The kaleidoscopic political changes during the years covered by this volume include the rise and fall of the Crusader states, the expansion of the Mongol empire, the rise of the Mamluk sultanate and of its ultimate conquerors, the Ottomans. To all of these Professor Holt is a clear and skilful guide. He principally utilises, and to some extent reinterprets, the medieval Arabic sources, to present a picture which differs in important respects from the conventional western-orientated view.

*Teaching Social Studies to English Language Learners* provides readers with a comprehensive understanding of both the challenges that face English language learners (ELLs) and ways in which educators might address them in the social studies classroom. The authors offer context-specific strategies for the full range of the social studies curriculum, including geography, U.S. history, world history, economics, and government. These practical instructional strategies will effectively engage learners and can be incorporated as a regular part of instruction in any classroom. An annotated list of web and print resources completes the volume, making this a valuable reference to help social studies teachers meet the challenges of including all learners in effective instruction. Features and updates to this new edition include: • An updated and streamlined Part 1 provides an essential overview of ELL theory in a social studies specific-context. • "Teaching Tips" offer helpful suggestions and ideas for creating and modifying lesson plans to be inclusive of ELLs. • Additional practical examples and new pedagogical elements in Part 3 include more visuals, suggestions for harnessing new technologies, discussion questions, and reflection points. • New material that takes into account the demands of the Common Core State Standards, as well as updates to the web and print resources in Part 4.

This resource book is designed to assist teachers in implementing California's history-social science framework at the 10th grade level. The models support implementation at the local level and may be used to plan topics and select resources for professional development and preservice education. This document provides a link between the framework's course descriptions and teachers' lesson plans by suggesting substantive resources and instructional strategies to be used in conjunction with textbooks and supplementary materials. The resource book is divided into eight units: (1) "Unresolved Problems of the Modern World"; (2) "Connecting with Past Learnings: The Rise of Democratic Ideas"; (3) "The Industrial Revolution"; (4) "The Rise of Imperialism and

Colonialism: A Case Study of India"; (5) "World War I and Its Consequences"; (6) "Totalitarianism in the Modern World: Nazi Germany and Stalinist Russia"; (7) "World War II: Its Causes and Consequences"; and (8) "Nationalism in the Contemporary World." Each unit contains references. (EH)

*Social Studies, Grades 6-8 South and East Asia and the Pacific* McDougal Littell/Houghton Mifflin Islam is one of the most misunderstood concepts in the West. Myths and stereotypes surround it. This clear and penetrating volume helps readers to make sense of Islam. It offers a penetrating guide to the diversity and richness of contemporary knowledge about Islam and Muslim society. Throughout, the emphasis is upon the value of pluralistic approaches to Islam, rather than condensing complexity with unifying concepts such as `Orientalism'. Interdisciplinary in scope and organization, the book cuts through the bewildering and seemingly anarchic diversity of contemporary knowledge about Islam and Muslim society. The methodological difficulties and advantages of Western researchers focusing on Islam are fully documented. The book demonstrates how gender, age, status and `insider' / `outsider' status impacts upon research and inflects research findings.

In the spring of A.D. 587, John Moschos and his pupil Sophronius the Sophist embarked on a remarkable expedition across the entire Byzantine world, traveling from the shores of Bosphorus to the sand dunes of Egypt. Using Moschos's writings as his guide and inspiration, the acclaimed travel writer William Dalrymple retraces the footsteps of these two monks, providing along the way a moving elegy to the slowly dying civilization of Eastern Christianity and to the people who are struggling to keep its flame alive. The result is Dalrymple's unsurpassed masterpiece: a beautifully written travelogue, at once rich and scholarly, moving and courageous, overflowing with vivid characters and hugely topical insights into the history, spirituality and the fractured politics of the Middle East.

**Countries and Customs: TAAS Handbook with Answer Key** McDougal Littell/Houghton Mifflin Greg Malouf is widely admired as one of Australia's most innovative and influential chefs. His passion for the food of his Lebanese heritage, combined with his extensive travels, have led him to forge a modern Middle Eastern cuisine. Arabesque, co-written with Lucy Malouf, is a much-loved guide to the food of the Middle East. From apricots to cous cous, pomegranates to silverbeet, this book welcomes the stars of Arabic cooking into the modern kitchen with descriptions of the history and the role the ingredients play, information on selecting and using them, and exciting recipes.

