### WILLIAMSON RIYA

#### SCIENCE AND CIVILISATION IN CHINA: VOLUME 6, BIOLOGY AND BIOLOGICAL TECHNOLOGY, PART 3, AGRO-INDUSTRIES AND FORESTRY

Ediciones Universidad de Salamanca  
 Saving the world's flora and fauna, especially high-profile examples such as chimpanzees, whales and the tropical rain forests, is big business. Individuals and companies channel their resources to the preservation of nature through various ways, one of which is the funding of environmental non-governmental organizations (ENGOS) and community-based organizations (CBOs). This book is the first to comprehensively address this issue and focus on a dominant theme in environmental philanthropy, the links between ENGOS and CBOs and their sponsors, especially the private sector. It has been argued that donor support is based on recipient's perceived expertise and needs, with no favouritism of flagship environmental organizations as recipients of donor funds. A counterview holds that the private sector prefers to fund mainstream ENGOS for environmental research and policy reforms congenial to industrial capital. The authors show that the debate about these arguments, together with the empirical evidence on which they are based, may shed light on certain aspects of the nature of environmental philanthropy. The book evaluates practical examples of environmental philanthropy from Africa and elsewhere against philosophical questions about the material and

geographical expressions of philanthropy, and the North-South connections among philanthropists and ENGOS and CBOs.

#### PUERTO RICO ILUSTRADO

Vernon Press

This edited volume provides state of the art research on developing areas of Spanish in contact with other languages. This manuscript is unique in its broad yet coherent approach to the study of Spanish in bilingual contexts by investigating current issues in the field through well-designed research and innovative analyses. In addition, this book concludes with research on how languages in contact are reflected in individuals in educational settings as well as insights on how to teach bilinguals raised in contact with English and Spanish. This manuscript is divided into three major themes that focus on the overall issues of Spanish in bilingual contexts: 1. The first section, titled "Language and Identity," is composed of four chapters that focus on the connection between language and identity in unique settings. 2. The second section of the manuscript is titled "Language and Dialectal Contact" and is composed of six chapters that analyze the dialectal and linguistic changes in languages in contact in a variety of settings. 3. The final section is titled "Language in Educational Settings" and consists of four chapters with a focus on heritage speakers and second language students of Spanish in different classroom settings as well as abroad. This volume contributes original research in these areas in a way so as to fill valuable gaps in the current knowledge in the field especially in the innovative ways of approaching areas such as teaching heritage learners, understanding diachronic and synchronic dialectal and linguistic changes as well as innovations in

language use, and how language contributes to the formation of identity.

*Neuman and Baretti's Dictionary of the Spanish and English Languages; Wherein the Words are Correctly Explained, Agreeably Tho Their Different Meanings, and a Great Variety of Terms, Relating to the Arts, Sciences, Manufactures, Merchandise, Navigation, and Trade, Elucidated* Pearson Educación

This book presents new developments and advances in the theory, applications, and design methods of computational intelligence, integrated in various areas of project management and BIM environments. The chapters of the book span different soft computing techniques, such as: linguistic data summarization, fuzzy systems, evolutionary algorithms, estimation distribution algorithms, computing with words, augmented reality, and hybrid intelligence systems. In addition, different applications of the neutrosophic theory are presented for the treatment of uncertainty and indeterminacy in decision-making processes. Several chapters of the book constitute systematic reviews, useful for future investigations in the following topics: linguistic summarization of data, augmented reality, and the development of BIM technologies. It is a particularly interesting book for engineers, researchers, specialists, teachers, and students related to project management and the development of BIM technologies.

### SPANISH IN CONTACT

Zeta Books

Contains two separate works. The first, by Christian Daniels, is a comprehensive history of Chinese sugar cane technology from ancient times to the early twentieth century. Dr Daniels includes an account of the contribution of Chinese techniques and machinery to the development of world sugar technology in the pre-modern period, devoting special attention to the transfer of this technology to the countries of South-East and East Asia in the period after the sixteenth century. The second, by Nicholas K. Menzies, is a history of forestry in China. A final section compares China's history of deforestation with the cases of Europe and Japan.

Contenido revisado que ofrece una amplia actualización incluyendo nuevos datos basados en la evidencia y referentes a técnicas de valoración, sistemas de clasificación, diagnóstico diferencial, opciones de tratamiento y protocolos de rehabilitación. Guía práctica que proporciona información de gran utilidad en el momento del examen del paciente, para el diagnóstico diferencial, el tratamiento y la rehabilitación propiamente dicha. Nuevos capítulos sobre ligamento femoral medio, impacto en el hombro, fractura del pectoral mayor, síndrome torácico, fracturas humerales, fracturas de rodilla y pie, reconstrucción del ligamento patelofemoral medio, artritis de

cadavera y pubalgia atlética entre otras cuestiones. Esta nueva edición incluye videos que muestran procedimientos de rehabilitación de condiciones ortopédicas frecuentes así como los ejercicios de rehabilitación que se recomiendan de manera habitual. Los protocolos de tratamiento y rehabilitación se presentan paso a paso, en formato de algoritmos, y en cada una de las fases de la asistencia (progresión basada en criterios que refleja las mejores prácticas actuales) Se incluye un acceso a Expert Consult en el que se incluye la versión eBook de la obra que permite realizar búsquedas en todo el texto, acceso a los vídeos y a las referencias bibliográficas.

