English General Skills Booster Longman
This edited volume addresses issues that promote the notion of Classroom-based Language Assessment (CBLA) for the academic community and beyond. The book explores recent thinking and research on CBLA within the fields of language testing, assessment and general education based on theoretical and research papers presented at the recent CBLA SIG - EALTA Symposia held in Cyprus and the pre-conference EALTA workshops in various countries around Europe. The volume contains 17 chapters which involve both high-stakes tests and classroom-based

assessments conducted by academics, professionals and researchers in the field. It brings together high-quality submissions that cover a gap in a research area that has long been in need of theoretical and empirical attention. Overall, this edited collection, with its international scope, offers a ground-breaking resource, bringing together in balanced relationship the fields of education and second language testing and assessment.

The Routledge Handbook of Applied Linguistics serves as an introduction and reference point to key areas in the field of applied linguistics. The five sections of the volume encompass a wide range of topics from a variety of perspectives: applied linguistics in action language learning,

language education language, culture and identity perspectives on language in use descriptions of language for applied linguistics. The forty-seven chapters connect knowledge about language to decision-making in the real world. The volume as a whole highlights the role of applied linguistics, which is to make insights drawn from language study relevant to such decision-making. The chapters are written by specialists from around the world. Each one provides an overview of the history of the topic, the main current issues and possible future trajectory. Where appropriate, authors discuss the impact and use of new technology in the area. Suggestions for further reading are provided with every chapter. The Routledge Handbook of Applied Linguistics is an essential purchase for postgraduate students of applied linguistics. Editorial board: Ronald Carter, Guy Cook, Diane Larsen-Freeman and Amy Tsui.

CASE STUDIES OF VALIDATION RESEARCH

Springer

Since test items are the building blocks of any test, learning how to develop and validate test items has always been critical to the teaching-learning process. As they grow in importance and use, testing programs increasingly supplement the use of selected-response (multiple-choice) items with constructed-response formats. This trend is expected to continue. As a result, a new item writing book is needed, one that provides comprehensive coverage of both types of items and of the validity theory underlying them. This book is an outgrowth of the author's previous book, *Developing and Validating Multiple-Choice Test Items*, 3e (Haladyna, 2004). That book achieved distinction as the leading source of guidance on creating and validating selected-response test items. Like its predecessor, the content of this new book is based on both an extensive review of the literature and on its author's long experience in the testing field. It is very timely in this era of burgeoning testing programs, especially when these items are delivered in a computer-based environment. Key features include ... Comprehensive and Flexible – No other book so thoroughly covers the field of test item development and its various applications. Focus on Validity – Validity, the most important consideration in testing, is stressed throughout and is based on the Standards for Educational and Psychological Testing, currently under revision by AERA, APA, and NCME Illustrative Examples – The book presents various selected and constructed response formats and uses many examples to illustrate correct and incorrect ways of writing items. Strategies for training item writers and developing large numbers of items using algorithms and other item-generating methods are also presented. Based on Theory and Research – A comprehensive review and synthesis of existing research runs throughout the book and complements the expertise of its authors.

Practice Tests Plus with Key Longman

This volume documents international, national, and small-scale testing and assessment projects of English language education for young learners, across a range of educational contexts. It covers three main areas: age-appropriate 'can do statements' and task types for teaching and testing

learners between the ages of 6 to 13; innovative approaches to self-assessment, diagnostic testing, self-perception, and computer-based testing; and findings on how young learners perform on vocabulary, listening, speaking, pronunciation, and reading comprehension tests in European and Asian contexts. Early language learning has become a major trend in English language education around the globe. As a result of the spread of teaching English to a growing number of young children, assessment of and for learning have emerged as key issues. In line with this development, there is a clear and emerging need to make early language programs accountable and to assess both the progress children make over time and to quantify their achievement at various stages of development. This volume informs stakeholders about the realistic goals of early language learning, their efficiency, and how much progress children make over time.

Second language assessment is ubiquitous. It has found its way from education into questions about access to professions and migration. This volume focuses on the main debates and research advances in second language assessment in the last fifty years or so, showing the influence of linguistics, politics, philosophy, psychology, sociology, and psychometrics. There are four parts which, when taken together, address the principles and practices of second language assessment while considering its impact on society. Read separately, each part addresses a different aspect of the field. Part I deals with the conceptual foundations of second language assessment with chapters on the purposes of assessment, and standards and frameworks, as well as matters of scoring, quality assurance, and test validation. Part II addresses the theory and practice of assessing different second language skills including aspects like intercultural competence and fluency. Part III examines the challenges and opportunities of second language assessment in a range of contexts. In addition to chapters on second language assessment on a national scale, there are chapters on learning-oriented assessment, as well as the uses of second language assessment in the workplace and for migration. Part IV examines a selection of important issues in the field that deserve attention. These include the alignment of language examinations to external frameworks, the increasing use of technology to both deliver and score second language tests, the responsibilities associated with assessing test takers with special needs, the concept of 'voice' in second language assessment, and assessment literacy for teachers and other test and score users. **Expert** Routledge
