For many companies, Microsoft Dynamics GP is the core of their financial management system. Protecting against fraud, misstatements, and errors is a critical component of running Dynamics GP, sometimes though, it's hard to know where to start with security. This is a book about Dynamics GP security written to help users, administrators, and auditors better understand how to plan, implement, and audit GP security. Security books tend to be heavy on theory or application, rarely delving into both. The Microsoft Dynamics GP Security and Audit Field Manual is designed to help users understand sound control principles and how to apply them in GP.

Who will be responsible for making the decisions to include or exclude requested changes once Microsoft Dynamics GP is underway? Have all basic functions of Microsoft Dynamics GP been defined? Which customers can't participate in our Microsoft Dynamics GP domain because they lack skills, wealth, or convenient access to existing solutions? How do we ensure that implementations of Microsoft Dynamics GP products are done in a way that ensures safety? In the case of a Microsoft Dynamics GP project, the criteria for the audit derive from implementation objectives. an audit of a Microsoft Dynamics GP project involves assessing whether the recommendations outlined for implementation have been met. in other words, can we track that any Microsoft Dynamics GP project is implemented as planned, and is it working? Defining, designing, creating, and implementing a process to solve a business challenge or meet a business objective is the most valuable role... In EVERY company,

organization and department. Unless you are talking a one-time, single-use project within a business, there should be a process. Whether that process is managed and implemented by humans, AI, or a combination of the two, it needs to be designed by someone with a complex enough perspective to ask the right questions. Someone capable of asking the right questions and step back and say, 'What are we really trying to accomplish here? And is there a different way to look at it?' For more than twenty years, The Art of Service's Self-Assessments empower people who can do just that - whether their title is marketer, entrepreneur, manager, salesperson, consultant, business process manager, executive assistant, IT Manager, CxO etc... - they are the people who rule the future. They are people who watch the process as it happens, and ask the right questions to make the process work better. This book is for managers, advisors, consultants, specialists, professionals and anyone interested in Microsoft Dynamics GP assessment. Featuring 609 new and updated case-based questions, organized into seven core areas of process design, this Self-Assessment will help you identify areas in which Microsoft Dynamics GP improvements can be made. In using the questions you will be better able to: - diagnose Microsoft Dynamics GP projects, initiatives, organizations, businesses and processes using accepted diagnostic standards and practices - implement evidence-based best practice strategies aligned with overall goals - integrate recent advances in Microsoft Dynamics GP and process design strategies into practice according to best practice guidelines Using a Self-Assessment tool known as the Microsoft Dynamics GP Scorecard, you will develop a clear picture of which Microsoft Dynamics GP areas need attention. Included with your purchase of the book is the Microsoft Dynamics GP Self-Assessment downloadable resource, containing all 609 questions and Self-Assessment areas of this book. This helps with ease of (re-)use and enables you to import the questions in your preferred Management or Survey Tool. Access instructions can be found in the book. You are free to use the Self-Assessment contents in your presentations and materials for customers without asking us - we are here to help. The Art of Service has helped hundreds of clients to improve execution and meet the needs of customers better by applying business process redesign. Typically, our work generates cost savings of 20 percent to 30 percent of the addressable cost base, but its real advantages are reduced cycle times and increased quality and customer satisfaction.
