HOWELL WHEELER

Characteristic, Analytical, and Comparative Springer Science & Business Media

This book is about practising homoeopathy.

Pocket Manual of Homoeopathic Materia Medica B. Jain Publishers

Dr Chauhan has taken a lot of pains and given considerable thinking to produce this book. The book contains pictures to express the symptoms of the disease to enable the homeopath to understand the same. The pictures have been drawn well. If the students see the pictures, they will not miss the symptom of the ailment and in homeopathy the understanding of the ailment and in homeopathy the understanding of

symptoms is very important. Any student seeing the pictures in the book will not forget the character of the disease indicated by it and for them this is very essential.

Evidence-based Anticancer Materia Medica Elsevier Health Sciences
Books of therapeutics are available in the market but no book is available with applied materia medica as per system-wise therapeutics. This book contains medicines covering therapeutic and applied aspects arranged in a systemised manner. The medicines affecting various systems are very vast and this covers the syllabus of BHMS and PG courses in Homoeopathy. Here the author with his deep knowledge of the subject of Materia Medica & Homoeopathic Therapeutics has

arranged the book systematically and individually with separate commentary on General Homoeopathic Therapeutics to make it simple and easily understood. Allen's Keynotes Rearranged & Classified CRC Press

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a

quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Practical Homoeopathic Therapeutics
Comparative Materia Medica

Especially written for the benefit of the new practitioners of homeopathy and laymen who are interested to learn homeopathy and treat the common ailments of their family and themselves. This 3rd revised edition incorporates the authors knowledge and experience that he gained in the recent years. New chapters like Adultery, Adrenalitis,

Athlete's foot, Autism, etc. have been added. The book is unique as it contains knowledge about medicines, diseases, illustrations to explain dietary recommendations and basic facts which makes reading much more interesting. To make this book much more useful, potencies along with dosage has also been added with each remedy.

Lectures on Homoeopathic Materia Medica Franklin Classics

Helpful in hands of busy practitioners, for quick detection of remedies, as well as comparing the symptoms at a glance. Helps doctors who do not possess the encyclopaedic memory necessary for mastering the profound subject.

The Materia Medica of Some More Important Remedies Motilal Banarsidass Publ.

A book of differential comparisons. The book shows how one might use remedy comparisons in one's daily practice. The remedies are arranged alphabetically.

Recipes and Reminiscences from India's Eastern Hills CRC Press

Product Dimensions: 7.5 x 5.3 x 1.7

inches This edition contains all the well known and new medicines and essentials of the published clinical experience. A condensed form of *Materia Medica* for practical use.

Homoeopathic Treatment Systematized & Simplified Springer Science & Business Media

Tea is the most widely-consumed beverage in the world. Like other crops, tea cultivation faces a number of challenges. With the challenge of climate change and the competition for scarce

resources, there is a need to make tea cultivation more efficient and sustainable. Cultivation needs also to be more resilient to biotic and abiotic stresses, whether it be pests or more extreme weather (e.g. drought) associated with global warming. Fortunately, there is a range of research addressing these challenges. Drawing on an international range of expertise, this collection summarises this research by focusing on ways of improving the cultivation of tea at each step in the value chain, from breeding through to harvest. Part 1 reviews advances in breeding. Part 2 discusses improvements in cultivation techniques. The book then discusses plant protection and chemistry before concluding with sustainability issues. As the need for more

interdisciplinary and collaborative research increases, this collection will be a standard reference for the tea research community by summarising key research trends in each topic and putting them in the context of tea cultivation as a whole.

Network Pharmacology B. Jain Publishers
With over 50,000 distinct species in sub-Saharan Africa alone, the African continent is endowed with an enormous wealth of plant resources. While more than 25 percent of known species have been used for several centuries in traditional African medicine for the prevention and treatment of diseases, Africa remains a minor player in the global natural products market largely due to lack of practical information. This updated and expanded second edition of

the Handbook of African Medicinal Plants provides a comprehensive review of more than 2,000 species of plants employed in indigenous African medicine, with full-color photographs and references from over 1,100 publications. The first part of the book contains a catalog of the plants used as ingredients for the preparation of traditional remedies, including their medicinal uses and the parts of the plant used. This is followed by a pharmacognostical profile of 170 of the major herbs, with a brief description of the diagnostic features of the leaves, flowers, and fruits and monographs with botanical names, common names, synonyms, African names, habitat and distribution, ethnomedicinal uses, chemical constituents, and reported

pharmacological activity. The second part of the book provides an introduction to African traditional medicine, outlining African cosmology and beliefs as they relate to healing and the use of herbs, health foods, and medicinal plants. This book presents scientific documentation of the correlation between the observed folk use and demonstrable biological activity, as well as the characterized constituents of the plants.

Natural Liberty Springer

A familiarity with disease patterns and an understanding of their mechanism cannot be overstressed in sound practice of medicine. The three major chapters are Diagnosis, Prognosis and Affection. Includes a Glossary and Symptomatic Index.

