A Grandmaster New In
Chess

This accessible how-to
guide for parents and
teachers on the best way
to teach chess to children,
from international chess
expert Richard James, is
linked to both his
bestselling book, Chess
for Kids, and his website

chessKIDS academy.
James, who taught
grandmasters Luke
McShane and Jonathan
Rowson, shows how
learning chess is
interesting and fun. It can
also help children develop
life skills, such as
decision-making and
social skills, and be a

springboard to other subjects in the school curriculum, such as maths, science, history and even languages. In an easy-to-follow, fun way, James explains how to structure short lessons with worksheets and other activities to introduce the chess pieces, chess notation and chess-board dynamics - so that children can understand the thinking behind the moves and start playing and enjoying this fascinating game.

How to Play Chess for Kids Rockridge Press

Award-winning author Charles Hertan knows what kids really need to know (and want to know) about getting their pawns and pieces ready for action. Traditional chess opening books concentrate on the variations in different openings. Charles Hertan believes that for beginners and advanced beginners memorizing lines is not only boring but also a waste of time. Hertan's approach is different. He helps kids to develop a solid understanding of the

fundamental opening principles. What are the properties of each chess piece, and how can they be mobilized effectively to work together and get a strong position on the board? In his trademark humorous and kidfriendly way, Hertan teaches what you should actually be trying to achieve at the start of a game. Kids will love learning how to avoid The Five Most Common Opening Mistakes. This is a fun, easy-to-use, down-to-earth and accessible chess opening primer. *Teach Chess to Your 5*

Learn a new talent, stay relevant, reinvent yourself, and adapt to whatever the workplace throws your way. Ultralearning offers nine principles to master hard skills quickly. This is the essential guide to future-proof your career and maximize your competitive advantage through self-education. In these tumultuous times of economic and

technological change, staying ahead depends on continual self-education—a lifelong mastery of fresh ideas, subjects, and skills. If you want to accomplish more and stand apart from everyone else, you need to become an ultralearner. The challenge of learning new skills is that you think you already know how best to learn, as you did as a student, so you rerun old routines and old ways of solving problems. To counter that, Ultralearning offers powerful strategies

to break you out of those mental ruts and introduces new training methods to help you push through to higher levels of retention. Scott H. Young incorporates the latest research about the most effective learning methods and the stories of other ultralearners like himself—among them Benjamin Franklin, chess grandmaster Judit Polgár, and Nobel laureate physicist Richard Feynman, as well as a host of others, such as little-known modern polymath Nigel Richards,

who won the French World Scrabble Championship—without knowing French. Young documents the methods he and others have used to acquire knowledge and shows that, far from being an obscure skill limited to aggressive autodidacts, ultralearning is a powerful tool anyone can use to improve their career, studies, and life. Ultralearning explores this fascinating subculture, shares a proven framework for a successful ultralearning project, and offers

insights into how you can organize and execute a plan to learn anything deeply and quickly, without teachers or budget-busting tuition costs. Whether the goal is to be fluent in a language (or ten languages), earn the equivalent of a college degree in a fraction of the time, or master multiple tools to build a product or business from the ground up, the principles in *Ultralearning* will guide you to success.

No Checkmate, Montessori Chess Lessons for Age 3-90+ National

Academies Press
Chess is a universal game played throughout the world. It is a game for everyone, not just the rich and well connected. This book is based on the lessons I did with my elementary level students in our chess club. I was amazed at how fast the five-year-old students learned to play chess and how they were able to get along and enjoy playing together. Children learn from scratch how to play chess. Each chess piece is described and is explained how to use.

Quizzes show how well the material is understood. Answers are provided at the end of each lesson. A BINGO GAME is included. The BINGO board and chess pieces are intended to be duplicated and cut out for each chess player. Questions and their answers are included. ENJOY!!!!

Total Chess iUniverse
Confused by esoteric chess terms like castling, forking, and making Luft? Can't tell whether you've got your opponent in check or checkmate? This

book will tell you everything you need to know to become a budding Kasparov, from the names of pieces and their movements to tactics and strategies, from advanced maneuvers to setting up chess tournaments and clubs where you can test your skills. Also covered: a history of chess, from its beginnings in ancient India to how it became the world's most played game; all the basics of the board and the pieces; elementary rules and object of the game;

famous openings and well-know tactics; sneak attacks and other tricky plays; exercises that explain strategies and chess-move annotations (often found in newspapers); and advice for using the Internet and computer programs to better your game and tips on starting a chess club or tournament.

