 A Cultural History of Peace
 presents an authoritative survey from ancient times to the present. The set of six volumes covers over 2500 years of history, charting the evolving nature and role of peace throughout history. This volume, *A Cultural History of Peace in Antiquity*, explores peace in the period from

500 BC to 800 AD. As with all the volumes in the illustrated *Cultural History of Peace* set, this volume presents essays on the meaning of peace, peace movements, maintaining peace, peace in relation to gender, religion and war and representation of peace. *A Cultural History of Peace in Antiquity* is the most authoritative and comprehensive survey available on peace in the

classical era.

RECENT DISCOVERIES BEARING ON THE ANTIQUITY OF MAN IN EUROPA

Thames & Hudson
 This work spans prehistory to 1500 CE, examining thousands of years of history in four world regions: Asia, Africa, Europe, and the Americas. Highlights of this period include the onset of civilization and science in Mesopotamia and Egypt, the

accomplishments of the ancient Greeks between 700 BCE and 100 CE, the adaptation of Greek science by the Romans, the spread of Greek science during the Hellenistic Age, the expansion of Islamic power and commensurate scientific knowledge, and the development of science and philosophy in ancient China and India. Focusing on the history of the science that

blossomed in the above regions, scientific disciplines covered include alchemy, astronomy, astrology, agriculture, architecture, biology, botany, chemistry, engineering, exploration, geography, hydraulics, institutions of science, marine science, mathematics, medicine, meteorology, military science, myth and religion, philosophy, philosophy of science,

psychology, physics, and social sciences. In all of these fields, theory and application are explored, as are leading individuals and schools of thought, centers of intellectual activity, and notable accomplishments and inventions. *Dynamics of a Changing Relationship* Routledge Traces the history of the city of Copan, and describes how new discoveries are shedding light on the city's collapse.

Aspects of Antiquity ABC-CLIO
 This book offers a counter-traditional account of the history of both rhetoric and poetics. In reply to traditional rhetorical histories, which view "rhetoric" primarily as an art of practical civic oratory, the book argues in four extended essays that epideictic-poetic eloquence was central, even fundamental, to the rhetorical

tradition in antiquity. In essence, Jeffrey Walker's study accomplishes what in the world of rhetoric studies amounts to a revolution: he demonstrates that in antiquity rhetoric and poetry could not be viewed separately. *Ideology and Literary Form in Ancient Greece* Aspects of Antiquity Discoveries And Controversies Lucid coverage of science and early natural philosophy:

Greek medicine, biology, mathematics, physics and astronomy; Roman and Latin science in late antiquity and early Middle Ages; Greek science in the age of Justinian; and more. A scholarly, nontechnical study that will appeal to anyone interested in the history of science. *Student-Centered and Transformative Teaching in Political Science* Viking Press
 Women in

<p>Frankish Society is a careful and thorough study of women and their roles in the Merovingian and Carolingian periods of the Middle Ages. During the 5th through 9th centuries, Frankish society transformed from a relatively primitive tribal structure to a more complex hierarchical organization. Suzanne Fonay Wemple sets out to understand the forces at</p>	<p>work in expanding and limiting women's sphere of activity and influence during this time. Her goal is to explain the gap between the ideals and laws on one hand and the social reality on the other. What effect did the administrative structures and social stratification in Merovingian society have on equality between the sexes? Did the emergence of the nuclear family and enforcement</p>	<p>of monogamy in the Carolingian era enhance or erode the power and status of women? Wemple examines a wealth of primary sources, such as deeds, testaments, formulae, genealogy, ecclesiastical and secular court records, letters, treatises, and poems in order to reveal the enduring German, Roman, and Christian cultural legacies in the Carolingian</p>
--	---	--

Empire. She attends to women in secular life and matters of law, economy, marriage, and inheritance, as well as chronicling the changes to women's experiences in religious life, from the waning influence of women in the Frankish church to the rise of female asceticism and monasticism.

Their Impact on Patristic Studies and the Contemporary World (Conference Proceedings

2nd International Conference on Patristic Studies)

London : Gollancz
 Abydos is one of the most important archaeological sites in Egypt, the burial place of the first kings of Egypt ,and a cult center of Osiris, god of the underworld and judge of the dead. Past archaeological finds in Abydos include the oldest surviving boats in the world, the earliest indications of

writing in Egypt, and a number of temples and tombs, many of which predate the first pyramids at Saqqara.

