After years out of print, this new and redesigned book brings back the best and most complete history of the Women's Army Corps. Loaded with history, tables, charts, statistics, photos, personalities, and many useful appendices (including a history of WAC uniforms), *The Women's Army Corps, 1945-1978* is must reading for anyone who served those years in the Army as well as for those who want a complete history of the modern-day military. Author Bettie Morden served from 1942-1972 and she used her experience and access to people and records to compile the definitive reference work. Col. Morden is a graduate of the WAC Officers' Advanced Course (1962); Command and General Staff College (1964); and the Army Management School (1965). She has been awarded the Distinguished Service Medal, the Legion of Merit, the Joint Service Commendation Medal, and the Army Commendation Medal with Oak Leaf

Cluster.

A-Force Vol. 2 Government Printing Office Practical and comprehensive, this is the first book to focus on noncredible performance in clinical contexts. Experts in the field discuss the varied causes of invalidity, describe how to efficiently incorporate validity tests into clinical evaluations, and provide direction on how to proceed when noncredible responding is detected. Thoughtful, ethical guidance is given for offering patient feedback and writing effective reports. Population-specific chapters cover validity assessment with military personnel; children; and individuals with dementia, psychiatric disorders, mild traumatic brain injury, academic disability, and other concerns. The concluding chapter describes how to appropriately engage in legal proceedings if a clinical case becomes forensic. Case examples and sample reports enhance the book's utility. **A Night to Remember** OUP Oxford #1 New York Times Bestseller: The definitive book on the sinking of the Titanic, based on interviews with survivors, by the author of *The Miracle of Dunkirk*. At first, no one but the lookout recognized the sound. Passengers described it as the impact of a heavy

wave, a scraping noise, or the tearing of a long calico strip. In fact, it was the sound of the world's most famous ocean liner striking an iceberg, and it served as the death knell for 1,500 souls. In the next two hours and forty minutes, the maiden voyage of the Titanic became one of history's worst maritime accidents. As the ship's deck slipped closer to the icy waterline, women pleaded with their husbands to join them on lifeboats. Men changed into their evening clothes to meet death with dignity. And in steerage, hundreds fought bitterly against certain death. At 2:15 a.m. the ship's band played "Autumn." Five minutes later, the Titanic was gone. Based on interviews with sixty-three survivors, Lord's moment-by-moment account is among the finest books written about one of the twentieth century's bleakest nights.

Mountains Piled upon Mountains features nearly fifty writers from across Appalachia sharing their place-based fiction, literary nonfiction, and poetry. Moving beyond the tradition of transcendental nature writing, much of the work collected here engages current issues facing the region and the planet (such as hydraulic fracturing, water contamination, mountaintop removal, and deforestation), and provides readers with insights on the human-nature relationship in an era of rapid environmental change. This book includes a mix of new and recent creative work by established and emerging authors. The contributors write about experiences from northern Georgia to upstate New York, invite parallels between a watershed in West Virginia and one in North Carolina, and often emphasize connections between Appalachia and more distant locations. In the pages of *Mountains Piled upon Mountains* are celebration, mourning, confusion, loneliness, admiration, and other emotions and experiences rooted in

place but transcending Appalachia's boundaries.

A deeply felt, beautifully crafted meditation on friendship and loss in the vein of *A Year of Magical Thinking*, and a touching portrait of Philip Roth from his closest friend. I had a baseball question on the tip of my tongue: What was the name of "the natural," the player shot by a stalker in a Chicago hotel room? He gave me an amused look that darkened in-to puzzlement, then fear. Then he pitched forward into the soup, unconscious. When I entered the examining room twenty minutes after our arrival at Charlotte Hungerford Hospital, Philip said, "No more books." Thus he announced his retirement. So begins Benjamin Taylor's *Here We Are*, the unvarnished portrait of his best friend and one of America's greatest writers. Needless to say, Philip Roth's place in the canon is secure, but what is less clear is what the man himself was like. In *Here We Are*, Benjamin Taylor's beautifully constructed memoir, we see him as a mortal man, experiencing the joys and sorrows of aging, reflecting on his own writing, and doing something we all love to do: passing the time in the company of his closest friend. *Here We Are* is an ode to friendship and its wondrous ability to brighten our lives in unexpected ways. Benjamin Taylor is one of the most talented writers working today, and this new memoir pays tribute to his friend, in the way that only a writer can. Roth encouraged him to write this book, giving Taylor explicit instructions not to sugarcoat anything and not to publish it until after his death. Unvarnished and affectionately true to life, Taylor's memoir will be the definitive account of Philip Roth as he lived for years to come.

