Forces and Motion Hodder Education

Mathematics is one of the most important life skills a person can have. Hence, it is essential that it is taught in a way which enables the student to gain an excellent foundation in maths and the skills needed to use maths in a wide variety of applications. This book aims to be an important aid in achieving this by providing over 500

problems with worked solutions at GCSE level, for the student to study. Solutions are given in detail, this is to enable the student to check their progress and understanding of the topic and to iron out any difficulties they may encounter. The book is organised in two volumes. The layout of the chapters is such that after a brief summary of the topic, the book goes onto provide a number of questions in each subject along with the worked solution. The questions chosen are intended to build the knowledge and skills needed for GCSE level maths. Finally the last chapter of the volume consists of typical questions and solutions that may arise in a GCSE maths exam.
