#### THE THOUGHT OF RICHARD COBDEN, DAVID MITRANY, AND KENICHI OHMAE

Oxford University Press

Should governments be involved in economic affairs? Challenging prevailing wisdom about the benefits of self-regulating markets, Nina Bandelj and Elizabeth Sowers offer a uniquely sociological perspective to emphasize that states can never be divorced from economy. From defining property rights and regulating commodification of labor to setting corporate governance standards and international exchange rules, the state continuously manages the functioning of markets and influences economic outcomes for individuals, firms and nations. The authors bring together classical interventions and cutting-edge contemporary research in economic sociology to discuss six broad areas of economy/state connection: property, money, labor, firms, national economic growth, and global economic exchange. A wealth of empirical examples and illustrations reveals that even if the nature of state influence on economy varies across contexts, it is always dependent on social forces. This accessible and engaging book will be essential reading for upper-level students of economic sociology, and those interested in the major economic dilemmas of our times. .

Confederation may have established Canada's nationhood in 1867, but the relationships framing Canada's modern existence go back much further. Employing a unique socio-historical perspective, Canadian Society in the Twenty-First Century examines three formative relationships that have shaped the country: Canada and Quebec, Canada and the United States, and Canada and Indigenous nations. Now in its fourth edition, this engaging text offers students an overview of Canadian society through a series of connections rather than a collection of statistics. Trevor W. Harrison and John W. Friesen weave together complex aspects of the nation's economic, political, and socio-cultural development. They guide readers to use this interdisciplinary framework to consider some of the tough questions that Canada is likely to face in adjusting to demands and challenges in the next few decades. Reflecting the most current scholarship in the field, this revised edition features new discussions on issues such as the current crisis of neo-liberal globalization, Canada's petroleum industry, global warming, the Wet'suwet'en dispute in 2020, and the COVID-19 pandemic. *Goodbye American Dream?* MIT Press

This book provides a critical analysis of the liberal ideas of the decline of the state through a historical comparison. It takes special note of the implications of state failure to control economic growth and market exigencies for international relations. The book is divided into three sections. The first analyzes Cobden, Mitrany, and Ohmae's empirical claims, the second looks at their normative judgements and the third looks at their predictive assertions. It concludes that the three primarily propose normative arguments for less state involvement in economic and international relations but conceal them in empirical and predictive assertions. The liberal idea of the decline of the state is more of an ideological statement in response to political, social, and economic trends than an objective observation of an empirically verifiable fact.