[Learn Chess](#) Simon and Schuster Master the Ancient and Modern Game of Chess! Read this book for FREE on Kindle Unlimited – Order Now! When you

read *How to Play Chess*, you'll discover a fascinating world of the mind! This comprehensive and lengthy book explains how all the chess pieces move in simple, easy-to-understand language. You'll easily absorb the quirks of the game, such as the en passant rule and how important kings become in the later stages of play. From pawns to queens, you'll know exactly how to follow the rules – and make the most of your favorite strategies! *How to Play Chess* introduces

many popular beginner tactics you can use right away to impress your friends and improve your rankings. You'll discover the various strategies appropriate for each phase of the game—Beginning, Middle, and Endgame—and how to get an edge on your opponents! Inside, you'll learn about chess masters from long ago - and meet the new masters. From William Steinitz and Magnus Carlsen to Garry Kasparov and Bobby Fisher, the chess world has created many

fascinating and beautiful minds! This inspiring chess method for beginners helps you understand how to position your pieces in their “best squares” and create solid defenses. When it's time to go on the offensive, you'll enjoy thrilling attacks - and avoid your opponent's counter-attacks. It's time to win more games and have more fun!

Total Chess is your

complete guide to chess. It covers rules, strategies, tactics, and checkmates. Everything in chess comes in threes. Three simple strategies are presented for the opening, midgame, endgame, etc. Each lesson is brief and covers one concept in simple language that everyone can read and understand. Total Chess is ideal for children and adults of all levels. Whether your goal is to learn chess, play better chess, or teach chess to others, this is the book for you!

Chess Lessons New In Chess

Offers information to teachers, librarians, chess coaches, counselors, and parents on teaching chess to groups of children.

Winning Chess Chess for Schools

How can math magic surprise an audience

What is the "personality" of decimals and fractions?

What is the best order to teach integer operations?

What is the "fence law"?

Can we have two cosine laws? How can two words help us study trigonometry? What

function equals its inverse? These and many more topics are thoroughly explored in this book. Follow Dr. C as he takes you on a journey filled with unique cases and entertaining stories. Each of the 100 sections focuses on a different topic and introduces readers to an entirely new way of learning smart mathematics. This book represents the author's life-long teaching experience in three countries through which he developed his trademark style of

conveying complex concepts with ease. The book is written in two parts and closely follows math curriculum widely used in the US and Canada. Part 1 covers material from grade 1 to 8. Part 2 is developed for high school and up. Teachers teaching any grade can find it a useful tool while students will appreciate its light-hearted but insightful delivery as a reference.

Chess for Beginners

Learn Chess the Right WayBook 3: Mastering Defensive Techniques

THE POLGAR WAY TO BETTER CHESS! Learn Chess the Right Way is a five-volume chess puzzle book series aimed at the novice, beginner and intermediate level player, using the unique methods of the award-winning coach and former world champion Susan Polgar. It introduces the most important checkmate and material-winning tactics, as well as defensive techniques to the new chess player. Each of the five volumes will consist of over 500 puzzles. In Volume 3, you will be

introduced to 500 must-know defensive techniques. Each chapter will start with a few introductory examples and explanation about to what to look for in the puzzles that follow. In chapter 1, the task is to move an attacked piece. In each puzzle, there is only one good solution by moving the attacked piece to a safe square. In chapter 2, one of the kings is in check. The goal is to find the correct response. In chapter 3, a piece is attacked, but has no good square to which

to move. So, rather than moving the attacked piece(s), you will need to look for a way to protect it with another piece. In chapter 4, we focus on defensive ideas against a direct checkmate threat. In chapter 5, one side "defends" by counter-attacking. In chapters 6 and 7, you will be introduced to the game-saving techniques of drawing by stalemate or perpetual check. In chapter 8, the task is to catch a pawn that is about to promote. In chapter 9, a certain piece is about to

get "trapped." The task is to prepare for the attack and avoid material loss. Finally, in chapter 10, you can practice solving a variety of defensive ideas, with the goal to avoid or minimize material losses or being checkmated. With over 40 years of experience as a world-class player and coach, international grandmaster Susan Polgar has developed the most effective way to help young players and beginners - Learn Chess the Right Way. Let her show you the way to

understanding the most common and critical patterns and let her show you the way to becoming a better player. Learn Chess the Right Way! Robinson First released in the Spring of 1999, How People Learn has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for

research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do with curricula, classroom settings, and teaching methods--to help children learn most effectively?

New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. *How People Learn* examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth

learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of

community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education. [Learn Chess the Right Way](#) SCB Distributors An eight-time national chess champion and world champion martial artist shares the lessons he has learned from two very different competitive arenas, identifying key principles about learning and performance that readers can apply to their life goals. Reprint. 35,000 first printing.

