 `If you are intending to embark upon or support others taking part in any of the programmes of the National College for School Leadership I would definitely keep this book close by' - Cliff Jones, CPD Update
 What are values? Where do our values come from? How do our values make a difference to education? For educational leaders to achieve distinction in their practice, it is vital to establish their own clear sense of values rather than reacting to the implicit values of others. This engaging book guides readers in thinking for themselves about the values they bring to their task and the values they intend to promote. Crucially, the book promotes critical thought and constructive analysis about the underlying values involved with: - aims and moral purpose in education - individual qualities in educational leadership - vision in education - school ethos and culture - the school as an educational community. By inviting reflection using valuable case

studies and work-through activities, as well as referring to a wide range of academic literature, this book will be an important resource for those working towards professional qualifications such as NPQH, and invaluable for anyone aspiring to excellence in educational leadership. Graham Haydon is Senior Lecturer in Philosophy of Education at the Institute of Education, University of London, where he teaches on Masters courses in Values in Education and Applied Educational Leadership and Management.

An Introduction to Moral Philosophy Peter Lang

Utilizing a question and answer format, the philosopher and spiritual teacher discusses multiculturalism, political correctness, spiritual enlightenment, gender wars, modern liberation movements, and the course of evolution. Reprint.

The Art of Living Sideways Routledge

This is the most comprehensive treatment of a significant episode of the historical avant-garde period to which many refer but with little concrete background.

According to Charlotte Douglas (Russian and Slavic Studies, NYU), Zaum "is an

encyclopedic account of zaum or 'beyond sense,' the most distinctive feature of Russian avant-garde art and poetry early in the 20th century. Janecek has mined a myriad of arcane and inaccessible sources, gathered the entire historical record in one place, and made it readable and comprehensible. His account of zaum theory and practice will be indispensable for anyone interested in modern poetry and art. Certainly it will become a standard text for all students of Russian Futurism."

UNTIMELINESS AND FUTURITY

Univ of California Press

This book explores the potential of movement as a means of eliciting conflict transformation and unfolding peace at the intrapersonal and relational levels. It examines how peace and dance have been related in different cultures and investigates embodied ways to creatively tap the energies of conflicts, inspiring possibilities of transformation and new dynamics in relationships. Drawing on

Wolfgang Dietrich's Many Peaces theory, the book discusses how different expressions of dance have been connected to different interpretations of peace and strategies for transformation. Delving into elicitive approaches to conflict transformation, the book develops an innovative framework for applying movement as an elicitive method, which it vividly presents through the author's own experiences and interviews with participants in workshops. Given its scope, the book will appeal to scholars, practitioners and artists working at the nexus of peace, conflict transformation and the arts.

A Layman's Introduction to Religious Existentialism Springer

This book brings together personal stories and theoretical concepts in the exploration of how second generation female migrants (SGFMs) in Norway negotiate their identities and give new form and content to their own notions of peace and belonging beyond a double life. By applying postmodern and feminist scholarship, the book challenges static ideas of cultural identity in discourses about the national and the family contexts. It takes the reader on a journey through the transformations of conflicts on sexuality, identity, and belonging by the SGFMs themselves. This will be an important book for feminist and migration researchers, as well as for those concerned with minority issues. (Series: Masters of Peace - Vol. 8)

A New Way of Thinking about Art, Freedom, and Knowledge Shambhala Publications

This volume is a unique collection of philosophical essays on various aspects of Schopenhauer's understanding of the nature and character of the world through the classical philosophies of the Vedanta and Buddhism and classical and modern thinkers like Bhartṛhari, Tagore, and Wittgenstein. It includes reflective insights about Schopenhauer and the metaphysics of the world, the self, and morality from scholars who have pioneered the philosophical study of the relation between Schopenhauer and Indian schools of thoughts and intellectual history. This insightful volume is a good academic resource for further research in comparative philosophy of Schopenhauer and the Indian tradition.

