In this first volume in the SCALE series, 'Open / Close', a simple yet significant part of any building - the "opening" - is illustrated in all its different aspects, from idea to implementation. As well as the different types of component-windows, doors, gates, loggias, filters-this volume deals with building structures. It is also concerned with the significance of the "opening in building design. Openings define the relationship between a building and the space outside it, helping to characterize a location. In this book, all of the elements that mediate between interior and exterior spaces are classified both in terms of construction and design. Each of them is described and dealt with in detail. All the internationally renowned projects used here as examples are both practical and generally applicable. The projects have not been chosen for their homogeneous architectural language, but for the high quality of their architecture.

The Samsung Galaxy S10 is set to be revealed on February 20. This is based on reports about any new features, the specs, the number of variants of the device, and hardware design upgrades. According to reports, there will be four variants of the S10; Galaxy S10 X, Galaxy S10+, Galaxy S10, and Galaxy S10 Lite. The Galaxy S10 X will have 5G connectivity so it will most likely be launched only where there are 5G networks. Each of the Galaxy S10 series phones will have a different display size. The S10 X is expected to have a huge amount of RAM. There are not enough details about the specs but there is little information about display sizes. Samsung is likely to use the Snapdragon 855, Qualcomm's latest chipset in the flagship phones.
