"A thorough and informative guide . . . with as many references to websites for Northern Irish genealogy as for the Republic of Ireland." —Who Do You Think You Are Magazine Ireland has experienced considerably more tragedy when it comes to the preservation of resources for family historians than its close neighbor Britain. Many of the nation's primary records were lost during the civil war in 1922 and through other equally tragic means. But in this new book Chris Paton, the Northern-Irish-born author of the bestselling *Tracing Your Family History on the Internet*, shows that not only has a great deal of information survived, it is also increasingly being made available online. Thanks to the pioneering efforts of the Public Record Office of Northern Ireland, the National Archives of Ireland, organizations such as FindmyPast Ireland, Ancestry.co.uk and RootsIreland, and the massive volunteer genealogical community, more and more of Ireland's historical resources are accessible from afar. As well as exploring the various categories of records that the family historian can turn to, Chris Paton illustrates their use with fascinating case studies. He fully explores the online records available from both the north and the south from the earliest times to the present day. Many overseas collections are also included, and he looks at social networking in an Irish context where many exciting projects are currently underway. His book is an essential introduction and source of reference for anyone who is keen to trace their Irish roots. "Chris Paton has produced this much-needed book for researchers tracing Irish roots, pulling together all the current online resources and expert advice into one handy guide." —Family Tree Magazine

This book documents the third in a series of annual symposia on family issues--the National Symposium on International Migration and Family Change: The Experience of U.S. Immigrants--held at Pennsylvania State University. Although most existing literature on migration focuses solely on the origin, numbers, and economic success of migrants, this book examines how migration affects family relations and child development. By exploring the experiences of immigrant families, particularly as they relate to assimilation and adaptation processes, the text provides information

that is central to a better understanding of the migrant experience and its affect on family outcomes. Policymakers and academics alike will take interest in the questions this book addresses: \* Does the fact that migrant offspring get involved in U.S. culture more quickly than their parents jeopardize the parents' effectiveness in preventing the development of antisocial behavior? \* How does the change in culture and language affect the cognitive development of children and youth? \* Does exposure to patterns of family organizations, so prevalent in the United States (cohabitation, divorce, nonmarital childbearing), decrease the stability of immigrant families? \* Does the poverty facing many immigrant families lead to harsher and less supportive child-rearing practices? \* What familial and extra-familial conditions promote "resilience" in immigrant parents and their children? \* Does discrimination, coupled with the need for rapid adaption, create stress that erodes marital quality and the parent-child bond in immigrant families? \* What policies enhance or impede immigrant family links to U.S. institutions?

"That certain groups do much better in America than others—as measured by income, occupational status, test scores, and so on—is difficult to talk about. In large part this is because the topic feels racially charged. The irony is that the facts actually debunk racial stereotypes. There are black and Hispanic subgroups in the United States far outperforming many white and Asian subgroups. Moreover, there's a demonstrable arc to group success—in immigrant groups, it typically dissipates by the third generation—puncturing the notion of innate group differences and undermining the whole concept of 'model minorities.'" Mormons have recently risen to astonishing business success. Cubans in Miami climbed from poverty to prosperity in a generation. Nigerians earn doctorates at stunningly high rates. Indian and Chinese Americans have much higher incomes than other Americans; Jews may have the highest of all. Why do some groups rise? Drawing on groundbreaking original research and startling statistics, *The Triple Package* uncovers the secret to their success. A superiority complex, insecurity, impulse control—these are the elements of the Triple Package, the rare and potent cultural constellation that drives disproportionate group success. *The Triple Package*

is open to anyone. America itself was once a Triple Package culture. It's been losing that edge for a long time now. Even as headlines proclaim the death of upward mobility in America, the truth is that the old-fashioned American Dream is very much alive—but some groups have a cultural edge, which enables them to take advantage of opportunity far more than others. • Americans are taught that everyone is equal, that no group is superior to another. But remarkably, all of America's most successful groups believe (even if they don't say so aloud) that they're exceptional, chosen, superior in some way. • Americans are taught that self-esteem—feeling good about yourself—is the key to a successful life. But in all of America's most successful groups, people tend to feel insecure, inadequate, that they have to prove themselves. • America today spreads a message of immediate gratification, living for the moment. But all of America's most successful groups cultivate heightened discipline and impulse control. But the Triple Package has a dark underside too. Each of its elements carries distinctive pathologies; when taken to an extreme, they can have truly toxic effects. Should people strive for the Triple Package? Should America? Ultimately, the authors conclude that the Triple Package is a ladder that should be climbed and then kicked away, drawing on its power but breaking free from its constraints. Provocative and profound, *The Triple Package* will transform the way we think about success and achievement.

