LEBLANC WERNER

Dr. Manish Rannjan (IAS) Arihant Publications India limited
Translated by the author 'Tamasdrove the point home that ordinary people want to live in peace' The Guardian Set in a small-town frontier province in 1947, just before Partition, Tamas tells the story of a sweeper named Nathu who is bribed and deceived by a local Muslim politician to kill a pig, ostensibly for a veterinarian. The following morning, the carcass is discovered on the steps of the mosque and the town, already tension-ridden, erupts. Enraged Muslims massacre scores of Hindus and Sikhs, who, in turn, kill every Muslim they can find. Finally, the area's British administrators call out the army to prevent further violence. The killings stop but nothing can erase the awful memories from the minds of the survivors, nor will the various communities ever trust one another again. The events described in Tamas are based on true accounts of the riots of 1947 that Sahni was a witness to in Rawalpindi, and this new and sensitive translation by the author himself resurrects chilling memories of the consequences of communalism which are of immense relevance even today.

UNUSUAL TALES FROM THE MAHABHARATA

McGraw Hill Professional
Every woman needs an occasional pick-me-up or uplifting word from a friend, a spouse or even God. Similar in style to her best-selling book Silver Boxes,

Littauer shares enlightening messages on topics such as giving children a bedtime blessing, accepting compliments, and avoiding the "blame game." Each reading has a personal touch from the author's life or a story all women can relate to.

GASTROINTESTINAL MALIGNANCIES

Routledge India
Current interest in research of solidification of melts is focussed to understand crystal nucleation and crystal growth. They determine the solidified product with its physical properties. A detailed description of these processes lead to the development and validation of physical models, which may form the basis of quantitative modelling of solidification routes in e.g. casting and foundry processes in order to develop a predictive capability in the design of materials during solidification. This book, based on a symposium held at EUROMAT 2003 aims to gives an overview on current developments in the research of solidification and crystallisation of liquids. The materials of interest range from metals and their alloys over semiconductors and isolators to organic substances.

Star Publications

Dr. Bhimrao Ambedkar was an Indian jurist, scholar, political leader and a Buddhist revivalist. He was the Chief Architect of the Indian Constitution. He played a great role in framing of Indian Constitution. He was the first Law Minister of India. He spent his whole life fighting against Social discrimination and untouchability. He was posthumously awarded the highest civilian award: the Bharat Ratna, in 1990. Dr. Ambedkar is viewed as messiah of dalits and

down-trodden in India. Though he was the son of large family of then called 'Untouchable' Mahar caste, still he managed to get the highest degree of education and scaled even higher political heights and wisdom. The inside pages contain an interesting and elevating account of how an average boy of a low-caste and not so rich family fought against the discrimination and became the messiah of dalits and down-trodden in India. The book also gives its readers minute detail about his life and personality. We hope the book will prove successful in clinching the readers' interest.

IF I WAS A TREE

Penguin Books India

Jaishankar Prasad's epic poem *Kamayani* (1936) is a feast for intellectuals. It operates at three different levels: the gross or mythological, the emotional and the spiritual. Prasad infused the vision of a rishi, a sage, into this work. The reader experiences poetic currents of human emotions - anxiety, hope, desire, love, shyness, sorrow, conflict - and finally emerges at an elevated level of consciousness.

Kabir was a 15th century Indian spiritual master who left a legacy of extraordinary poems which continue to

capture the imagination of a diverse audience today. The poems downplay the importance of ritual and austerity, and teach that God is not confined to centers of worship or places of pilgrimage but found everywhere in creation. Most importantly, God is within us and this is where we must meet him. Kabir elevates us into the realm of the spirit - a world of beauty, majesty, even romance, where the relationship between lovers is a recurring metaphor for our relationship to the divine. For the last century, Rabindranath Tagore's classic translation, "Songs of Kabir," has been the standard, but over the years it has suffered the ravages of time. In "Kabir Says," David Masterman has reworked Tagore's translation and breathed new life into it for the 21st century reader. But this edition goes beyond merely updating language and style; it considerably enhances the poetic form and flow of the English translation, and a new introduction and appendix have also been added to add depth to the reader's understanding.