The collection of 170 recipes is not slavish to tradition, but rather Greg's modern takes on the food he has grown up with. Seven-Vegetable Couscous is served with Onion Jam and Green Harissa Broth, and Salmon Kibbeh Nayeh is served with Saffron Yoghurt Cheese. Arabesque is a volume to treasure and a cookbook to read and enjoy while discovering new experiences in the kitchen. It is a must for anyone interested in new flavours, techniques and culinary history, and is a source of inspiration for professional chefs, keen home cooks and gourmets alike.

Contemporary anthropology has changed drastically in the new millennium, expanding beyond the anachronistic study of "primitive" societies to confront the burning social, economic, and political challenges of the day. In the process, anthropologists often bump up against issues that require them to take a public position--issues such as race and tolerance, health and well-being, food security, reconciliation and public justice, global terror and militarism, and media in the emerging global electronic community. In Public Anthropology, Edward J. Hecican provides readers with an opportunity to explore contemporary anthropological research as well as the more public issues that anthropologists must engage with as they conduct that research, while encouraging them to think about how involved anthropologists should be in these issues.

This book examines both history textbook controversies AND teaching historical controversy in Asian contexts. The different perspectives provided by the book's authors offer numerous insights, examples, and approaches for understanding historical controversy to provide a practical gold mine for scholars and practitioners. The book provides case studies of history textbook controversies ranging from treatments of the Nanjing Massacre to a comparative treatment of Japanese occupation in Vietnamese and Singaporean textbooks to the differences in history textbooks published by secular and Hindu nationalist governments in India. It also offers a range of approaches for teaching historical controversy in classrooms. These include Structured Academic Controversy, the use of Japanese manga, teaching controversy through case studies, student facilitated discussion processes, and discipline-based approaches that can be used in history classrooms. The book's chapters will help educational researchers and curricularists consider new approaches for curriculum design, curriculum study, and classroom research.

Precalculus is adaptable and designed to fit the needs of a variety of precalculus courses. It is a comprehensive text that covers more ground than a typical one- or two-semester college-level precalculus course. The content is organized by clearly-defined learning objectives, and includes worked examples that demonstrate problem-solving approaches in an accessible way. Coverage and Scope Precalculus contains twelve chapters, roughly divided into three groups. Chapters 1-4 discuss various types of functions, providing a foundation for the remainder of the course. Chapter 1: Functions Chapter 2: Linear Functions Chapter 3: Polynomial and Rational Functions Chapter 4: Exponential and Logarithmic Functions Chapters 5-8 focus on Trigonometry. In Precalculus, we approach trigonometry by first introducing angles and the unit circle, as opposed to the right triangle approach more commonly used in College Algebra and Trigonometry courses. Chapter 5: Trigonometric Functions Chapter 6: Periodic Functions Chapter 7: Trigonometric Identities and Equations Chapter 8: Further Applications of Trigonometry Chapters 9-12 present some advanced Precalculus topics that build on topics introduced in chapters 1-8. Most Precalculus syllabi include some of the topics in these chapters, but few include all. Instructors can select material as needed from this group of chapters, since they are not cumulative. Chapter 9: Systems of Equations and Inequalities Chapter 10: Analytic Geometry Chapter 11: Sequences, Probability and Counting Theory Chapter 12: Introduction to Calculus

Based on expert review and research, this book provides an innovative standard and guide to

social studies textbooks used in kindergarten through 12th grade classrooms for content, style, and design. The standards provide a foundation for individuals to select satisfactory textbooks and to help educators and school boards in the adoption of instructional materials. Chapter 1 addresses the problems of textbook content and style. Chapter 2 discusses the vast business of social studies publishing and the increased complexity of textbook packaging with the movement away from state-level adoption of textbooks. Chapter 3 focuses on the content of social studies textbooks with a comparison of past and present textbooks, a discussion of revisionism and reality, and a look at religion in textbooks. Chapter 4 examines the style and story of textbooks and finds that although the content of past textbooks may be flawed, the prose is superior to recent textbooks. Ideas on narrative, readability, vocabulary, instructional design, history, and style provide ways for textbooks to improve. Chapter 5 addresses the issue of format and proposes clarity and simplicity in technical design of books. Chapter 6 provides an outline to review textbooks for content and style and instructional activities and teacher guidance materials for usefulness. Chapter 7 includes an annotated list of the major U.S. and world history textbooks. (CK)
