In this book, we can read about new technologies that enhance training and performance; discover new, exciting ways to design and deliver content; and have access to proven strategies, practices and solutions shared by experts. The authors of this book come from all over the world; their ideas, studies, findings and experiences are beneficial contributions to enhance our knowledge in the field of e-learning. The book is divided into three sections, and their respective chapters refer to three macro areas. The first section of the book covers Instructional Design of E-learning, considering methodology and tools for designing e-learning environments and courseware. Also, there are examples of effective ways of gaming and educating. The second section is about Organizational Strategy and Management. The last section deals with the new Developments in E-learning Technology, emphasizing subjects like knowledge building by mobile e-learning systems, cloud computing and new proposals for virtual learning environments/platforms.

OUT OF THE BLUE

"A hilarious and inspiring story of academy survival." The California Highway Patrol Academy is by far one of the toughest law enforcement training facilities in the world. Completing the rigorous six month curriculum is not an easy task and many people fail to graduate. Cadet Blues is the story of one cadet who is desperately trying to survive the experience so he can earn the right to wear the seven point badge and call himself an officer."-- Page [four] of cover.

Theory, practice and science Springer

Military academies have served youth for more than a century with proud traditions of producing graduates who are scholars, leaders, and athletes who adhere to a code of honor and ethical principles as they take the knowledge, skills, and dispositions gained at those academies into higher education, the business world, military service, civic endeavors, and the broader workforce. There is a current gap and need for research that explores the various components of a K-20 military school/college education and how those components successfully produce leaders of character for our military, civic, academic, and business worlds both in the United States and abroad. The Handbook of Research on Character and Leadership Development in Military Schools synthesizes research on the impact of military academies by providing a singular compendium of current academic studies on the graduates of military academies and the communities of which they enter after graduation. The chapters will explore the academics, leadership, character development, citizenship, athletics, and other dimensions of both global and national, and both private and public, military academies. This book is ideal for current leaders, staffs, governing board members, and alumni of military academies both in the United States and internationally along with policymakers, government officials, practitioners, researchers, academicians, and students interested in the implications of character and leadership development on individuals enrolled in or graduated from military schools.

A SELF-TEACHING GUIDE

IGI Global

Matty Cardarople here, I am a Space Cadet. I'm a student of the universe. This book is a small collection of spaced-themed original poetry. I love learning about new ways to live life more fully. This book is a reflection of how I live my life, and what I've learned along the way from my family, teachers, heroes, and friends. My intention in writing this book of poetry is for you to reflect on your own life and for you to follow your dreams without fear. I have loved poetry ever since high school. My English teacher Mr. Ferguson would have weekly readings and I'd always be there. It was the first way for me to really express myself as a human of the planet Earth, and I think poetry influenced me to become an actor. I hope this book motivates you to create your own art, gives you encouragement, and brings you some joy. You can also spread the lessons you have learned about the universe from this book to others. I'm happy you're here on planet Earth.

lifestyle.

Popular Mechanics

The United States Air Force Academy trains young men and women to be officers and pilots in the U.S. Air Force. The Academy has produced such great pilots as astronaut Susan J. Helms and airline captain Chesley Burnett Sully Sullenberger. But getting through the Academy can be difficult, and nearly half of the cadets who enter a new class leave before actually graduating four years later. Learn about the challenges presented to cadets by following one young man's experience as a member of the Class of 1980, the first class to have women in their ranks. Follow the obstacles and victories, the humor and the heartbreak of a cadet who had to leave the Academy before graduation.

Handbook of Research on Character and Leadership Development in Military Schools

The Niharsug Award for Science is rarely given. Adam has won it. With it he can choose his future. Rebelling against his parents, Adam follows his crib-mate, Evie, into the Fleet Academy. Once there he falls afoul of the Psychic Wing, the menacing new branch of Space Fleet, who has recruited Evie. He is determined to save her. But first he must save himself. The Psychics plan to usurp the throne of the Ancient of Days, leader of the Most High Federation of Planets, and Adam stands in their way.

Space Cadet

This research topic was first established in China by Professor Shengzhao Long in 1981, with direct support from one of the greatest modern Chinese

scientists, Xuesen Qian. In a letter to Shengzhao Long from October 22nd, 1993, Xuesen Qian wrote: "You have created a very important modern science subject and technology in China!" MMESE primarily focuses on the relationship between Man, Machine and Environment, studying the optimum combination of man-machine-environment systems. In this system, "Man" refers to working people as the subject in the workplace (e.g. operators, decision-makers); "Machine" is the general name for any object controlled by Man (including tools, machinery, computers, systems and technologies), and "Environment" describes the specific working conditions under which Man and Machine interact (e.g. temperature, noise, vibration, hazardous gases etc.). The three goals of optimization are to ensure "Safety, High efficiency and Economy" of man-machine-environment systems. These proceedings are an academic showcase of the best papers selected from more than 400 submissions, introducing readers to the top research topics and the latest developmental trends in the theory and application of MMESE. These proceedings are interdisciplinary studies on the concepts and methods of physiology, psychology, system engineering, computer science, environment science, management, education, and other related disciplines. Researchers and professionals who study an interdisciplinary subject crossing above disciplines or researchers on MMESE subject will be mainly benefited from these proceedings.

Popular Mechanics

A one-stop shop for many of the questions and concerns that cadets and junior officers have as they enter a career in the U.S. Army, the New Army Officer's Survival Guide: Cadet to Commission through Command is the advice-equivalent to a double espresso for junior Army officers; it's simple, it doesn't take long to get through, and it provides results. New Army Officer's Survival Guide: Cadet to Commission through Command comprises advice gained from the author's first-hand experiences in two separate Company Commands totaling over forty-one months paired with current Army resources and doctrine. Floeter covers many lessons that most officers learn the hard way as a means to help junior officers succeed. New Army Officer's Survival Guide: Cadet to Commission through Command provides an overview of Army ROTC, a detailed walkthrough of skills needed by Junior Officers across the Army, and a consideration of the intangible measures of successful Commanders, explaining techniques and possible leadership styles or methods to utilize in common situations. It wraps up with four Annexes: Useful gear for the field and office; officer branch and Basic Officer Leader Course information; common acronyms and phrases, and a list of each Punitive Article of the UCMJ. Levi J. Floeter combines dozens of resources into a single easily-readable volume that a cadet or junior officer can carry with them for reference. Floeter's crisp and clear writing style makes this book a great complement current to Army doctrine and regulations.
