A detailed look at the transformative impact of peace in an elementary classroom. Giving a history of Dr. Maria Montessori's ideas about peace and case examples of how peace can help students to be successful, this book which was the American Montessori Society's 2007 Thesis award winner opens a window into the possibility that peace may be the missing link we have been searching for to help increase student success in the classroom.

I Am a Peaceful Goldfish New Harbinger Publications

Montessori: A Modern Approach has been called the single best book for anyone -- educator, childcare professional, and especially parent -- seeking answers to the questions: What is the Montessori method? Are its revolutionary ideas about early childhood education relevant to today's world? And most important, especially for today's dual-career couples. Is a Montessori education right for my child? Paula Polk Lillard writes both as a trained educators and as a concerned parent -- she has many years as a public school teacher, but it was her enthusiasm for the education her own child experienced in a Montessori school that led her to become a leading voice in the Montessori movement in this country. Her book offers the clearest and most concise statement of the Montessori method of child development and education available today.

Teaching kids stress management skills early in life will help them to grow into happy and healthy adults. And if you work with children or adolescents, you know that kids today need these skills more than ever. The pressures they face in the classroom, on the playground, in their extracurricular activities, and at home can sometimes be overwhelming. So how can you help lay the groundwork for their success? A Still Quiet Place presents an eight-week mindfulness-based stress reduction (MBSR) program that therapists, teachers, and other professionals can use to help children and adolescents manage stress and anxiety in their lives, and develop their natural capacities for emotional fluency, respectful communication, and compassionate action. The program detailed in this book is based on author Amy Saltzman's original curriculum, which has helped countless children and adolescents achieve significant improvements in attention and reduced anxiety. One of the easiest ways to find the still quiet place within is to practice mindfulness--paying attention to your life experience here and now with kindness and curiosity. The easy-to-implement mindfulness practices in this guide are designed to help increase children and adolescents' attention, learning, resiliency, and compassion by showing them how to experience the natural quietness that can be found within. The still quiet place is a place of peace and happiness that is alive inside all of us, and you can find it just by closing your eyes and breathing. For more information, visit www.stillquietplace.com.

From Infant to Toddler--Laying the Foundation for Raising a Capable, Confident Child Macmillan

This book is intended to follow Education for a New World and to help teachers to envisage the child's needs after the age of six. We claim that the average boy or girl of twelve years who has been educated till then at one of our schools knows at least as much as the finished High School product of several years' seniority, and the achievement has been at no cost of pain or distortion to body or mind. Rather are our pupils equipped in their whole being for the adventure of life, accustomed to the free exercise of will and judgment, illuminated by imagination and enthusiasm. Only such pupils can exercise rightly the duties of citizens in a civilised commonwealth. The first four chapters are mainly psychological, showing the changed personality with which the teacher has to deal at six years of age, and the need for a corresponding change of approach. The secret of success is found to lie in the right use of imagination in awakening interest, and the stimulation of seeds of interest already sown by attractive literary and pictorial material, but all correlated to a central idea, of greatly ennobling inspiration--the Cosmic Plan, in which all, consciously or unconsciously, serve the great Purpose of Life. It is shown how the conception of evolution has been modified of late through geological and biological discoveries, so that self-perfection now has to yield precedence to service among the primary natural urges. The next eight chapters show how the Cosmic Plan can be presented to the child, as a thrilling tale of the earth we live in, its many changes through slow ages when water was Nature's chief toiler for accomplishment of her purposes, how land and sea fought for supremacy, and how equilibrium of elements was achieved, that Life might appear on the stage to play its part in the great drama. Illustrated as it must be by fascinating, charts and diagrams, the creation of earth as we now know it unfolds before the child's

