Space-Time Adaptive Processing: Application to Radar | GTPE
Adaptive Space Time Processing ForSpace-time adaptive processing (STAP) is a signal processing technique most commonly used in radar systems. It involves adaptive array processing algorithms to aid in target detection. Radar signal processing benefits from STAP in areas where interference is a problem (i.e. ground clutter, jamming, etc.).Through careful application of STAP, it is possible to achieve order-of-magnitude ...Space-time adaptive processing - WikipediaRadar Basics – Part 4: Space-time adaptive processing. By Michael Parker, Altera Corporation 06.28.2011 0. Share Post. Share on Facebook. Share on Twitter. In Part 2 of this series on Radar Basics, the use of Doppler processing was discussed as a key method to discriminate both in distance and velocity.Radar Basics – Part 4: Space-time adaptive processing | EE ...Michael J. Arena, Ph.D. is an author of the groundbreaking research on Adaptive Space, which won the 2017 Walker Prize from People + Strategy. He is a leading expert in organizational network analysis and his work has been cited in the Wall Street Journal, Chief Executive Magazine, Harvard Business Review, Business Insider and Sloan Management Review.Agile Organization | Networks | Social ... - Adaptive SpaceSpace-time adaptive processing (STAP) refers to the simultaneous processing of the signals from an array antenna during a multiple pulse coherent waveform. STAP can provide improved detection of targets obscured by mainlobe clutter, sidelobe clutter, and jamming. This paper provides an overview of partially adaptive STAP approaches.Space-time adaptive processing for airborne radar - IET ...This example presented a brief introduction to space-time adaptive processing and illustrated how to use different STAP algorithms, namely, SMI, DPCA, and ADPCA, to suppress clutter and jammer interference in the received pulses. Reference [1] J. R. Guerci, Space-Time Adaptive Processing for Radar, Artech House, 2003 ×Introduction to Space-Time Adaptive Processing - MATLAB ...A space-time adaptive processing (STAP) method is described which uses only the mainbeam or sum (Σ) and difference (Δ) channels of a airborne radar for adaptive suppression of clutter in the ...(PDF) A space-time adaptive processing approach for ...range and time-range adaptive processing are proposed in [15] and [16] respectively and show enhanced performance over sequential processing. Consequently, it’s natural to think of a joint space-time-range adaptive processing (STRAP, or joint angle-Doppler-

range processing) for MIMO radar.
