MERENSTEIN & GARDNER'S HANDBOOK OF NEONATAL INTENSIVE CARE - E-BOOK

Lippincott Williams & Wilkins

A comprehensive international collection of writings on music therapy with premature and newborn infants in Neonatal Intensive Care Units. The book includes different approaches to research and clinical practice, based on interdisciplinary knowledge and current research. The purpose is to show the benefits of music and music therapy as a supportive intervention for hospitalized infants and their parents, by addressing the short and long-term development of the infant, infant-parent relationships and bonding, and the infant's unfolding ability to communicate.

Cumulated Index Medicus Springer Publishing Company

This benchmark handbook for neonatal nurse practitioners describes the most common conditions and procedures in an easy-to-access streamlined format. This thoroughly revised third edition continues to promote the foundational principles of evidence-based nursing practice worldwide, while taking the resources and requirements of different practice settings into account. It delivers updated information on trauma-informed care and offers new sections on parent perspectives about transition to home, neonatal opioid withdrawal syndrome (NOWS), and therapeutic hypothermia. Designed with a logical organization, Neonatal Nursing Care Handbook, Third Edition features brief narratives and plentiful illustrations and charts. This quick reference is easily used by English-as-second-language nurses and can be conveniently stored in a pocket for on-the-go referral. Part I uses a systems approach to address management of disorders related to each body system. All chapters include a brief definition of the neonatal problem, followed by diagnostic tests and labs. Part II encompasses special care considerations such as nutrition, surgical care, and palliative care. Part III discusses widely seen procedures and diagnostic tests, complete with lab values. Appendices contain additional useful content on weights and temperatures, common abbreviations, and pertinent web resources. New to the Third Edition: Addresses trauma-informed care Additional Content On: Generalized nursing care regarding respiratory, cardiovascular, gastrointestinal, renal, and hematologic/immune systems Bottle feeding Oral/Nasogastric/Gastrointestinal Tube Feedings Parent perspective on the transition home/primary care High frequency ventilation and new techniques Neonatal Abstinence Syndrome (NAS) and Neonatal Opioid Withdrawal (NOW) Total body cooling/therapeutic hypothermia Key Features: Written by neonatal nurses and other health professionals for neonatal nurses Assists neonatal nurses in making sound clinical decisions Provides streamlined, well-organized format for quick information retrieval Written in brief narratives supported by illustrations, diagrams, and flow charts Easily understandable to English-as-second-language nurses Covers diagnostic tests and lab values and includes medication guide

Pediatric Physical Therapy Elsevier Health Sciences

"Simulation is an educational tool used in both academic and clinical settings, yet its value is under-explored. Simulation can provide hands-on learning experiences when real-world opportunities rarely occur, cost too much, or put patients at unnecessary risk. A significant need was identified in the Neonatal Intensive Care Unit (NICU) orientation program at a large Midwestern hospital when new orientees felt unconfident in handling their staff nurse role at the end of orientation. Simulation curriculum was developed to enhance the orientation program."--leaf 4.