High Dilution Effects: Physical and

Biochemical Basis APH Publishing

This comprehensive textbook provides a detailed, practical and thorough basis for the understanding and application of the homeopathic process. Drawing on the experience and knowledge of a wealth of contributors, the book offers the foundations for the safe and broadest practice of modern homeopathy. Divided into 6 sections, this book takes the understanding of homeopathy from basic principles to the treatment of acute and chronic illnesses, the first prescription, and difficult, confused and hidden cases. Each section progresses through five themes broadly divided into philosophy, material medica, case taking, case analyses and case management. Each theme is woven together through the text and, section by section, builds into

an essential study guide for the homeopathic student. It provides opportunities for reflection, and invites all practitioners to engage in their own personal and professional development.

Textbook of Applied Materia Medica B. Jain Publishers

Comprising the Characteristic and Guiding Symptoms of all Remedies (Clinical and Pathogenetic)

FROM FARM TO PHARMACY

Springer Nature

Since the subject of high dilution effects is still a subject for debate, this volume provides evidence in support of effects from control clinical studies, clinical records from veteran physicians, controlled experiments on animals and plants, and in vitro tests without any

organisms (Chapter II). An overview of the methods for preparing drugs at ultra high dilution is also provided as well as the basic principles of homeopathy, which has been alleviating human suffering through the use of these drugs for several hundred years (Chapter I). Chapter III provides physical basis of high dilutions as evidence from the NMR, IR, UV and fluorescence spectra of those drugs. Since water is used as the diluents media, the structure and dynamics of water polymers in relation to high dilution are discussed in order to facilitate easy comprehension of this physical aspect, the basic principles of spectroscopy are also described. Chapter IV focuses on the mechanism of action of potentized drugs in the living system, discussing the structure of the

cell, the plasma membrane, the integral proteins on the membrane, the interaction between these proteins and high dilutions and the manifestations of the therapeutic effects of high dilutions. Some aspects, peculiar to homeopathy, such as the chief miasm psora, and the literalities and time modalities of symptoms and drug action are interpreted from a scientific perspective. Chapter IV ends with a brief discussion on water structures and the origin of life to show the natural evolution of high dilution effects. The book not only helps in understanding the physical basis of high dilutions and their mechanism of action in organisms but provides many new avenues of investigation into this interdisciplinary field of science.

WITH LEADING REMEDIES OF THE MATERIA MEDICA AND BOWEL NOSODES: 10TH EDITION

B. Jain Publishers

Cancer is one of the leading killers in the world and the incidence is increasing, but most cancer patients and cancer survivors suffer much from the disease and its conventional treatments' side effects. In the past, clinical data showed that some complementary and alternative medicine (CAM) possessed anticancer abilities, but some clinicians and scientists have queried about the scientific validity of CAM due to the lack of scientific evidence. There is great demand in the knowledge gap to explore the scientific and evidence-based knowledge of CAM in the anticancer

field. With this aim, a book series is needed to structurally deliver the knowledge to readers. Recently there have been encouraging results from both laboratory experiments and clinical trials demonstrating the anticancer effects of herbal medicine. There is considerable interest among oncologists and cancer researchers to find anticancer agents in herbal medicine. This volume is a specialised book presenting the up-to-date scientific evidence for anticancer herbal medicine. This unique book provides an overview of the anticancer herbal medicines and remedies, as well as a detailed evidence-based evaluation of 18 common anticancer herbal medicines covering their biological and pharmacological properties, efficacies, herb-drug

interactions, adverse effects, pre-clinical studies, and clinical applications.

Gathering international opinion leaders' views, this volume will contribute great to the cancer, academic, and clinical community by providing evidence-based information on the anticancer efficacy of herbal medicine. Readership Oncologists, cancer researchers, pharmacologists, pharmaceutical specialists, Chinese medicine practitioners, medical educators, postgraduates and advanced undergraduates in biomedical disciplines, cancer caregivers, cancer patients.

Nosodes Hachette India

Until relatively recently, much of the information on India's research into their medicinal plants has remained within

India, mainly published within Indian journals. However, today the field of Ayurveda is expanding, with the integration of herbs and minerals discovered in other countries and the strengthening of academic knowledge networks worldw

Homoeopathic Self Guide For Beginners
B. Jain Publishers

"Allen's Keynotes" is one of the most popular and widely read materia medica. The reason for its popularity being its preciseness and comprehensiveness. Keeping in view its usefulness for the students and practitioners of homeopathy.

This book offers a fresh look on a variety of issues concerning herbal medicine - the methods of growing and harvesting various medicinal plants; their phytochemical content; medicinal usage; regulatory issues; and mechanism of action against myriad of human and animal ailments. 'Medicinal Plants: From Farm to Pharmacy' comprises chapters authored by renowned experts from academics and industry from all over the

world. It provides timely, in-depth study/analysis of medicinal plants that are already available in the market as supplements or drug components, while also introducing several traditional herbs with potential medicinal applications from various regions of the world. The book caters to the needs of a diverse group of readers: plant growers, who are looking for ways to enhance the value of their crops by increasing phytochemical content of plant products; biomedical scientists who are studying newer applications for crude herbal extracts or isolated phytochemicals; clinicians and pharmacologists who are studying interactions of herbal compounds with conventional treatment modalities; entrepreneurs who are navigating ways to bring novel herbal supplements to the

market; and finally, natural medicine enthusiasts and end-users who want to learn how herbal compounds are

produced in nature, how do they work and how are they used in traditional or modern medicine for various disease indications.
