Endocrine System - ICSE Class 10th
Biology(Part 1)Chapter 10 Endocrine
 System StudyIn this system, an
 adequate level of a hormone in the blood
 automatically stops the release of
 additional hormone (somewhat like a
 thermostat). As the blood level of the
 hormone decreases, the gland is
 stimulated to secrete more of it. Another
 control mechanism is the production of
 two different hormones whose actions
 are opposite to each other.Chapter 10:
 Endocrine System Flashcards |

QuizletThe endocrine system is a
 biochemical communication network
 through which several small glands
 control a broad range of vital body
 activities. Maintain the internal
 environment (homeostasis). The major
 endocrine glands are the: Pituitary-
 located in brainChapter 10: Endocrine
