Police Response to Riots
National Academies Press
Civil services are one of the most famous and respectable career options among the youth. Civil Service is the only body of government officials who are employed in civil occupations that are neither political nor judicial. Public Service Commissions of both central and state governments are the main recruiters of graduate civil service

aspirants. The Civil Servants look after the administration of the state. Their role is not only confined to administration. Implementation and adherence of rules and regulations in their jurisdiction comprise their main task.

Europe's New Fiscal Union
Routledge
The Euro-Crisis and the legal and institutional responses to it have had important constitutional implications on the architecture of the European Union (EU). Going beyond the existing literature, Federico Fabbrini's book takes a broad look and examines how the crisis and its aftermath have changed relations of power in the EU, disaggregating three different dimensions: (1) the vertical relations of

power between the member states and the EU institutions, (2) the relations of power between the political branches and the courts, and (3) the horizontal relations of power between the EU member states themselves. The first part of the book argues that, in the aftermath of the Euro-crisis, power has been shifting along each of these axes in paradoxical ways. In particular, through a comparison of the United States, Fabbrini reveals that the EU is nowadays characterized by a high degree of centralization in budgetary affairs, an unprecedented level of judicialization of economic questions, and a growing imbalance between the member states in the governance of fiscal matters. As the book makes clear, however, each of these dynamics is a cause for concern - as it calls into question important constitutional values for the EU, such as the autonomy of the member states in taking decision about taxing and spending, the preeminence of the political process in settling economic matters, and the balance between state power and

state equality. The second part of the book, therefore, devises possible options for future legal and institutional developments in the EU which may revert these paradoxical trends. In particular, Fabbrini considers the ideas of raising a fiscal capacity, restoring the centrality of the EU legislative process, and reforming the EU executive power, and discusses the challenges that accompany any further step towards a deeper Economic and Monetary Union.

CASE STUDIES FROM FRANCE, LONDON, FERGUSON, AND BALTIMORE

John Wiley & Sons
The euro crisis made Europe's stateless currency falter. This book retraces and interprets the ways in which the crisis impacted the unique institutional set-up of Europe's Economic and Monetary Union (EMU). It argues that the crisis propelled the European continent towards the institutionalization of an unprecedented form of centralized authority: Europe's New Fiscal Union. Diving into the central functions of fiscal surveillance, financial

assistance, lending of last resort and banking resolution, the book reveals how a covert and convoluted mutualisation process occurred in the shadow of the euro crisis management. Based on 62 interviews conducted by the author with senior policy-makers in Brussels, Frankfurt, Helsinki and Rome, the book claims that Europe's New Fiscal Union is largely unsettled and still unstable. It therefore engages with the challenges arising from the patchwork of newly adopted rules, instruments and bodies, suggesting crucial reform steps to make EMU sustainable.

The onset of the 2004 EU enlargement witnessed a number of predictions being made about the approaches, capacity and ability of Central

European judges who were soon to join the Union. Optimistic voices, foreshadowing the deep transformative power that Europe was bound to exercise with respect to the judicial mentality and practice in the new

Member States, were intertwined with gloomy pictures of post-Communist limited formalism and mechanical jurisprudence that could not be reformed, which were likely to undermine the very foundations of mutual trust and recognition the judicial system of the Union is built upon. Ten years later, this volume revisits these predictions and critically assesses the evolution of Central

European judicial mentality, institutions and constitutionality under the influence of the EU membership. Comparatively evaluating the situation in a number of Central European Member States in their socio-legal contexts,

notably Poland, the Czech Republic, Slovakia, Hungary, Slovenia, Bulgaria and Romania, the volume offers unique insights into the process of (non) Europeanisation of national legal systems and cultures.

The conflict in Ukraine and Russia's annexation of Crimea has undoubtedly been a pivotal moment for policy makers and military planners in Europe and beyond. Many analysts see an unexpected character in the conflict and expect negative reverberations and a long-lasting period of turbulence and uncertainty, the delegitimation of international institutions and a declining role for global norms and rules. Did these events bring substantial correctives and modifications to the extant conceptualization of International Relations?

Does the conflict significantly alter previous assumptions and foster a new academic vocabulary, or, does it confirm the validity of well-established schools of thought in international relations? Has the crisis in Ukraine confirmed the

vitality and academic vigour of conventional concepts? These questions are the starting points for this book covering

conceptualisations from rationalist to reflectivist, and from quantitative to qualitative. Most contributors agree that many of the old concepts, such as multi-polarity, spheres of influence, sovereignty, or even containment, are still cognitively valid, yet believe the eruption of the crisis means that they are now used in different contexts and thus infused with different meanings. It is these multiple, conceptual languages that the volume puts at the centre of its analysis. This text will be of great interest to students and scholars studying international relations, politics, and Russian and Ukrainian studies.