SAGE Publishing India
 This volume gathers brand new essays from some of the most respected scholars of ancient history, archaeology, and physical anthropology to create an engaging overview of the lives of women in antiquity. The book is

divided into ten sections, nine focusing on a particular area, and also includes almost 200 images, maps, and charts. The sections cover Mesopotamia, Egypt, Anatolia, Cyprus, the Levant, the Aegean, Italy, and Western Europe, and include many lesser-known cultures such as the Celts, Iberia, Carthage, the Black Sea region, and Scandinavia. Women's experiences are explored, from ordinary

daily life to religious ritual and practice, to motherhood, childbirth, sex, and building a career. Forensic evidence is also treated for the actual bodies of ancient women. Women in Antiquity is edited by two experts in the field, and is an invaluable resource to students of the ancient world, gender studies, and women's roles throughout history.

This is the first volume to offer a critical overview of the long and complicated history of translations of Virgil from the early modern period to the present day, transcending traditional studies of

single translations or particular national traditions in isolation to offer an insightful comparative perspective. The twenty-nine essays in this collection cover numerous European languages - from English, French, and German, to Greek, Irish, Italian, Norwegian, Slovenian, and Spanish - but also look well beyond Europe to include discussion of Brazilian, Chinese,

Esperanto, Russian, and Turkish translations of Virgil. While the opening two contributions lay down a broad theoretical and comparative framework, the majority conduct comparisons within a particular language and combine detailed case studies with in-depth contextualization and theoretical background, showing how the translations discussed are

embedded in their own cultures and historical moments. The final two essays are written from the perspective of contemporary translators, closing out the volume with a profound assessment not only of the influence exerted by the major Roman poet on later literature, but also why translation of a canonical author such as Virgil matters, not only as a national and transnational cultural phenomenon,

but as a personal engagement with a literature of enduring power and relevance. The Economic Decline of Empires Oxford University Press The book is divided into two parts. In the first, the reader is taken on an ideal 'world tour' of many wonderful and enigmatic places in almost every continent, in search of traces of astronomical knowledge and lore of the

sky. In the second part, Giulio Magli uses the elements presented in the tour to show that the fundamental idea which led to the construction of the astronomically-related giant monuments was the foundation of power, a foundation which was exploited by 'replicating' the sky. A possible interpretive model then emerges that is founded on the relationship the ancients

had with “nature”, in the sense of everything that surrounded them, the cosmos. The numerous monumental astronomically aligned structures of the past then become interpretable as acts of will, expressions of power on the part of those who held it; the will to replicate the heavenly plane here on earth and to build sacred landscapes. Finally, having formulated his hypothesis, Professor

Magli returns to visit one specific place in detail, searching for proof. This in-depth examination studies the most compelling, the most intensively studied, the most famous and, until recently, the most misunderstood sacred landscape on the planet - Giza, in Egypt. The archaeoastronomical analysis of the orientation of the Giza pyramids leads to the hypothesis

that the pyramids of Cheops and Chephren belong to the same construction project. Aspects of Antiquity Routledge "For Geoffrey Martin and his colleagues, the internationally acclaimed discovery of the tomb of Maya, Tutankhamun's treasurer, was the culmination of a painstaking ten-year search at Saqqara, the burial ground of Memphis, ancient capital of Egypt.

Maya had been one of the most important men during the boy-king's short reign. Exploration of his tomb, and those of other important officials in the necropolis, has opened a new chapter in our understanding of Egyptian society more than 3,000 years ago." -- P. [4] of cover. *The Oxford Handbook of Warfare in the Classical World* Bloomsbury Publishing Although most prevalent and obvious during the early decades of the Republic, the influence of classical antiquity on American politics persists even into the 21st century. This study tracks the movement of classicism throughout U.S. history and illustrates how the ancient Greeks and Romans continue to influence political theory and determine policy in the United States, from the education of the Founders to the War in Iraq. *Abydos* Oxford University Press This book is an anthology of the proceedings from the Second International Conference on Patristic Studies: "The Discoveries of Manuscripts from Late Antiquity: Their Impact on Patristic Studies and the Contemporary World". This event was held in San Juan, Argentina in March 2017. Time has an obvious lineal component

where past, present and future seem to play out inevitably on after the other.

However, time also has an enigmatic and reversible component by which the past can transform the present and future.

This mysterious aspect of time seems to have been revealed in the discoveries of the Manuscripts of Late Antiquity, manuscripts discovered during the 20th and 21st centuries. Apparently as

if by chance, complete libraries of manuscripts as well as individual documents of great importance for our understanding of historical authors and situations have come to light after having been buried for millennia. Just some examples are the incredible discoveries of the Nag Hammadi Gnostic library, the Dead Sea Scrolls, Origen of Alexandria's homilies, Augustine's

sermons. etc.