THE SERPENT'S REVENGE

Oswaal Books and Learning Pvt Ltd

These are just a few examples that illustrate the chemical diversity and use of phenolic compounds, the topic of 'Phenolic Compound Biochemistry'. This book is written for researchers, instructors, advanced undergraduate students and beginning graduate students in the life sciences who wish to become more familiar with these and many other intriguing aspects of phenolic compounds. Topics covered include nomenclature, chemical properties, biosynthesis, including an up-to-date overview of the genetics controlling phenolic metabolism, isolation and characterization of phenolic

compounds, phenolics used in plant defense, and the impact of phenolics on human health. The book is written in an accessible style, and assumes only basic knowledge of organic chemistry, biochemistry and cell physiology. More than 300 chemical structures and reaction schemes illustrate the text.

Wilfred Vermerris is Associate Professor of Agronomy at the University of Florida Genetics Institute in Gainesville, FL. His research focuses on the genetic control of phenolic compounds that impact agro-industrial processing of crop plants.

Ralph Nicholson is Professor of Botany and Plant Pathology at Purdue University in West Lafayette, IN. He is an expert on phenolic compounds involved in the plant's defense against pathogenic fungi and bacteria.

Gastrointestinal Malignancies

Gastrointestinal (GI) cancers are common diseases worldwide. About 400,000 patients are diagnosed with esophageal cancer worldwide each year and nearly 330,000 die for this disease. Roughly 870,000 patients are newly diagnosed each year with gastric cancer and over 600,000 die from the disease each year. And 940,000 new cases of colorectal cancer are diagnosed annually and 490,000 patients die from this disease. Management options for patients with GI cancer have undergone dramatic changes in the past decade. New cytotoxic agents, novel targeted agents, surgical and ablative options, as well as a new array of supportative medications have shown substantial progress. With the increased number of therapeutic options from which to choose, the clinician is better placed to offer effective therapy. At the same time

the clinician is challenged to keep abreast of the rapidly changing treatment landscape and the newly emerging data that is shaping the options for treatment today and in the future. *Gastrointestinal Malignancies* provides a comprehensive and in-depth review of this group of malignancies. This volume reviews the current literature, provides critical evaluations of the data, and offers evidence-based recommendations. The editors and authors are leaders in their fields. The chapters update the current screening tools for colon cancers, assessment of predictive markers such as k-Ras and BRAF in the management of colon cancer as well as the state-of-the-art for use of both cytotoxic chemotherapy and the incorporation of newer biological therapies. About the Series: *Emerging Cancer Therapeutics* is an invited review publication providing a thorough analysis of key clinical research related to cancer therapeutics, including a discussion and assessment of current evidence, current clinical best practice, and likely near future developments. There is an emphasis throughout on multidisciplinary approaches to the specialty, as well as on quality and outcomes analysis. Published three times a year *Emerging Cancer Therapeutics* provides authoritative, thorough assessments of advances in therapeutics in all major areas of oncology, both solid and hematologic malignancies, with a focus on advances in medical and biological therapies with emerging clinical impact and encompassing new technologies with implications for management such as molecular imaging. Features of the *Emerging Cancer Therapeutics* include: Editorial board of nationally recognized experts across the spectrum of Cancer

Therapeutics In-depth, up-to-date expert reviews and analysis of major new developments in all areas of Cancer Therapeutics Issues edited by an authority in specific subject area Focuses on major topics in Cancer Therapeutics with in-depth articles covering advances in clinical and translational research developments as well as clinical applications and experience Emphasizes multidisciplinary approaches to research and practice