Pedagogy of Vulnerability Bloomsbury Publishing

A pop-culture presentation of the Integral Approach from visionary genius Ken Wilber, designed as an easy introduction to his work. What if we attempted to create an all-inclusive map that touches

the most important factors from all of the world's great traditions? Using all the known systems and models of human growth—from the ancient sages to the latest breakthroughs in cognitive science—Ken Wilber distills their major components into five simple elements, ones that readers can relate to their own experience right now. With clear explanations, practical exercises, and familiar examples, *The Integral Vision* invites readers to share in the innovative approach to spiritual growth, business success, and personal relationships. This book has been adapted from the 2009 graphic edition. This book is part of the Shambhala Pocket Library series. The Shambhala Pocket Library is a collection of short, portable teachings from notable figures across religious traditions and classic texts. The covers in this series are rendered by Colorado artist Robert Spellman. The books in this collection distill the wisdom and heart of the work Shambhala Publications has published over 50 years into a compact format that is collectible, reader-friendly, and applicable to everyday life.

Inspired by Paul Brunton's years spent with sages in Asia, *The Wisdom of the Overself* and its companion volume *The Hidden Teaching Beyond Yoga* were written at the request of these remarkable teachers, who recognized that Brunton had a significant role to play in the transmission of traditional wisdom to the West. Here is a profound re-creation of these teachings, brought to life and made accessible by Brunton's insights. In print since the 1940s, Brunton's works are considered to be among the most comprehensive, clear, and practical guides on the path to enlightenment. Brunton unfolds the grand vision for human development by investigating consciousness as the source of all experience; how to move from ego-centered life to the transcendent reality; the interplay of karma, free will, and grace; the nature of evil and suffering; how to awaken intuition and penetrative insight; the passage through death to rebirth; and psychic experiences and mystic visions. He also provides seven ultramystic exercises to open the door to higher consciousness, including a healing meditation on the sun; practices for transforming the future, dream, and sleep; and a meditation on the timeless self. These techniques lead to the deepest spiritual realizations—to the true "Wisdom of the Overself." This new edition has been updated to incorporate Brunton's final revisions. It includes a new foreword plus

A VERY SHORT INTRODUCTION

LIT Verlag Münster

We don't often think about the act of knowing, but if we do, the question of what we know and how we know it becomes murky indeed. *Longing to Know* is a book about knowing: knowing how we know things, knowing how we know people, and knowing how we know God. This book is for those who are considering Christianity for the first time, as well as Christians who are struggling with issues related to truth, certainty, and doubt. As such, it is a wonderful resource for evangelists, pastors, and counselors. This unique look at the questions of knowing is both entertaining and approachable. Questions for reflection make it ideal for students of philosophy and all those wrestling with the questions of knowledge. **Skateboarding, Peace and Elicitive Conflict Transformation** Springer

Sophie Friedel explores the action of skateboarding in her book as a way to escape cycles of despair, not only in war torn environments and regions affected by poverty. The author critically reflects on her involvements of teaching skateboarding in Afghanistan within the context of youth empowerment and peace work. By way of personal experiences, Friedel illustrates how skateboarding can be understood as an elicitive approach to peace work and conflict transformation that unfolds the extraordinary human potential inherent to all of us.

This study examines the influence of Kant on Hermann Cohen's philosophy of religion. A basic tenet in Kantian philosophy of religion is that morality leads ineluctably to religion. But how does morality lead to religion? While Cohen rejected Kant's doctrine of the postulates

(of the existence of God and the immortality of the soul) as it is formulated in *Kritik der praktischen Vernunft*, he searched for alternative ways to found a «religion of reason» in ethics. This book concentrates on two routes from ethics to religion that are central to Cohen's philosophy of religion in his two last works: *Der Begriff der Religion im System der Philosophie* (1915), and *Religion der Vernunft aus den Quellen des Judentums* (posthumous 1919). One route takes compassion towards the «concrete Other», which is complementary to an ethics of universal respect, as its point of departure, and argues that an attitude of compassion and recognition of the Other as a genuine individual presupposes a distinctive religious consciousness. The other route is inspired by Kant's wrestling with the problem of removal of moral guilt in *Religion innerhalb der Grenzen der blossen Vernunft*, and centres around the questions of guilt and liberation from guilt. Cohen's ideas and their continued relevance are explored in this book in light of some major concerns of twentieth century and contemporary philosophy of religion.

