A graveyard late at night wouldn't seem like the ideal place to meet someone. But for teenager Katey McCoy, that encounter with the handsome stranger with the striking blue eyes would alter her life in ways she'd never imagined. Orphaned as an infant, bounced around foster homes, labeled as a discipline problem, and now under the thumb of an abusive foster mother, Katey's been slipping deeper into depression. Who would want a girl with such an ugly face, an imperfect body, or wild hair? But Logan Keith knows the truth about Katey: she's beautiful. Her flaws are in her head. Besides, he has issues, too. And a secret that could tear apart their growing relationship. Logan is a werewolf--a loup-garou--with his own troubled past and a flaw that's considered a handicap in his world. A secret, supernatural world he soon introduces Katey to. Although Logan longs to make Katey part of his pack, it may be impossible for them to be together. In his pack's history, there's never been a female werewolf. No woman has been able to survive the transformation. Will Logan's desire give Katey the escape to a better life and the love she's always dreamed of, or will he be signing her death warrant?

If you want to learn how to program but dont know where to start, this is the right book and the right language for you. From the first page, our self-paced approach will help you build competence and confidence in your programming skills. And Python is the best language ever for learning how to program because of its simplicity and breadthtwo features that are hard to find in a single language. But this isnt just a book for beginners! Our self-paced approach also works for experienced programmers, helping you learn Python faster and better than youve ever learned a language before. By the time youre through, you will have mastered the key Python skills that are needed on the job, including those for object-oriented, database, and GUI programming. To make all of this possible, section 1 presents an 8-chapter course that will get anyone off to a great start with Python. Section 2 builds on that base by presenting the other essential skills that every Python programmer should have. Section 3 shows you how to develop object-oriented programs, a critical skillset in todays world. And section 4 shows you how to apply all of the skills that youve already learned as you build database and GUI programs for the real world.

Cristian Vega has a talent very few people know about: he's a musician. And he's quite good. The problem he faces is that he has no confidence in himself and is overly concerned about what others think of him, and this fear of rejection has turned Cristian into an introvert. The day after his nineteenth birthday, Cristian receives a call from his girlfriend who tells him that she's met someone else. Confining himself to his bedroom, Cristian has become an emotional wreck and vows to never allow himself to fall in love again. After calling his cousin in an attempt to get his mind off of his ex-girlfriend, Cristian sets in motion a chain of events that will change his life forever. And it all begins with the meeting of a girl... Emma Turner is quite sick of dating the same kind of man-tall, clean-cut and handsome-and every guy she meets seems more interested in trying to impress her than they are in learning anything about her. When Cristian Vega begins attending the same church as her, she finds herself inexplicably drawn to him. None of her friends understands her attraction to Cristian and they are sure to tell her that every chance they get. Emma's problem isn't in getting her friends to accept Cristian, her bigger issue is in getting Cristian to admit his feelings to her before the successes of being a musician tears them apart. THE PATH tells the story of overcoming one's fear of rejection in order to pursue one's dream regardless of what may come.