When Rebecca Monroe—married to Alistair, a scientist who doesn't believe in fate, but rather genetic disposition—discovers that she is pregnant, she begins to question what makes us who we are and whether her own precarious family history will play a role in her future. For Rebecca, the wry and observant narrator of *The Family Tree*, simple things said over breakfast take on greater meaning: a home-improvement project foreshadows darker things to come; the color of one's eyes, the slope of a forehead are all missing pieces to the truth behind the family tree. At once nostalgic and refreshingly original, *The Family Tree* is a sophisticated story of one woman and the generations of women who came before her and whose legacy shaped her life and its emotional landscape.

It is easy to say "I have no prejudices", "I'm not racist, so it has nothing to do with me", "I didn't invite those refugees". It is hard to say "I may not be to blame for what happened in the past but I want to take responsibility for making sure it doesn't continue in the future". The Education Pack "all different - all equal" was originally produced in 1995 as an educational resource for the European youth campaign against racism, antisemitism, xenophobia and intolerance. Soon after its publication it became a reference work for those involved in intercultural education and training with young people across Europe and beyond. Translated into many languages, it remains today one of the most successful and most sought after publications of the Council of Europe. The usefulness of the pack stems from the variety and creativity of the methodologies proposed. More than twenty years after the "all different - all equal" campaign, the role plays, simulation exercises, case studies and cooperative group work that it proposes remain an inspiration to many youth workers, trainers, teachers and other people actively involved in intercultural education. European societies continue to suffer from a growth of racist hostility and intolerance towards minorities and foreigners; the necessity for intercultural youth work remains undiminished and the relevance of this pack remains unquestionable. Little bit has been changed in this new edition of the pack, apart from an updating of references. Most changes are visible and usable only in the online version, which offers relevant links with other resources for human rights education which continue the legacy of the campaign: equality in dignity and rights, respect for broader appreciation of diversity.

A genealogist's practical guide to researching family history online while avoiding inaccurate, incomplete, or misleading information. The internet has revolutionized family history research—every day new records and resources are placed online and new methods of sharing research and communicating become available. Never before has it been so easy to research family history and to gain a better understanding of who we are and where we came from. But, as British genealogist Chris Paton demonstrates in this straightforward, practical guide, while the internet is an enormous asset, it is also something to be wary of. Researchers need to take a cautious approach to the information they acquire on the web. Where did the original material come from? Has it been accurately reproduced? Why was it put online? What has been left out and what is still to come? As he leads researchers through the multitude of resources that are now accessible online with an emphasis on UK and Ireland sites, Chris Paton helps to answer these questions. He shows what the internet can and cannot do—and he warns against the various traps researchers can fall into along the way.

Refugee Countdown presents the questions and dilemmas ordinary people faced in deciding whether to sponsor refugees and how to go about doing so. It's an insider's story of what actually happened, rather than an outsider's prescription of what is supposed to happen. It relates aspects of the refugee crisis and the church that challenge North American stereotypes. Blocked from bringing Syrian refugees into the United States, members of a Seattle church help a family enter Canada, instead, raising enough funds to support them for a year while they learn English and a new culture. Refugee Countdown describes the project's origin in 2016 and the evolution of a partnership with the Canadian church that became the formal refugee sponsor. It portrays the learning, waiting, and preparations over a two-year period until the family is finally cleared to leave their place of exile in Lebanon. The story is told from the perspective of the Canadian partners and ends with the family's arrival in Vancouver. The focus is on the experiences of the sponsors, not those of the Orthodox Christian refugees. Along with identifying the broad range of considerations in resettling refugees, Refugee Countdown touches on the numerous resources and support services available. It presents a fuller and more balanced framework for thinking about refugees than appears in much political discourse, and shares a warm story of developing friendships and bumps along the way. The underlying theme is that refugee sponsorship should be about more than just rescuing hurting

people, especially when resettlement is a mere drop in the bucket of the world's displaced peoples. A successful sponsorship is reciprocal, enlarging the worldviews, humanity, and skill sets of the sponsors. And from the sponsors, these benefits ripple into the broader community.

Family caregiving affects millions of Americans every day, in all walks of life. At least 17.7 million individuals in the United States are caregivers of an older adult with a health or functional limitation. The nation's family caregivers provide the lion's share of long-term care for our older adult population. They are also central to older adults' access to and receipt of health care and community-based social services. Yet the need to recognize and support caregivers is among the least appreciated challenges facing the aging U.S. population. Families Caring for an Aging America examines the prevalence and nature of family caregiving of older adults and the available evidence on the effectiveness of programs, supports, and other interventions designed to support family caregivers. This report also assesses and recommends policies to address the needs of family caregivers and to minimize the barriers that they encounter in trying to meet the needs of older adults.
