Finance is the study of how individuals, institutions, governments, and businesses acquire, spend, and manage their money and other financial assets to maximize their value or wealth.

Fundamentals of Finance introduces the nuances of finance in a comprehensive yet concise manner and is essential reading for professionals building a career in finance or for students taking a course in finance. financial basics that underlie how markets operate. Part II: "Investments and Portfolio Management" discusses the characteristics of stocks and bonds, how securities are valued, the operations of securities markets, formation of optimal portfolios, and derivatives. Part III: "Financial Management/Corporate Finance" explores financial planning, asset management, and fundraising activities that will enhance a firm's value. Part IV: "Management of Financial Institutions" focuses on management of financial institutions in general, and risk management in financial institutions in particular. The book's many examples, appendices, graphs and tables provide valuable know-how to a wide audience, making it an excellent resource for professionals as well as students who wish to attain a broad understanding of finance. Fundamentals of Corporate Finance was designed and developed for a first course in business or corporate finance, for both finance majors and non-majors alike. The text is nearly self-contained in terms of background or prerequisites, assuming some familiarity with basic algebra and accounting concepts, while still reviewing important accounting principles very early on. The organization of this text has been developed to give instructors the flexibility they need. The best-selling text has three basic themes that are the central focus of the book:

- 1) An emphasis on intuition: the authors separate and explain the principles at work on a common sense, intuitive level before launching into any specifics.
- 2) A

unified valuation approach: net present value (NPV) is treated as the basic concept underlying corporate finance. 3) A managerial focus: the authors emphasize the role of the financial manager as a decision maker, and they stress the need for managerial input and judgment.