imagination, and always with emphasis on the function each agent has to perform in Nature's household, whether consciously or unconsciously, failure in this alone leading to extinction. So the talc proceeds till Palaeolithic Man appears, most significantly traced by the tools he used on his environment rather than by physical remains of so slight a creature. The new element of mind is brought to creation by man, and from that time the children are helped to see the great acceleration that has taken place in evolution. They learn to reverence the earliest pioneers, who toiled for purposes unknown to them but now to be recognised. Nomadic men and settlers alike contributed to build up early communities, and by interchanges of war and peace to share and spread social amenities. From chapter thirteen brief descriptions are given of some of the earliest civilizations, particularly with a view to their impacts on each other, showing human society as slowly organising itself towards unity, just as, in the individual human being, organs are built around separate centres of interest, to be later connected by the blood-circulatory system and the nerves, into an integrated human organism. So the child is led, by review of some of the most thrilling epochs of world-history, to see that so far humanity has been in an embryonic stage, and that it is just now emerging into true birth, able to consciously realise its true unity and function. The last chapters go back to the psychological point of view, urging on educators the supreme importance, to the nation and to the world, of the tasks imposed on them. Not in the service of any political or social creed should the teacher work, but in the service of the complete human being, able to exercise in freedom a self-disciplined will and judgment, unperturbed by prejudice and undistorted by fear.

Children of the Universe Harmony

The desire for peace is universal. Peace education can provide children with the tools necessary to deal with change and adversity throughout their lives. In today's fast-paced, technology-rich world, it can be tempting to join the race and work to an end result at breakneck speeds. However, without slowing down and showing children what the world has to offer, children will not know the beauty the world holds, that which is worth protecting, nor will they be inclined to see the beauty and spirit of those around them. Peace education can be a lesson in the art of simplicity. It can also be a lesson in turning inward to find calm in the midst of chaos. Peace education, when presented in a well thought-out manner, can inspire children to be the future peacemakers of our world and ultimately lead this future generation toward the development of a peaceful planet. Humankind has been working for and promoting peace since the beginning of history, and during this time many have agreed that the most effective and promising way to promote peace in the world is to begin with a child. In Pathways to Peace, author Kimberly Paquette presents a peace-based curriculum to provide children with the tools to construct and build a peaceful tomorrow through exposure to peaceful symbols, practices, and language. Combining Gardner's Multiple Intelligence Theory and Montessori education, Pathways to Peace promotes peace and its practice in the classroom. Geared for three- to six-year-old students, this guide includes both theory and a curriculum where teachers can incorporate peace in all aspects of the classroom. The guide encompasses lessons for each of the multiple intelligences and can be adapted for use in schools, religious education programs, after-school programs, summer camps, and other areas. Pathways to Peace presents a curriculum to allow peace to manifest itself in the hearts of children, who are the earth's salvation. The mission of peace education is to show children the path that would lead the world toward true peace.

Education and Peace Macmillan

Wouldn't it be great if your child could exercise, have fun, and build concentration skills all at the same time? In 2006, the Little Flower Yoga program was developed by teacher and certified yoga instructor Jennifer Cohen Harper, when her successful use of yoga in her kindergarten classroom led to requests by other students, teachers, and administrators for yoga programs of their own. Harper slowly began to teach more and more yoga classes, and eventually recruited other yoga teachers with education backgrounds to continue growing what had become a flourishing program. Little Flower Yoga for Kids offers this fun and unique program combining yoga and mindfulness in an easy-to-read format. Written specifically for parents and kids, the book aims at teaching children to pay attention, increase focus, and balance their emotions--all while building physical strength and flexibility. Based on a growing body of evidence that yoga and mindfulness practices can help children develop focus and concentration, the simple yoga exercises in this book can easily be integrated into their child's daily routine, ultimately improving health, behavior, and even school achievement. The book details the five main components of the program: connect, breath, move, focus, and relax. Drawing on these components, Harper shares practical activities that parents can use with their children both on a daily basis and as applied to particularly challenging issues. And while this book is targeted to parents, teachers may also find it extremely useful in helping students achieve better attention and focus. For more information about this innovative program, visit www.littleflower yoga.com.

Montessori Today National Geographic Books

The author, with more than 30 years of Montessori education experience, shares classroom-tested activities to help foster the love light in every child. This book provides practical and imaginative ways to help children recognize and experience their love lights and become responsible global citizens. The peace-education activities help to nurture skills such as effective communication, conflict resolution, self-confidence, cultural awareness, and more.

