Todd and Bohart, who together have a total of sixty years of experience teaching clinical psychology courses, offer a clear, understandable view of how each theoretical perspective regards the person, the person's problems, and how to help the person change. The fourth edition retains the psychotherapy and history components from previous editions and addresses current and future trends in professional psychology. New or updated topics include: assessment; professional, legal, and ethical issues; brief therapy; computerized treatment programs; Internet testing; online therapy; treatment guidelines and manuals and the controversies associated with them; radical behavior therapies; cultural and gender issues; expanding roles for psychologists in neuropsychology and primary health care; managed care; and developments in psychotherapy research and psychotherapy integration. Developmental Psychology: From infancy to adulthood, 3rd edition, continues to bring together a balanced focus on Australian and international research contributions in developmental psychology. Students and lecturers alike will find this text addresses the issues of lifespan development in a rigorous and challenging way using a thematic rather than chronological approach.

International and national research on graduate attributes consistently identifies critical thinking as one of the most important skills for psychology students. The inclusion of Critical Thinking for Group Discussion at the end of each chapter is designed to encourage students in the development of this key skill. These questions help students develop the ability to engage in discussions on truth and validity and evaluate the relative importance of ideas and data. Students learn by doing, and this is encouraged through interactive features such as Stop and Review, Research Focus Boxes, and Practical Exercises which engage them in group discussion and challenge them to delve into complex and cross-domain analysis of lifespan development. Concept maps at the start of each chapter provide students with a visual snapshot of the chapter content.
