You probably know already that Erlang is a programming language—and as such it is pretty interesting in itself—but our focus here will be on the practical and the “in action”, and for that we also need the OTP framework. Erlang and OTP in Action.pdf - Synrc - Yumpu OTP is a general behavior framework for building massive, scalable, fault tolerant, distributed Erlang applications. It is a very nice and refined piece of work. By the time you finish these first five chapters you will know Erlang and the Erlang concurrent programming paradigm. This is a fast

track to specialized knowledge.