The Magic of Chess Tactics 2 Hachette UK
 A children's step-by-step visual guide to the rules, skills, and techniques of chess-by International Master and renowned chess tutor Michael Basman. From the history of chess and the aim of the game to essential tactics and taking it even farther in clubs, tournaments, and championships, Chess for Kids covers it all. Before explaining techniques, the ebook details each piece-pawns, bishops, the king, and more-to ensure kids

have a comprehensive understanding before they begin to play. Chess board graphics illustrate different scenarios and support the text explanations so readers can visualize different moves and their potential outcomes as they go. Let Chess for Kids and International Master Michael Basman turn you into a champion chess player.

Alpha Teach Yourself Chess in 24 Hours SCB Distributors
 Presents strategies for parents wishing to teach

chess to their children, providing step-by-step instructions to the game and featuring several illustrated mini-games that highlight the importance of each piece.

THE ART OF LEARNING

John Wiley & Sons
 -- Co-author Paul Truong is a five-time National Chess Champion of Vietnam and is currently the reigning US Open Blitz Chess Champion. Grandmaster Susan Polgar is the Women's World Chess Champion and former #1 ranked

woman in the world of chess. -- There are few books more comprehensive than Alpha Teach Yourself Chess in 24 Hours or any that will have as broad-based an appeal to both beginning, intermediate, and tournament-ready players -- The U.S. Chess Federation has 88,000 registered members at all levels of experience. There are nearly 2,000 USCF-affiliated chess clubs, and more than 100,000 chess players participate in USCF events every year. The official

publication, Chess Life, is distributed nationally every month to more than 250,000 readers. The origins of chess are still a matter of much debate -- some believe the world's most popular board game originated in India; others claim it was created in China in the Sixth century, A.D. One thing is clear, however: chess is a game that transcends languages and borders and nationalities. Alpha Teach Yourself Chess in 24 Hours is a clear, concise, and fully comprehensive guide to

learning this challenging but vastly enjoyable game. The book takes the beginner through the basics (rules, value of chess pieces, etc.) and takes the reader step by step until they are ready to tackle their first tournament. Along the way, the reader will learn basic chess middle games, basic chess endgames, and all the facets necessary to understand the different levels. This book will be a must for the beginner, the intermediate, or even those who know the chess

but would like to brush up on their game.

How People Learn John Wiley & Sons

Tactical Fireworks! When released in 2002, the first volume of *The Magic of Chess Tactics* by FIDE Master Claus Dieter Meyer and German Grandmaster Karsten Müller was extremely popular. It was one of the first books to deal with tactics on high level. Like the first book, intended for advanced (Elo 1800+) players, this second volume puts special tactical motifs and themes under the analytical microscope.

Complicated tactics - the kind that separate tournament winners from the pack - require intuition, imagination and precision. The focus in this book is on attacking techniques and transformations. The contents include: Attacking with the Queen and Knight; The Knight on the Attack; Attacking with Bishops of Opposite Colors; Pins; Learn from the World Champions; and Exchanges & Transformations. The reader will find the analysis comprehensive

and challenging. Dozens of exercises help reinforce the reader's understanding of this complex subject matter. So, roll up your sleeves and prepare to ride herd on tactical fireworks and sharpen your tactical skills.

THE POLGAR WAY TO
BETTER CHESS! Learn
Chess the Right Way is a
five-volume chess puzzle
book series aimed at the
novice, beginner and

intermediate level player, using the unique methods of the award-winning coach and former world champion Susan Polgar. It introduces the most important checkmate and material-winning tactics, as well as defensive techniques to the new chess player. Each of the five volumes will consist of 500 puzzles. In Book 1, the focus is on one-move checkmate exercises. In each of the first five chapters, a specific piece delivers checkmate (in Chapter 1 - the queen, Chapter 2 - the rook, and

so on). In Chapters 6-8, checkmates which involve special tactics (such as pins, discovered attacks, etc.) are introduced. Chapter 9 has a mixed collection of puzzles, without any hint about which piece is to deliver checkmate. Chapter 10 builds on the previous 9 chapters, and introduces basic patterns of checkmate in two moves. With over 40 years of experience as a world-class player and coach, international grandmaster Susan Polgar has developed the most

effective way to help young players and beginners – Learn Chess the Right Way. Let her show you the way to understanding the most common and critical patterns and let her show you the way to becoming a better player. SUSAN POLGAR is a winner of four Women’s World Championships and the

top-ranked woman chess player in the United States. She became the #1 woman player in the world at 15 and remained in the top 3 for over 20 years. In 2013, she received the U.S. Coach of the Year Award and the following year, she was named the Chess Trainer of the Year by the International Chess

Federation (FIDE). She thus became the first person in history to be accorded both honors. Under her guidance, SPICE chess teams at both Texas Tech University and Webster University have won a combined five consecutive National Division I Collegiate Chess Championships.