These manuscripts are not passive documents. They pose numerous questions to specialists from a diverse array of fields, demanding new evaluations of a past that was thought to be already understood and judged. This event attempted to answer these and other questions with careful scientific rigor, seeking answers that enrich our understanding of both the

specific field of Patristic Studies and the contemporary world in general. *The Hidden Tombs of Memphis* Random House LLC May it be the ancient or the modern, scientific discoveries and inventions have changed the course of history and paved the way we live. The book is a trip in time from the present to the antiquity, bringing forth some mindboggling scientific innovations

from different corners of the world. Every page is packed with colourful pictures and illustrations that give life to information and inspire a child for future discovery.

The Trade in the Living
Springer
Science & Business Media
Business and Polity
explores, through a variety of economic and political formations over the past two and a half millennia, right from the Greco-Roman

civilization to present day globalization, the behaviour of two power networks: those who control the levers of political power and those who engage themselves in wealth-generating activities. It traces the dynamics of interdependence between these two powerful networks and what happens when one or the other becomes more powerful. The rational and logical approach

taken by the author reveals the links that our modern state of affairs has with the experience of past civilizations-knowledge that can potentially enhance our ability to make informed decisions to shape the global future. Though the content is academic and interdisciplinary in scope and nature, its lucid presentation will appeal to a wide range of readers who are interested in

geopolitical issues and economic, political and business history. Marriage and the Cloister, 500 to 900 University of Pennsylvania Press Aspects of Antiquity Discoveries and Controversies Viking Press Aspects of Antiquity Discoveries and Controversies Kition Mycenae an and Phoenician Discoveries in Cyprus Europe's First Monumental Sculpture: New Discoveries at

Lepenski VirNew Discoveries Relating to the Antiquity of Man Women in Antiquity Real Women across the Ancient World Routledge **Mycenaean and Phoenician Discoveries in Cyprus** Taylor & Francis This book explores the politics of narco-killing and public attitudes to violence and death in the Mexican Drug War. It examines questions such as the culture of

human sacrifice, the religious principles that sanction egregious violence and most importantly the society's complex response strategies towards such violence. Primarily a philosophical reflection, this study nonetheless uses anthropological, architectural and sociological methods to provide an interdisciplinary explanation to the visceral,

commonplace violence taking place in contemporary Mexico.

NEW DISCOVERIES AT LEPENSKI VIR

SUNY Press
" The first general treatment of women in the ancient world to reflect the critical insights of modern feminism. Though much debated, its position as the basic textbook on women's history in Greece and Rome has hardly been challenged." --

Mary Beard, Times Literary Supplement. Illustrations.

SCRIBES, WARRIORS, AND KINGS

Oxford University Press
Macro-level study of the South Atlantic throughout the sixteenth and seventeenth centuries demonstrating how Brazil's emergence was built on the longest and most intense slave trade of the modern era. The seventeenth-century missionary

and diplomat Father Antônio Vieira once observed that Brazil was nourished, animated, sustained, served, and conserved by the "sad blood" of the "black and unfortunate souls" imported from Angola. In *The Trade in the Living*, Luiz Felipe de Alencastro demonstrates how the African slave trade was an essential element in the South Atlantic and in the ongoing cohesion of Portuguese

America, while at the same time the concrete interests of Brazilian colonists, dependent on Angolan slaves, were often violently asserted in Africa, to ensure men and commodities continued to move back and forth across the Atlantic. In exposing this intricate and complementary relationship between two non-European continents, de Alencastro has fashioned a new and challenging

examination of colonial Brazil, one that moves beyond its relationship with Portugal to discover a darker, hidden history. *Goddesses, Whores, and Wives, and Slaves* Cornell University Press
In this ambitious and venturesome book, Peter W. Rose applies the insights of Marxist theory to a number of central Greek literary and philosophical texts. He explores major points in the trajectory

from Homer to Plato where the ideology of inherited excellence—beliefs about descent from gods or heroes—is elaborated and challenged. Rose offers subtle and penetrating new readings of Homer's Iliad and Odyssey, Pindar's Tenth Pythian Ode, Aeschylus's Oresteia, Sophokles' Philoktetes, and Plato's Republic. Rose rejects the view of art as a mere reflection of social and political reality—a view that is characteristic not only of most Marxist but of most historically oriented treatments of classical literature. He applies instead a Marxian hermeneutic derived from the work of the Frankfurt School and Fredric Jameson. His readings focus on illuminating a politics of form within the text, while responding to historically specific social, political, and economic realities. Each work, he asserts, both reflects contemporary conflicts over wealth, power, and gender roles and constitutes an attempt to transcend the status quo by projecting an ideal community. Following Marx, Rose maintains that critical engagement with the limitations of the utopian dreams of the past is the only means to the realization of freedom in the present. Classicists and

their students, comparatists, Gods, Children
 literary and Marxist of Earth
 theorists, critics will find challenging
 philosophers, Sons of the reading.
