Controlling Accounts.--The addition of
special columns in books of original entry
makes possible the keeping of Controlling
Accounts. The most common examples of
such accounts are Accounts Receivable
account and Accounts Payable account.
These summary accounts, respectively,
displace individual customers' and
creditors' accounts in the Ledger. The
customers' accounts are then segregated
in another book called the Sales Ledger or
Customers' Ledger, while the creditors'
accounts are kept in the Purchase or
Creditors' Ledger. The original Ledger, now
much reduced in size, is called the General
Ledger. The Trial Balance now refers to
the accounts in the General Ledger. It is
evident that the task of taking a Trial
Balance is greatly simplified because so
many fewer accounts are involved. A
Schedule of Accounts Receivable is then

prepared, consisting of the balances found
in the Sales Ledger, and its total must
agree with the balance of the Accounts
Receivable account shown in the Trial
Balance. A similar Schedule of Accounts
Payable, made up of all the balances in
the Purchase Ledger, is prepared, and it
must agree with the balance of the
Accounts Payable account of the General
Ledger." The Balance Sheet.--In the more
elementary part of the text, the student
learned how to prepare a Statement of
Assets and Liabilities for the purpose of
disclosing the net capital of an enterprise.
In the present chapter he was shown how
to prepare a similar statement, the
Balance Sheet. For all practical...

This Volume is a compilation of 196 letters
from Eliphaz Levi to three different
students: -1 letter to Mme. Hutchinson -10
letters to Mr. Montaut (also known as
""The Elements of the Kabalah"") -185
letters to the Baron Sp?dalieri These

letters cover a variety of subjects and are presented in a Bilingual format (English side-by-side with the original French) with copious footnotes and illustrations to help the student grasp the subject matter.

Although many of these letters have been published in English before, this is a new translation of them all. This collection is a wonderful way to see into the heart of the Author and contain insights into his Transcendental Philosophy. ""The effect which I await for you (from my epistolary lessons) will be the understanding of my books which contain the whole doctrine, but in an abridged and succinct form.""

Easy Money - Being the Experiences of a Reformed Gambler - All Gambling Tricks Exposed New York : Knopf

Imported from the Mamluks of Egypt, card games first hit Europe around 1371 and within ten years had spread from Spain and Italy to France and Germany. By 1420, German and Swiss cardmakers were producing packs by the thousands (first by stencil, later by metal engraving) marked with a bewildering array of suits, including hounds, bears, parrots, roses, helmets, banners, and bells. Games proliferated as well, and by 1534, Rabelais could name 35

different card games in Chapter 22 of Gargantua. Today, of course, there are thousands of games, from the universally popular Poker and Contract Bridge, to national manias such as Swiss Jass, German Skat, and French Belote. This is a historical guide to cards in Europe and America. This is not primarily a book of rules or hints on how to play better, but a survey of where the games originated, how they have developed over time, and what their rituals and etiquette tell us about the people who play them.

"The Sharper Detected and Exposed" is a brilliant work by Jean-Eugène Robert-

Houdin, a French watchmaker, magician, and illusionist widely recognized as the father of the modern style of conjuring. In his book, he tells real stories about card sharps and other crooks he met in life. He gives detailed descriptions of the cheating methods used by card sharps and technical details of the methods used to cheat people.