THE CULTURAL COLD WAR

Healthcare decision makers in search of reliable information that compares health interventions increasingly turn to systematic reviews for the best summary of the evidence. Systematic reviews identify, select, assess, and synthesize the findings of similar but separate studies, and can help clarify what is known and not known about the potential benefits and harms of drugs, devices, and other healthcare services. Systematic reviews can be helpful for clinicians who want to integrate research findings into their daily practices, for patients to make well-informed choices about their own care, for professional medical societies and other organizations that develop clinical practice guidelines. Too often systematic reviews are of uncertain or poor quality. There are no universally accepted standards for developing systematic reviews leading to variability in how conflicts of interest and biases are handled, how evidence is appraised, and the overall scientific rigor of the process. In *Finding What Works in Health Care* the Institute of Medicine (IOM) recommends 21 standards for developing high-quality systematic reviews of comparative effectiveness research. The standards address the entire systematic review process from the initial steps of formulating the topic and building the review team to producing a detailed final report that synthesizes what the evidence shows and where knowledge gaps remain. *Finding What Works in Health Care* also proposes a framework for improving the quality of the science underpinning systematic reviews. This book will serve as a vital resource for both sponsors and producers of systematic reviews of comparative effectiveness research.

A frail young girl flees a roaring forest fire in the middle of the night desperately taking refuge in a cave where she quickly loses consciousness. She wakes up in a strange, tiny village populated by fairy-like creatures. Her hosts seem intrigued by the sparkles of light that seem to surround her. The village chieftain explains that one of their hunters found her passed out in the forest and brought her back here for treatment. He asks who she is, but she remembers nothing except for a wall and flames. The chief is baffled by her tale as there has not been any fire in the forest lately, and yet the young woman does indeed show signs of burns. Somewhat recovered and dressed in woodland clothes made by the villagers, the young lady asks to meet the hunter who found her in the forest. She asks her savior to take her to where he found her, hoping that seeing the place will restore her memory. But Melissa refuses -- the rules of the village say that only hunters can enter the forest, and all of the sparkles surrounding the girl would catch the eyes of predators living in these woods... What follows is a tale of discovery, magic, tragedy, and adventure, as the girl discovers powers that may or may not be borne of an ancient evil. She befriends a cunning, talking wolf along the way, and

together the two set out on a journey that will not soon be easily forgotten. A beautifully illustrated, magical fairy tale sure to appeal to young teens and up, created by the award-winning team behind the world-renowned LOVE series of wordless wildlife graphic novels.

In light of cultural crises such as the Danish cartoon controversy and the terrorist attack on the Charlie Hebdo newspaper in Paris, Christopher Caldwell's incisive perspective has never been more timely or indispensable. *Reflections on the Revolution in Europe* is destined to become the classic work on how Muslim immigration permanently reshaped the West. This provocative and unflinching analysis of Europe's unexpected influx of immigrants investigates the increasingly prominent Muslim populations actively shaping the future of the continent. Muslims dominate or nearly dominate many important European cities, including Amsterdam and Rotterdam, Strasbourg and Marseille, the Paris suburbs and East London, and in those cities Islam has challenged the European way of life at every turn, becoming, in effect, an "adversary culture." In *Reflections on the Revolution in Europe*, Caldwell examines the anger of natives and newcomers alike. He exposes the strange ways in which welfare states interact with Third World customs, the anti-Americanism that brings European natives and Muslim newcomers together, and the arguments over women and sex that drive them apart. He considers the appeal of sharia, "resistance," and jihad to a second generation that is more alienated from Europe than the first, and addresses a crisis of faith among native Europeans that leaves them with a weak hand as they confront the claims of newcomers.