In this new volume, Michael A. Pagano curates essays focusing on the neighborhood's role in urban policy solutions. The papers emerged from dynamic discussions among policymakers, researchers, public intellectuals, and citizens

at the 2014 UIC Urban Forum. As the writers show, the greater the city, the more important its neighborhoods and their distinctions. The topics focus on sustainable capital and societal investments in people and firms at the neighborhood level. Proposed solutions cover a range of possibilities for enhancing the quality of life for individuals, households, and neighborhoods. These include everything from microenterprises to factories; from social spaces for collective and social action to private facilities; affordable housing and safety to gated communities; and from neighborhood public education to cooperative, charter, and private schools. Contributors: Andy Clarno, Teresa Córdova, Nilda Flores-González, Pedro A. Noguera, Alice O'Connor, Mary Pattillo, Janet Smith, Nik Theodore, Elizabeth S. Todd-Breland, Stephanie Truchan, and Rachel Weber.

Integration, Crisis and Policies

Springer Nature Named one of Vulture's Top 10 Best Books of 2020! Leftist firebrand Fredrik deBoer exposes the lie at the heart of our educational system and demands top-to-bottom

reform. Everyone agrees that education is the key to creating a more just and equal world, and that our schools are broken and failing. Proposed reforms variously target incompetent teachers, corrupt union practices, or outdated curricula, but no one acknowledges a scientifically-proven fact that we all understand intuitively: Academic potential varies between individuals, and cannot be dramatically improved. In *The Cult of Smart*, educator and outspoken leftist Fredrik deBoer exposes this omission as the central flaw of our entire society, which has created and perpetuated an unjust class structure based on intellectual ability. Since cognitive talent varies from person to person, our education system can never create equal opportunity for all. Instead, it teaches our children that hierarchy and competition are natural, and that human value should be based on intelligence. These ideas are counter to everything that the left believes, but until they acknowledge the existence of individual cognitive differences, progressives remain complicit in keeping the status quo in place. This passionate, voice-driven

manifesto demands that we embrace a new goal for education: equality of outcomes. We must create a world that has a place for everyone, not just the academically talented. But we'll never achieve this dream until the Cult of Smart is destroyed.

Teaching Ethics through Literature provides in-depth understanding of a new and exciting shift in the fields of English education, Literature, Language Arts, and

Literacy through exploring their connections with ethics. The book pioneers an approach to integrating ethics in the teaching of literature. This has become increasingly relevant and necessary in our globally connected age. A key feature of the book is its integration of theory and practice. It begins with a historical survey of the emergence of the ethical turn in Literature education and grounds this on the ideas of influential Ethical Philosophers and Literature scholars. Most importantly, it provides insights into how teachers can engage students in ethical concerns and apply practices of Ethical Criticism using rich on-the-ground case studies of high school Literature teachers in Australia, Singapore and the United States.

This book offers a fresh perspective on the recent Eurozone "double crisis" and its related economic policies. The authors present empirical evidence which sheds new light on the growing economic and political debate on the future of

the Euro, the Eurozone and the EU. The book investigates and assesses the impact of the crisis with particular reference to monetary and fiscal policy, whose protracted austerity approach has dampened economic growth. In their discussion of the long-run European integration process, the authors emphasize the original weaknesses in the construction of the European Monetary Union and examine its failure to respond to the recent crisis. The concluding chapter focuses on the need for crucial reform in European governance and discusses the impact of the UK's recent EU membership referendum. Scholars, students and members of the general public with an interest in the future of the Eurozone will find this work thought-provoking, instructive and highly informative.

- The Transformative Power of the EU Revisited
 Georgetown University Press
 An effective and cost efficient protection of electronic system against ESD stress pulses specified by IEC 61000-4-2 is paramount for any system design. This pioneering book presents the collective knowledge of system designers and system testing experts and state-of-the-art techniques for achieving efficient system-level ESD protection, with minimum

impact on the system performance. All categories of system failures ranging from 'hard' to 'soft' types are considered to review simulation and tool applications that can be used. The principal focus of System Level ESD Co-Design is defining and establishing the importance of co-design efforts from both IC supplier and system builder perspectives. ESD designers often face challenges in meeting customers' system-level ESD requirements and, therefore, a clear understanding of the techniques presented here will facilitate effective simulation approaches leading to better solutions without compromising system performance. With contributions from Robert Ashton, Jeffrey Dunning, Micheal Hopkins, Pratik Maheshwari, David Pomerence, Wolfgang Reinprecht, and Matti Usumaki, readers benefit from hands-on experience and in-depth knowledge in topics ranging from ESD design and the physics of system ESD phenomena to tools and techniques to address soft failures and strategies to design ESD-robust systems that include mobile and

automotive applications. The first dedicated resource to system-level ESD co-design, this is an essential reference for industry ESD designers, system builders, IC suppliers and customers and also Original Equipment Manufacturers (OEMs). Key features: Clarifies the concept of system level ESD protection. Introduces a co-design approach for ESD robust systems. Details soft and hard ESD fail mechanisms. Detailed protection strategies for both mobile and automotive applications. Explains simulation tools and methodology for system level ESD co-design and overviews available test methods and standards. Highlights economic benefits of system ESD co-design.