Developmental Care of Newborns & Infants Elsevier Health Sciences

Using a problem-solving approach based on clinical evidence, Neurological Rehabilitation, 6th Edition covers the therapeutic management of people with functional movement limitations and quality of life issues following a neurological event. It reviews basic theory and covers the latest screening and diagnostic tests, new treatments, and interventions commonly used in today's clinical practice. This edition includes the latest advances in neuroscience, adding new chapters on neuroimaging and clinical tools such as virtual reality, robotics, and gaming. Written by respected clinician and physical therapy expert Darcy Umphred, this classic neurology text provides problem-solving strategies that are key to individualized, effective care. UNIQUE! Emerging topics are covered in detail, including chapters such as Movement Development Across the Lifespan, Health and Wellness: The Beginning of the Paradigm, Documentation, and Cardiopulmonary Interactions. UNIQUE! A section on neurological problems accompanying specific system problems includes hot topics such as poor vision, pelvic floor dysfunction, and pain. A problem-solving approach helps you apply your knowledge to examinations, evaluations, prognoses, and intervention strategies. Evidence-based research sets up best practices, covering topics such as the theory of neurologic rehabilitation, screening and diagnostic tests, treatments and interventions, and the patient's psychosocial concerns Information. Case studies use real-world examples to promote problem-solving skills. Non-traditional approaches to neurological interventions in the Alternative and Complementary Therapies chapter include the movement approach, energy approach, and physical body system approaches therapies. Terminology adheres to the best practices of the APTA as well as other leading physical therapy organizations, following The Guide to Physical Therapy Practice, the Nagi model, and the ICF World Health Model of patient empowerment. Updated illustrations provide current visual references. NEW chapters on imaging and robotics have been added. Updated chapters incorporate the latest advances and the newest information in neuroscience and intervention strategies. Student resources on an Evolve companion website include references with links to MEDLINE and more. Medical or hio- ethics has in recent years been a growth industry. Journals, Centers and Associations devoted to the subject proliferate. Medical schools seem increasingly to be filling rare positions in the humanities and social sciences with ethicists. Hardly a day passes without some media scrutiny of one or another ethical dilemma resulting from our new-found ability to transform the natural conditions of life. Although bioethics is a self-consciously interdisciplinary field, it has not attracted the collaboration of many social scientists. In fact, social scientists who specialize in the study of

medicine have in many cases watched its development with a certain ambivalence. No one disputes the significance and often the painfulness of the issues and choices being addressed. But there is something about the way these issues are usually handled which seems somehow inappropriate if not wrong-headed to one trained in a discipline like sociology or history. In their analyses of complex situations, ethicists often appear grandly oblivious to the social and cultural context in which these occur, and indeed to empirical referents of any sort. Nor do they seem very conscious of the cultural specificity of many of the values and procedures they utilize when making ethical judgments. The unease felt by many in the social sciences was given articulate expression in a paper by Renee Fox and Judith Swazey which appeared in 1984.

Fast Facts for the Neonatal Nurse Springer Publishing Company

This textbook is written in line with the Council of International Neonatal Nurses, Inc. (COINN) vision for global unity for neonatal nursing. The core values and goals of COINN are based on excellence and advocacy for high quality newborn care, as well as respecting diversity by integrating cultural norms and values among the care of newborns and their families. The book promotes neonatal nursing as a global speciality through evidence, research, and education of neonatal nurses; and offers key examples of the millennium goals and global outcomes, as well as variations in outcomes for babies. The first part focuses on global perspectives of neonatal nursing from different continents aligning with the World Health Organizations' global regions: (The Americas -USA, Canada and South America-, Western Pacific region -Australia and New Zealand-, European region -UK and Europe-, African region, South-East Asia and Eastern Mediterranean region. For each region, education and competencies, challenges and opportunities, research and evidence-based practice (EBP) as well as practice regulations are described. The second part elaborates on key topics for neonatal nursing across the globe, such as the continuity of neonatal care in the community, patient and family centered care in neonatal settings, sleep and brain development, the fundamental care needs of the neonate and family and global perspectives on hypothermia, hypoglycaemia and hypoxia. Written in a formal academic but reader style, using key literature and evidence, this textbook enables an understanding from a large audience with academic levels and experience, both staff and students, bedside nurses, advanced practice nurses, midwives and allied professionals. In addition, first person story based reflective narrative are interspersed throughout the book to capture the perspectives of nurses, staff and parents, in the form of vignettes. This textbook is aimed at neonatal nurses across the world as well as current and aspiring students in this field.