This book presents the proceedings of the 2nd International Congress on Innovation and Research—A Driving Force for Socio-Econo-Technological Development (CI3 2021). CI3 was held on September 1-3, 2021. It was organized by the Instituto Tecnológico Superior Rumiñahui and GDEON, in co-organization with Higher Institutes: Bolivariano de Tecnología, Central Técnico, Espíritu Santo, José Chiriboga Grijalva, ISMAC, Policía Nacional del Ecuador Vida Nueva; and sponsored by the Universidad Nacional Mayor de San Marcos (Peru), Universidade Federal de Goiás (Brazil) and City University of New York (United States). CI3 aims to disseminate the research project results that are being carried out in different Higher Education Institutions, research centers, and the business sector.

Since the publication of the still very valuable Biblioteca histórica de la filología by Cipriano Muñoz y Manzano, conde de la Viñaza (Madrid, 1893), our knowledge of the history of the study of the Spanish language has grown considerably, and most manuscript and secondary sources had never been tapped before Hans-Josef Niederehe of the University of Trier courageously undertook the task to bring together any available bibliographical information together with much more recent research findings, scattered in libraries, journals and other places. The resulting Bibliografía cronológica de la lingüística, la gramática y la lexicografía del español: Desde los principios hasta el año 1600 (BICRES) began appearing in 1994. BICRES I covered the period from the early beginnings to 1600), followed by BICRES II (1601-1700), BICRES III (1701-1800), and together with Miguel Ángel Esparza Torres of Madrid there followed BICRES IV (1801 to 1860). Now, the fifth volume, has become available, covering the years from 1861 to 1899. Access to the bibliographical information of altogether 5,272 titles is facilitated by several detailed indexes, such as a short title index, a listing of printers, publishers and places of production, and an author index. More than twenty years of research in the major libraries of Spain and other European countries have gone into this unique work — relative sources of the Americas have also been covered — making it exhaustive source for any serious scholar of any possible aspect of the

Spanish language.

Springer Nature

The immediate goal of this Special Issue was the characterization of land uses and occupations (LULC) in watersheds and the assessment of impacts caused by anthropogenic activities. The goal was immediate because the ultimate purpose was to help bring disturbed watersheds to a better condition or a utopian sustainable status. The steps followed to attain this objective included publishing studies on the understanding of factors and variables that control hydrology and water quality changes in response to human activities. Following this first step, the Special Issue selected work that described adaption measures capable of improving the watershed condition (water availability and quality), namely LULC conversions (e.g., monocultures into agro-forestry systems). Concerning the LULC measures, however, efficacy was questioned unless supported by public programs that force consumers to participate in concomitant costs, because conversions may be viewed as an environmental service.

Elsevier

This volume, covering a range of topics such as Spanish as a heritage language in the United States, policy issues, pragmatics and language contact, sociolinguistic variation and contact, and Bozal (Creole) Spanish, will serve the interests of linguists, educators, and policy makers alike. It provides cutting edge research on varieties of Spanish spoken by children, teenagers, and adults in places as diverse as Chicago, New York, New Mexico, and Houston; Valencia and Galicia; the Andean highlands; and the border between Haiti and the Dominican Republic. The emphasis is on spoken Spanish, although researchers also investigate code-switching in the lyrics of bachata songs and the presence of creole in Cuban and Brazilian literature. This collection will be of interest wherever Spanish is spoken.

El presente volumen aborda el análisis de los procesos electorales de ámbito presidencial y legislativo celebrados en América Latina en el bienio 2014-2105. Se trata de elecciones celebradas en once países cuyo estudio se desarrolla en igual número de capítulos. Se cubren comicios simultáneos a ambas instancias en Argentina, Bolivia, Brasil, Costa Rica, Guatemala, Panamá y Uruguay. En El Salvador y en Colombia, aunque se celebraron en tiempos distintos, ambos tipos de comicios se consideran en el mismo capítulo; allí, las presidenciales precedieron a las legislativas con un año de diferencia en el primer país y las legislativas antecedieron por tres meses a las presidenciales en el segundo. Se recogen también en capítulos independientes las elecciones únicamente legislativas de México y Venezuela. Si bien el criterio temporal siempre puede calificarse de caprichoso en este caso sigue la preocupación iniciada hace ocho años de dar cumplida cuenta del acontecer electoral en la región, en el ámbito de los dos poderes representativos del Estado por excelencia. En efecto, este volumen da continuidad a anteriores trabajos. El bienio aquí analizado da cabida a un nivel promedio de elecciones presidenciales, si se tiene en cuenta el acumulado en la región desde hace 30 años, por lo cual es representativo del quehacer político latinoamericano. Así, la Tabla 1 recoge las 117 elecciones presidenciales que se han llevado a cabo en la región entre 19861 y 2015 cuyo resultado no fue cuestionado; su media es de cuatro procesos electorales por año y aquí el número de elecciones que se recogen son nueve.