Movies hold a mirror up to us, portraying the complexities of human reality through their characters and stories. And they vividly illustrate moral theories that address questions about how we are to live and what sort of people we ought to be. In this book, Christopher Falzon uses movies to provide a rich survey of moral positions as they have emerged through history. These include the ethics of the ancient world, medieval ethics, Enlightenment and Kantian ethics, existentialist ethics and the ethics of the other. Each theory is explained in detail, using a number of examples from the book's wide selection of movies. The discussion draws on a range of recent and not-so-recent films, from Hollywood blockbusters to art-house cinema. Key Features: In addition to covering thinkers one would expect in an introduction to ethics (e.g., Plato, Aristotle, Kant), the book discusses less canonical figures in detail as well (e.g., Marcuse, Foucault, Habermas). Similarly, the book examines both major ethical theories (e.g., Kantianism, utilitarianism, virtue ethics) and theories too often glossed over in introductory texts (e.g. Stoicism, Epicureanism, Habermas's discourse ethics and Nietzschean ethics). A wide range of movies are discussed, from Hollywood blockbusters and classics like

The Dark Knight, *Casablanca* and *Dirty Harry* to lesser known films, like *Force Majeure* and *Under the Skin*. At the end of each chapter a focus on two feature films is included, with a plot summary and interpretations of several key scenes with a time marker indicating when in the film the scenes occur. A Filmography includes all movies discussed in the book and a Glossary covers key philosophical terms and figures; both with corresponding page numbers.

"German--and particularly French--sources of the revolution that has occurred in literary theory during the past thirty years have long been recognized. The Russian contribution to these events has been hinted at previously, but Cassedy documents in detail the extraordinary work of Potebnya, Veselovskij, and other figures virtually unknown in the West. . . . An important contribution to intellectual history and literary theory."--Michael Holquist, author of *Dostoevsky and the Novel* "An astonishing number of complex movements and ideas--from Humboldt through Russian and French Symbolists to Heidegger, Husserl, Roman Jakobson and the deconstructors, from symbology to logology and iconology--begin to fit together in this wide-ranging and provocative book. . . . Cassedy's book will outrage some readers, delight others, and enlighten all."--Caryl Emerson, author of *Boris Godunov: Transpositions of a Russian Theme*

Morten Frederiksen explores Carl Gustav Jung's elusive notion of synchronicity from a transrational perspective and relates synchronicity to the transpersonality of the "All-One". This is done by expanding the content and meaning of Wolfgang Dietrich's layers of Elicitive Conflict Mapping (ECM) through re-relating them to Ken Wilber's model of the structures of consciousness; with synchronicity as the literal connecting principle. The result, then, is an expanded notion of the transrational peace philosophy which includes Wilber's model of stages shorn of its evolutionary slant and fathoms synchronicity in its theoretical outlook and practical application.

Kenneth Burke on Myth InterVarsity Press

Transrational Peaces is a new approach in contemporary Peace Research. It considers the rational and the spiritual sphere of human perception to be essential for the understanding of peace. In this book the Austrian-Indian researcher Samrat Schmiem Kumar presents the Indian tradition of Bhakti Yoga, and demonstrates the value of Indian philosophy for contemporary discussions on peace. In the philosophy of Bhakti, life is a playful and aesthetic relationship between human and the cosmos. The book opens the field of Peace Studies beyond the well-known horizons of the discipline in Europe and the United States.

This book sheds new light on transrational approaches to peace research and highlights elicitive approaches to facilitation. Rather than encouraging researchers, teachers and practitioners to control and suppress their own positionality, the book argues that they can see themselves as a potential (re)source that can be creatively tapped for their work. Using dance as a central metaphor, it seeks to reposition research and facilitation as a truly experiential process where the entirety of human experiences and epistemologies can be brought into interplay, opening up new sources of knowledge. Providing a cutting-edge theoretical framework and based on his practical experience, the author demonstrates that facilitation and research are not just cognitive, but can also be (come) embodied, emotional, intuitive, relational and spiritual. By proposing a systematic, methodological framework for research and facilitation, the book offers practical guidance for peace practitioners, facilitators and researchers interested in working through all dimensions of their being and engaging with conflict transformation in a holistic way.

This book comprehensively gathers the current academic literature, field expertise and artistic developments on Wolfgang Dietrich's Many Peaces theory, in the ways it has been conceptualized and practiced by peace and conflict workers around the world. Both scholars and practitioners challenge and creatively explore the field of transrational peace philosophy, contributing their insights on elicitive methods and conflict mapping. The book is

further enriched by artistic perspectives on integrative approaches to theatre for living and intercultural soundscapes. The articles collected here respond with

innovative strength and vigor to the worldwide need for further research on peace and for practical approaches to

conflict transformation. This book therefore equally appeals to scholars, peacebuilders and practitioners as well as artists engaged in conflict transformation.