Value by Design Hcpro, a Division of Simplify Compliance

Merenstein & Gardner's Handbook of Neonatal Intensive Care, 8th Edition, is the leading resource for collaborative, interprofessional critical care of newborns. Co-authored by physicians and nurses, it offers concise, comprehensive coverage with a unique multidisciplinary approach and real-world perspective that make it an essential guide for both neonatal nurses and physicians. The 8th edition features the latest neonatal research, evidence, clinical guidelines, and practice recommendations - all in a practical quick-reference format for easy retrieval and review of key information. UNIQUE! Multidisciplinary author and contributor team consists of two physicians and two nurses, with each chapter written and reviewed by a physician-nurse team to ensure that information mirrors current, real-world practice in a neonatal intensive care unit. Critical Findings boxes and tables outline symptoms and diagnostic findings that require immediate attention, helping you prioritize assessment data and steps in initial care. UNIQUE! Clinical content highlighted in color allows you to quickly scan for information that directly affects patient care. UNIQUE! Parent Teaching boxes highlight relevant information to share with a patient's caregivers. Clinical images, graphs, and algorithms illustrate clinically relevant concepts in neonatal intensive care. Streamlined references include only the most current or classic sources. NEW! Coverage of the latest neonatal research, evidence, clinical guidelines, and practice recommendations addresses topics such as: women with chronic illnesses becoming pregnant; maternal obesity; hypotension and shock in premature infants; pain and sedation; dedicated feeding sets vs. IVs for safety; MRSA; pediatric stroke; autism screening; discharge coordination; and more. NEW! The latest AAP recommendations and guidelines for hypoglycemia, jaundice, herpes, respiratory syncytial virus, and neonatal transport team composition. EXPANDED! Revised Evidence-Based Clinical Practice chapter focuses on evidence-based practice and quality improvement and the role of qualitative research in EBP. EXPANDED! Updated Infection in the Neonate chapter features new GBS guidelines and CRP research.

Merenstein & Gardner's Handbook of Neonatal Intensive Care Elsevier Health Sciences

Value by Design is a practical guide for real-world improvement in clinical microsystems. Clinical microsystem theory, as implemented by the Institute for Healthcare Improvement and health care organizations nationally and internationally, is the foundation of high-performing front line health care teams who achieve exceptional quality and value. These authors combine theory and principles to create a strategic framework and field-tested tools to assess and improve systems of care. Their approach links patients, families, health care professionals and strategic organizational goals at all levels of the organization: micro, meso and macrosystem levels to achieve the ultimate quality and value a health care system is capable of offering.

COMPREHENSIVE NEONATAL NURSING CARE

Elsevier Health Sciences

Co-authored by an interprofessional collaborative team of physicians and nurses, Merenstein & Gardner's Handbook of Neonatal Intensive Care, 9th Edition is the leading resource for interprofessional, collaborative care of critically ill newborns. It offers comprehensive coverage with a unique interprofessional collaborative approach and a real-world perspective that make it a practical guide for both nurses and physicians. The new ninth edition features a wealth of expanded content on delivery-room care; new evidence-based care "bundles"; palliative care in the NICU; interprofessional collaborative care of parents with depression, grief, and complicated grief; and new pain assessment tools. Updated high-quality references have also been reintegrated into the book, making it easier for clinicians to locate research evidence and standards of care with minimal effort. These additions, along with updates throughout, ensure that clinicians are equipped with the very latest clinical care guidelines and practice recommendations — all in a practical quick-reference format for easy retrieval and review. UNIQUE! Core author team of two physicians and two nurses gives this internationally recognized reference a true interprofessional collaborative approach that is unmatched by any other resource. Consistent organization within clinical chapters include Physiology/Pathophysiology, Etiology, Prevention, Data Collection (History, Signs and Symptoms, and Laboratory Data), Treatment/Intervention, Complications, and Parent Teaching sections. UNIQUE! Color-highlighted point-of-care

