Container homes are exactly what they sound like; homes made from the steel shipping containers that you see carrying goods everywhere on trains, trucks, and

ships. From these giant Lego blocks, people are building homes of all shapes and sizes. The purpose of this guide is to provide a detailed walk-through of each step of the process of shipping container selection, transport, foundation, utilities, modification, and finishing. In each chapter, one aspect of construction is explored in depth, beginning with the planning process and extending through to the completed home. Included in each chapter are pictures of each stage of construction, providing real-life examples

to help put the theory into tangible terms.

PLANS PUBLISHER Introduction to Shipping Container Homes: Shipping container homes are houses that are built using shipping containers. The strength, durability, availability, and the cost effectiveness of containers as building material has made these types of homes popular in recent years. When you buy a container, it might appear as hollow boxes with no windows or openings. However, these boxes are highly customizable; they can be stacked and welded together to create beautiful yet economical homes. The next section is about the pros and cons of living in a shipping container home.
