WRITINGS ON AMERICAN HISTORY

University of Georgia Press This book tackles some of the deepest problems in Berkeley's philosophy by providing a fresh interpretation of Berkeley's core ontological doctrines and their relationship to his views about self-consciousness. Berkeley, the author argues, is led to adopt a new model of self-consciousness because he rejects the basic metaphysics of many of his predecessors. This new model of self-consciousness provides the foundation for Berkeley's own ontological framework. Bettcher's interpretation provides answers to long-standing questions about Berkeley's traditionally derided views about mind, offers an elegant treatment of Berkeley's core metaphysical views more generally, and illuminates Berkeley's innovative attempt to address the important philosophical and theological issues of his day. Moreover, Bettcher shows the importance of Berkeley's philosophy of spirit to the perplexing thesis that the subject of experience is somehow mysteriously elusive. She argues that Berkeley can be seen as a transitional figure with respect to

the older philosophical concept of 'subject' (as a metaphysical supporter of properties) and the more modern philosophical concept of 'subject (as opposed to 'object'). She provides a re-reading of Hume's famous claim that when he turned reflection upon himself, he could perceive only perceptions and sheds new light on the notion of a 'subject of experience'. The book will be of substantial interest both to Berkeley scholars and to philosophers concerned with contemporary discussions of self-consciousness.

Art in a Season of Revolution University of Georgia Press

Due to his theory of 'immaterialism' and Schopenhauer's regard of him as the 'father of idealism', George Berkeley (1685-1753) is one of the most important thinkers of the Early Modern period. The Bloomsbury Companion to Berkeley is a comprehensive one volume reference guide to his life, thought and work. In twenty six original essays, a team of leading international scholars of Modern Philosophy cover all of Berkeley's writings including unpublished manuscripts and correspondence, thus providing readers with a complete and accessible source of information to the entire corpus of Berkeley's writings. The book includes extended essays on key themes in Berkeley's thought as well as sections covering Berkeley's life and times, and also his intellectual influence and legacy. *Berkeley: A Guide for the Perplexed* A&C Black

In 1713, soon after publication of the Spectator had come to an end, its place on breakfast tables of Queen Anne's London was taken by the Guardian. Richard Steele, continuing in the new paper the blend of learning, wit, and moral instruction that had proved so attractive in the Tatler and Spectator, was the editor and principal writer; in the 175 numbers of the Guardian he included 53 essays by Joseph Addison, as well as contributions by Alexander Pope, George Berkeley, and several others, some of whom doubtless transmitted their papers through the famous lion's head letterbox that Addison had erected in Button's coffeehouse. "These papers," as John C. Stephens writes in the introduction to his edition of the Guardian, "helped to form and to shape the morals and manners of countless generations in Britain and abroad." This first modern edition of the Guardian was prepared from the original printing of the papers, is fully annotated and indexed, and includes a comprehensive introduction discussing especially the authorship of the individual essays.

Georgia was the only British colony in America in which a sustained effort was made to prohibit the introduction and use of black slaves at a time when the institution of slavery was well established in the other southern colonies. In the first half of *Slavery in Colonial Georgia*, Betty Wood examines the reasons which prompted James Oglethorpe and the other British founders of the colony to originally ban slavery. In their concern for the manners and morals of white society, she says, they anticipated many of the arguments to be employed subsequently by the opponents of slavery on both sides of the Atlantic. The second half of the book examines the development of slavery in Georgia during the quarter century before the Revolution, with special attention on the experience of black slaves in late colonial Georgia.