clinical content makes high-priority clinical content quick and easy to find. UNIQUE! Parent Teaching boxes outline the relevant information to be shared with a patient's caregivers. Critical Findings boxes outline symptoms and diagnostic findings that require immediate attention to help the provider prioritize assessment data and steps in initial care. Case studies demonstrate how to apply essential content to realistic clinical scenarios for application-based learning. NEW! Updated content throughout reflects the latest evidence-based practice, national and international guidelines, and current protocols for interprofessional collaborative practice in the NICU. NEW! Up-to-date, high-quality references are now reintegrated into the text for quick retrieval, making it easier for clinicians to locate research evidence and standards of care with minimal effort. NEW! Expanded content on delivery-room care includes the impact of staffing on quality of care, delayed cord clamping, resuscitation, and more. NEW! Coverage of the new evidence-based care "bundles" keeps clinicians up to date on new guidelines that have demonstrated improved outcomes of very preterm infants. NEW! Coverage of new pain assessment tools equips NICU providers with essential resources for maintaining patient comfort. NEW! Expanded coverage of palliative care in the NICU provides the tools needed to ensure patient comfort. NEW! Expanded coverage of interprofessional collaborative care of parents with depression, grief, and complicated grief prepares clinicians for this essential area of practice.

Fast Facts for the Neonatal Nurse Springer Science & Business Media

The primary goals of neonatal transport are to provide early stabilization and initiation of advanced care at the referring institution, followed by establishment and continuation of critical care therapies, with seamless transitions without compromise in the level of care indistinguishable from that available in the Neonatal Intensive Care Unit. The success of the neonatal transport is dependent upon the availability of a competent trained skilled and equipped transport team, which can provide efficient and safe care for a variety of conditions of the sick or premature newborn. There is a wide variation in neonatal transport programs in terms of orientation, determination of readiness to function independently on transport, use of protocols to guide transport care and quality assurance. The cornerstone of good neonatal transport is competence in effective communication; access to, and efficient operation of equipment and use of technology; accurate assessment and stabilization of the critical newborn. Each transport program should include an orientation program that is individualized and includes educational opportunities to achieve and maintain competence, develop communication skills, increase expertise in the ability to assess, plan, implement, and evaluate actual and potential problems during the transport process. This comprehensive exam included an investigation of literature related to the history of neonatal transport; the multifaceted aspects of communication during the transport; care of the premature or sick newborn prior to and during the transport; and issues in current clinical practice and legal aspects of transport, including policies and procedures, evidence based practice guidelines, and competencies.

Stressed Out about Your First Year of Nursing John Wiley & Sons

Stressed Out About Your First Year of Nursing is a survival guide for new graduate nurses that steers you through the transition from student nurse to competent RN. Get the whole truth on what they didn't teach you in school and find out what to expect during your first year. Easy-to-read and full of sound advice, the book helps new graduates navigate through the first year on the job, from orientation and preceptors to communication and collaboration, including all the tips and tools you need to succeed.

Social Science Perspectives on Medical Ethics Lippincott Williams & Wilkins

A comprehensive examination of neonatal nursing management from a physiologic and pathophysiologic approach. The book features a complete physiologic and embryonic foundation for each neonatal system as well as coverage of associated risk factors, genetics, critical periods of development, nutrition and parenting.

Antenatal Orientation of High Risk Mothers to the Neonatal Intensive Care Unit and Its Effect on Maternal Anxiety and Self Esteem Elsevier Health Sciences

Update and empower your neonatal and newborn intensive care unit (NICU) nursing know-how, with the evidence-based Developmental Care of Newborns and Infants, 3rd Edition. This leading text on developmentally supportive care of infants and their families addresses the full spectrum of neonatal care, from prenatal planning to delivery, plus neonatal intensive care and the transition to home. A completely updated version of the respected National Association of Neonatal Nurses (NANN) publication, this is the definitive guide for learning current care standards, and the ideal foundation for neonatal nurses, students, and NICU nurses.

Neurological Rehabilitation - E-Book Fast Facts

Neonatal Respiratory Handbook is an excellent handbook which will illustrate the more common types of procedures that a respiratory therapist, new graduate or an experienced therapist would be expected to perform in the day-to-day operations of a highly specialized unit for children. This book is especially appropriate for respiratory students enrolled in a Neonatal/Pediatric class, particularly during their Neonatal and Pediatric rotation; Respiratory Educators and Residents, within a pulmonary medicine residency; and Respiratory graduates, orienting or completing their orientation in the Neonatal Intensive Care Unit (NICU) or Pediatric Intensive Care Unit (PICU). Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition.