Rediscover Your Creative Genius Thomas Nelson

The story of a woman's search for strength and independence Meet Akhilandeshwari, Akhila for short: forty-five and single, an income tax clerk and a woman who has never been allowed to live her own life—always the daughter, the sister, the aunt, the provider. Until the day she gets herself a one-way ticket to the seaside town of Kanyakumari, gloriously alone for the first time in her life and determined to break free of all that her conservative Tamil brahmin life has bound her to. In the intimate atmosphere of the ladies coupe which she shares with five other women, Akhila gets to know her fellow travellers: Janaki, pampered wife and confused mother; Margaret Shanti, a chemistry teacher married to the poetry of elements and an insensitive tyrant too self-absorbed to recognize her needs; Prabha Devi, the perfect daughter and wife, transformed for life by a glimpse of a swimming pool; fourteen-year-old Sheela, with her ability to perceive what others cannot; and Marikolanthu, whose innocence was destroyed by one night of lust. As she listens to the women's stories, Akhila is drawn into the most private moments of their lives, seeking in them a solution to the question that has been with her all her life: Can a woman stay single and be

happy, or does a woman need a man to feel complete? Note: This book is in the Hindi language and has been made available for the Kindle, Kindle Fire HD, Kindle Paperwhite, iPhone and iPad, and for iOS, Windows Phone and Android devices.

(Hindi Edition) Franklin Classics

This book highlights recent research on bio-inspired computing and its various innovative applications in Information and Communication Technologies. It presents 50 high-quality papers from the 9th International Conference on Innovations in Bio-Inspired Computing and Applications (IBICA 2018) and 7th World Congress on Information and Communication Technologies (WICT 2018), which was held at Toc H Institute of Science and Technology (TIST) on December 17-19, 2018. IBICA-WICT 2018 was a premier conference and brought together researchers, engineers and practitioners whose work involved bio-inspired computing, computational intelligence and their applications in information security, real-world contexts etc. Including contributions by authors from 22 countries, the book offers a valuable reference guide for all researchers, students and practitioners in the fields of Computer Science and Engineering.

Nirmala Springer

I'll gift you a love story that every girl desires, but few get to live.' He'd told me once. And boy, did he stick to his words! Vanav Thakur is the perfect boyfriend that any girl can have. He ticks every box you can ever have for your Mr Right. Trust me on this. He cares for me, respects me, never objectifies me, never says no to me for anything, understands me, is progressive and has no shadow of any male chauvinism in him. Sometimes, I wonder if I really deserve him. My

parents, like me, had no option but to accept him as my boyfriend. Everything was hunky dory and I thought I would be that one girl who would never have any relationship hiccup until I stumbled upon the reason behind his perfection. I'm Aarisha Shergill and my life is about to get ripped apart because I should have known some things should be left alone. Is love capable of healing the deep wounds which love itself creates within you? Mysteriously thrilling in its essence, *Roses Are Blood Red* is the haunting story of a passion and eternal love.

Tamas Springer

This two-volume set (CCIS 1045 and CCIS 1046) constitutes the refereed proceedings of the Third International Conference on Advances in Computing and Data Sciences, ICACDS 2019, held in Ghaziabad, India, in April 2019. The 112 full papers were carefully reviewed and selected from 621 submissions. The papers are centered around topics like advanced computing, data sciences, distributed systems organizing principles, development frameworks and environments, software verification and validation, computational complexity and cryptography, machine learning theory, database theory, probabilistic representations.

Biography of Dr. BR Ambedkar Springer
Fictional biography of the sixteenth century poet Tulsidas, who is revered as the greatest of the Indian poets.

Penguin Random House India Private Limited

This book discusses Ambedkar's engagements with the issues of social justice, economic development, and caste enclosures. It highlights his significant contributions in the field of trade, public finance and monetary economics, Indian agriculture, education, among others, and examines their

relevance in contemporary India. The volume analyses the basic theoretical conceptions in Ambedkar's writings which attributed a key role to industrialisation, favoured economic planning, and progressive labour laws. It reaffirms these theories and illustrates that focus on social and economic democracy promotes productivity, equitable distribution of wealth and an inclusive society. Through an analysis of Ambedkar's interdisciplinary works, the book discusses issues of rural poverty, lagging infrastructure growth, the persistence of an exploitative ruling class, and the economic and social marginalisation of the downtrodden which are still relevant today. Further, it offers solutions for a restructuring of the society under democratic principles which would recognise the basic right of all to social dignity, and devise means to insure against social and economic insecurity. Insightful and authoritative, this volume will be of great interest to students and researchers of economics, sociology, development studies, and social exclusion.
