who brought electricity to his Malawian village. When a terrible drought struck William Kamkwamba's tiny village in Malawi, his family lost all of the season's crops, leaving them with nothing to eat and nothing to sell. William began to explore science books in his village library, looking for a solution. There, he came up with the idea that would change his family's life forever: he could build a windmill. Made out of scrap metal and old bicycle parts, William's windmill brought electricity to his home and helped his family pump the water they needed to farm the land. Retold for a younger audience, this exciting memoir shows how, even in a desperate situation, one boy's brilliant idea can light up the world. Complete with photographs, illustrations, and an epilogue that will bring readers up to date on William's story, this is the perfect edition to read and share with the whole family.

Written in the style of a memoir, My Antonia chronicles Jim Burden's friendship with the daughter of a Czech immigrant family. Recently orphaned, he moves west to Nebraska to live with his grandparents. Riding the same train is the Shimerda family, who are also on their way to settle in the area. The Shimerdas have a difficult life as pioneers: living in a sod house, working the fields, and running out of food in the winter. Jim soon becomes smitten with Antonia, the eldest daughter, as they grow up and explore the landscape around them together. Through his eyes, we see both how she shapes the land around her and is shaped by the rigors of poverty. Similarly to Jim, Willa Cather spent her early years in Nebraska but most of her adult life in Eastern cities. She pays homage to her homeland with her Prairie Trilogy of novels: O Pioneers!, The Song of the Lark, and My Antonia. They are tinged with her characteristic straightforward language, reverence for nature, and nostalgia, even as she acknowledges the hardships of the past. Published in 1918 to great enthusiasm, My Antonia is considered one of Cather's finest works and a defining point in her

identity as a writer. This book is part of the Standard Ebooks project, which produces free public domain ebooks.

Flightsend is Charlie's new home, whether she likes it or not. Her mother sees it as an end to all that's gone so tragically wrong, but for Charlie it's the end of her family, not to mention her social life. They had been a proper family. Mum, Sean and Charlie, with a new baby sister on the way. But the baby died before she was born and everything changed. Gradually, her mother pushed Sean away, before resigning from her job and selling the house, forcing Sean to find somewhere else to live. Although Charlie believes her mother is making a terrible mistake, she can only offer support - but who will support Charlie, with Sean cut out of their lives? She's certain that the move to a ramshackle cottage, miles from anywhere, can only make things worse. She couldn't be more wrong. This first summer at Flightsend proves to be a turning point for them both. For Charlie's mum there's a new business and the fresh start that she knew she needed. And for Charlie there's a new job, new friends, a newly discovered talent for art and new feelings for two very different men. It's a summer of beginnings, not ends; a summer that Charlie will never forget.

A Publishers Weekly best book of 1995! Dr. Michael Guillen, known to millions as the science editor of ABC's Good Morning America, tells the fascinating stories behind five mathematical equations. As a regular contributor to daytime's most popular morning news show and an instructor at Harvard University, Dr. Michael Guillen has earned the respect of millions as a clear and entertaining guide to the exhilarating world of science and mathematics. Now Dr. Guillen unravels the equations that have led to the inventions and events that characterize the modern world, one of which -- Albert Einstein's famous energy equation, $E=mc^2$ -- enabled the creation of the nuclear bomb. Also revealed are the mathematical foundations for the moon landing, airplane travel, the electric generator -- and even life itself. Praised by Publishers Weekly as "a wholly accessible, beautifully written exploration of the potent mathematical imagination," and named a Best Nonfiction Book of 1995, the stories behind The Five Equations That Changed the World, as told by Dr. Guillen, are not only chronicles of science, but also gripping dramas of jealousy, fame, war, and discovery.

Do men and women laugh at the same things? Is laughter contagious? Has anyone ever really died laughing? Is laughing good for your health? Drawing upon ten years of research into this most common-yet complex and often puzzling-human phenomenon, Dr. Robert Provine, the world's leading scientific expert on laughter, investigates such aspects of his subject as its evolution, its role in social relationships, its contagiousness, its neural mechanisms, and its health benefits. This is an erudite, wide-ranging, witty, and long-overdue exploration of a frequently surprising subject.