Imaging the Developing Connectome of Perinatal Brain Jones & Bartlett Publishers

Perfect as a resource in the field or for exam preparation, this authoritative reference from the Association of Women's Health, Obstetric, and Neonatal Nurses (AWHONN) includes in-depth coverage of the most common neonatal disorders and their management. The concise outline format highlights the essentials of each condition including definition, etiology, pathophysiology, signs and symptoms, diagnostic tests, treatments, and outcomes to help you find important information quickly. This new edition also features an increased focus on evidence-based practice, new CAMTS and AAMS guidelines, new techniques for PICC placement, and changes to the Neonatal Resuscitation Program. All necessary information to prepare for the neonatal intensive care nursing certification examination is included. Concise outline format provides access to important nursing considerations associated with the management of the most common conditions in the neonate. Text provides a collaborative effort between the three most authoritative associations in neonatal intensive care nursing - AWHONN, AACN, and NANN. Information on families, ethics, legal issues,

research, case management, and the transition to home acknowledge the full scope of neonatal nursing practice. NEW! CAMTS and AAMS guidelines, techniques for PICC placement, and changes to the Neonatal Resuscitation Program are just a few of the updates that reveal the importance the new edition places on safety practices and procedures. NEW! Updated chapter on Patient Safety includes selected improvement strategies and resources for neonatal nurses to build a patient safety toolkit, discusses TeamSTEPPS (Team Strategies and Tools to Enhance Performance and Patient Safety), and recognizes human issues, such as shift work and fatigue. NEW! Increased focus on evidence-based practice for preterm infants, medications, and antepartum-intrapartum complications sets the standard for neonatal nursing practice. NEW! Strategies to promote inclusionary care better reflect nursing care today by focusing on family-centered care, comprehensive perinatal records, health care teams in the NICU, and best practices in the care of the late preterm infant. NEW! Comprehensively revised chapter on Immunology identifies risk factors for infection associated with term and preterm infants, distinguishes clinical symptoms and therapies associated with TORCHES CLAP spectrum infections, and includes prevention strategies for hospital-acquired infections. NEW! Thoroughly updated content and references reflect currency and technologic advances. NEW! Refocused chapter on Developmental Care guides the nurse to use assessment within the context of the environment and situation to initiate interventions in the moment or use patterns of responses for developing plans of care and presents core measures on evaluating developmental care practices in the NICU.

Neonatal Respiratory Care Handbook Little Brown

Issues in Neonatal, Perinatal, and Pediatric Research and Practice: 2012 Edition is a ScholarlyBrief™ that delivers timely, authoritative, comprehensive, and specialized information about Neonatology in a concise format. The editors have built Issues in Neonatal, Perinatal, and Pediatric Research and Practice: 2012 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Neonatology in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in Neonatal, Perinatal, and Pediatric Research and Practice: 2012 Edition has been produced by the world's leading scientists, engineers,

analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

Issues in Neonatal, Perinatal, and Pediatric Research and Practice: 2012 Edition Springer Publishing Company

Creating an amalgamation of nursing, education and philosophy is one of the distinctive features of this book. While each of these disciplines is well established in their academic endeavors, the book provides a unique voice of nursing in the analysis of philosophy's role in education. To that end, the book features nurses' critiques of leading philosophers who have very valuable lessons for health care education. Each chapter has been written to capture aspects of the heart, mind and soul of nursing as appreciated through an exploration of a foremost philosopher. The contributors investigate their scholar's history, the essential features and examination of their work and offer pragmatic discussion questions based upon their work. Personal transcendence of the authors occurred as an unexpected byproduct of their immersion with the philosophers. This book provides philosophical underpinnings of health care education that nurses, nursing educators, clinical specialists and general healthcare educators as well as academic faculty will appreciate.