Focusing on the rich heritage of art-making in the eighteenth century, this lushly illustrated book positions both well-known painters and unknown artisans within the framework of their economic

lives, their families, and the geographies through which they moved as they created notable careers and memorable objects. In considering both painting and decorative arts simultaneously, *Art in a Season of Revolution* departs from standard practice and resituates painters as artisans. Moreover, it gives equal play to the lives of the makers and the lives of the objects, to studying both within the interdependent social and economic webs linking local and distant populations of workers, theorists, suppliers, and patrons throughout the mercantile Atlantic. Emphasizing maritime settlements such as Salem, Newport, and Boston and viewing them within the larger framework of the Atlantic world, Margaretta Lovell considers the ways eighteenth-century New England experience was conditioned by its source cultures and markets. Colonial material culture participated in a nonsubsistence international economy, deriving ideas, pigments, and conventions from abroad, and reexporting them in the effort to enlarge market opportunities or to establish artistic reputations in distant London. Exploring these and other key aspects of the aesthetic and social dimensions of the cultural landscape, Lovell concentrates on a cluster of central issues: the relevance of aesthetic production to social hierarchies; the nature and conditions of artisan career trajectories; the role of replication, imitation, and originality in the creation and marketing of art products; and the constituent elements of individual identity for the makers, for the patrons who were their subjects, and for the creations that were their objects. *Art in a Season of Revolution* illuminates the participation of pictures, objects, and makers in their cultures. It invites historians to look at the material world as a source of evidence in their pursuit of even very abstract concerns such as the nature of virtue, the uses of identity, and the experience of time. Arguing in favor of a more complex approach to research at the nexus of aesthetic and ideological concerns, this provocative new book challenges established frameworks for understanding the production of art in British America during the tumultuous decades bracketing the Revolution.

Published in 1948, this work provides a detailed account of the constitutional history of Georgia from the Charter of 1732 to the adoption of the Constitution of 1945 and includes an analysis of the 1948 Georgia Constitution. Albert B. Saye presents the major constitutional developments in chronological order. An index allows readers to compare different aspects of Georgia's eight constitutions, such as the composition of the General Assembly, the powers of the Governor, and the jurisdiction of the Courts. Based on extensive research of original sources, *A Constitutional History of Georgia* reveals the evolution of the Georgia constitution up to 1948 as a gradual

expansion of political democracy.

As Protestantism expanded across the Atlantic, most evangelists were not Anglo-Americans but were members of the groups that missionaries were trying to convert. *Native Apostles* reveals the way Native Americans, Africans, and black slaves redefined Christianity and addressed the challenges of slavery, dispossession, and European settlement.

BY BENJAMIN RAND. THE CORRESPONDENCE OF GEORGE BERKELEY, AFTERWARDS BISHOP OF CLOYNE, AND SIR JOHN PERCIVAL, AFTERWARDS EARL OF EGMONT

Mercer University Press

In this work I have endeavoured to see Berkeley in his contemporary setting. On the principle that philosophy is ultimately about men, not about abstract problems, I have tried to see Berkeley the philosopher as an expression of Berkeley the man. When this is done, what is perennial in the philosophy may be discerned in and through what is local and temporal. Berkeley then emerges as a pioneer reformer; not so much an innovator as a renovator; one who set out to rescue philosophy from the enthusiasms of the preceding age; one who strove to seat philosophy once more on the broad human and common sense foundations laid by Plato and Aristotle. Critical studies of some of the more striking of Berkeley's epistemo logical arguments are legion. They commenced with the young Berkeley's first appearance in print, and have continued to this day. But whether they take the form of professions of support for Berkeley, or of bald refutations of Berkeley's supposed fallacies, or whether, like the contemporary "analytical" studies of Moore, Warnock, and Austin, they are subtle exposures of alleged deeply concealed logical muddles, they all tend to share one common characteristic: they select and abstract from the totality of Berkeley, and miss the robust simplicity and universality of Berkeley's intentions. It is the intentions which control the whole, and give the right perspective in which to view the various items.

Berkeley's Renovation of Philosophy CUP Archive

The first study dedicated to the relationship between Alexander Pope and George Berkeley, this book undertakes a comparative reading of their work on the visual environment, economics and providence, challenging current ideas of the relationship between poetry and philosophy in early eighteenth-century Britain. It shows how Berkeley's idea that the phenomenal world is the language of God, learnt through custom and experience, can help to explain some of Pope's conservative sceptical arguments, and also his virtuoso poetic techniques.