Maria Montessori, Education, and Children's Rights Abc-Clio Incorporated

The celebrated Positive Discipline brand of parenting books presents the revised and updated third edition of their readable and practical guide to communicating boundaries to very young children and solving early discipline problems to set children up for success. Over the years millions of parents have used the amazingly effective strategies of Positive Discipline to raise happy, well-behaved, and successful children. Research has shown that the first three years in a child's life are a critical moment in their development, and that behavior patterns instilled during that time can have profound implications for the rest of a child's life. Hundreds of thousands of parents have already used the advice in Positive Discipline: The First Three Years to help set effective boundaries, forge strong foundations for healthy communication, and lay the groundwork for happy and respectful relationships with their young children. Now this classic title has been revised and updated to reflect the latest neuroscientific research and developments in positive discipline parenting techniques.

Peace Education Bloomsbury Publishing

The Italian educator and physician Maria Montessori is best known for the teaching method that bears her name, but historian Erica Moretti reframes Montessori's work, showing that pacifism was the foundation of her pioneering efforts in psychiatry and pedagogy.

THE DISCOVERY OF THE CHILD

Ravenio Books

Juxtaposes photographs from around the world with a simple, reflective message about our responsibilities for finding and keeping peace on the planet. By the author of A Cool Drink of Water.

A Comprehensive Approach to Education from Birth to Adulthood Castlebridge Books

John R. Snyder describes in powerful, deep, and lovely language the philosophy, theory, and practice of his Montessori years. John has developed his work with children and with their parents, with guides and with support staff, and with mentors, consultants, and administrators both at Austin Montessori School and beyond. Through his collected writings--writings for this school, as well as for conferences and professional publications--not only Montessorians but all who care about the lives of children can find a source of information, inspiration, and guidance.

and post-conflict societies. Contributing authors address how educators and learners can make meaning of international peace education efforts, how various forms of peace and violence interact in and around schools, and how the field of peace education has evolved and grown over the past four decades.

In Non-Sectarian Classrooms Schocken

"Highly recommended for educators, parents, and moderate feminists who seek inspiration from one of the most accomplished women of this or any other age."—Publishers Weekly The definitive biography of Maria Montessori—physician, feminist, social reformer, educator, and one of the most admired, influential, and controversial women of the twentieth century. Maria Montessori effected a worldwide revolution in the classroom. She developed a new method of educating the young and inspired a movement that carried it into every corner of the world. This is the story of the woman behind the public figure—her accomplishments, her ideas, and her passions. Montessori broke the mold imposed on women in the nineteenth century and forged a new one, first for herself and eventually for those who came after her. Against formidable odds she became the first woman to graduate from the medical school of the University of Rome and then devoted herself to the condition of children considered uneducable at the time. She developed a teaching method that enabled them to do as well as normal children, a method which then led her to found a new kind of school—the Casa dei Bambini, or House of Children—which gained her worldwide fame and still pervades classrooms wherever young children learn. This biography is not only the story of a groundbreaking feminist but a vital chapter in the history of education.

Essays on Montessori Education Diversion Books

"The Peace Table is based upon Montessori conflict resolution practices introduced and reinforced in the Montessori Primary prepared environment for three through six year old children" -- Introduction, p. 9.

Cosmic Education, detailed here, can introduce elementary-age children to the universal values that can save us from wars and planetary destruction...My purpose in publishing (this book) is to bring home to teachers the importance of helping students to see themselves, not as self-engrossed individuals, but as Children of the Universe with all that this image entails. -Aline D. Wolf

A Biography Legare Street Press

For fans of Susan Verde's I Am Peace and Deborah Underwood's The Quiet Book, this gentle story introduces kids ages 2-6 to mindfulness and breath awareness. I Am a Peaceful Goldfish teaches kids and families about playful breathing techniques that we can use to overcome our anxiety and feel calm and grounded. When we are overcome with emotions, our breath—and a bit of imagination—can bring us back to a peaceful place. In this simple story, two children learn how to settle their feelings with imaginative breathing techniques, pretending they are elephants, flowers, even dragons! This charming book teaches even the youngest readers fun ways to be mindful, relieve anxiety, and regain control over their bodies and actions—an essential and easy-to-learn life skill.
