Linguistic Anthropology: A Reader is a comprehensive collection of the best work that has been published in this exciting and growing area of anthropology, and is organized to provide a guide to key issues in the study of language as a cultural resource and speaking as a cultural practice. Revised and updated, this second edition contains eight new articles on key subjects, including speech communities, the power and performance of language, and narratives. Selections are both historically oriented and thematically coherent, and are accessibly grouped

according to four major themes: speech community and communicative competence; the performance of language; language socialization and literacy practices; and the power of language. An extensive introduction provides an original perspective on the development of the field and highlights its most compelling issues. Each section includes a brief introductory statement, sets of guiding questions, and list of recommended readings on the main topics.

Primary-grade teachers face an important challenge: teaching children how to read while enabling them to build good habits so they fall in love with

reading. Many teachers find the independent reading workshop to be the component of reading instruction that meets this challenge because it makes it possible to teach the reading skills and strategies children need and guides them toward independence, intention, and joy as readers. In *Growing Readers*, Kathy Collins helps teachers plan for independent reading workshops in their own classrooms. She describes the structure of the independent reading workshop and other components of a balanced literacy program that work together to ensure young students grow into strong, well-rounded readers. Kathy outlines a sequence of possible units of study for a yearlong curriculum. Chapters are devoted to the individual units of study and include a sample

curriculum as well as examples of mini-lessons and reading conferences. There are also four “Getting Ready” sections that suggest some behind-the-scenes work teachers can do to prepare for the units. Topics explored in these units include: print and comprehension strategies; reading in genres such as poetry and nonfiction; connecting in-school reading and out-of-school reading; developing the strategies and habits of lifelong readers. A series of planning sheets and management tips are presented throughout to help ensure smooth implementation. We want our students to learn to read, and we want them to love to read. To do this we need to lay a foundation on which children build rich and purposeful reading lives that extend beyond the school day. The

ideas found in Growing Readers create the kind of primary classrooms where that happens.
