The Palgrave Handbook of Research Design in Business and

Management Springer

The objective of the 2nd International Conference on Green Communications and Networks 2012 (GCN 2012) is to facilitate an exchange of information on best practices for the latest research advances in the area of communications, networks and intelligence applications. These mainly involve computer science and engineering, informatics, communications and control, electrical engineering, information computing, and business intelligence and management.

Proceedings of the 2nd International Conference on Green Communications and Networks 2012 (GCN 2012) will focus on green information technology and applications, which will provide in-depth insights for engineers and scientists in academia, industry, and government. The book addresses the most innovative research developments including

technical challenges, social and economic issues, and presents and discusses the authors' ideas, experiences, findings, and current projects on all aspects of advanced green information technology and applications. Yuhang Yang is a professor at the Department of Electronic Engineering, Shanghai Jiao Tong University. Maode Ma is an associate professor at the School of Electrical & Electronic Engineering, Nanyang Technological University.

STUDIES IN VIRTUAL COMMUNITIES, BLOGS, AND MODERN SOCIAL NETWORKING: MEASUREMENTS, ANALYSIS, AND INVESTIGATIONS

McFarland

In modern society, it has become increasingly important to consumers that their products be environmentally safe. Green marketing is the most efficient way for corporations to convey that their merchandise is environmentally ethical, which in turn increases profit. Green Marketing and Environmental Responsibility in Modern Corporations is a

comprehensive resource for the latest material on the methods and techniques that contemporary industries are employing to raise awareness on sustainable products. Featuring comprehensive coverage across a range of relevant topics such as green consumption, organic food products, supply chain performance, and ecological marketing, this publication is an ideal reference source for professionals, practitioners, academics, and researchers interested in the latest material on sustainable corporate operations. *ePub - European Conference on Social Media* Routledge
In a globalized society, individuals in business, government, and a variety of other fields must frequently communicate and work with individuals of different cultures and backgrounds. Effectively bridging the culture gap is critical to success in such scenarios. *Cross-Cultural Interaction: Concepts, Methodologies, Tools, and Applications* explores contemporary research and historical perspectives on

intercultural competencies and transnational organizations. This three-volume compilation will present a compendium of knowledge on cultural diversity and the impact this has on modern interpersonal interactions. Within these pages, a variety of researchers, scholars, professionals, and leaders who interact regularly with the global society will find useful insight and fresh perspectives on the field of cross-cultural interaction.

Measurements, Analysis, and Investigations IGI Global
A Primer on Partial Least Squares Structural Equation Modeling (PLS-SEM) by Joseph F. Hair, Jr., G. Tomas M. Hult, Christian Ringle, and Marko Sarstedt is a practical guide that provides concise instructions on how to use partial least squares structural equation modeling (PLS-SEM), an evolving statistical technique, to conduct research and obtain solutions. Featuring the latest research, new examples using the SmartPLS software, and expanded discussions throughout, the Second Edition is designed to be

easily understood by those with limited statistical and mathematical training who want to pursue research opportunities in new ways.

A SECTOR STUDY

Routledge
 The analysis and implementation of effective human resources strategies creates opportunities for organizational success. By utilizing such intangible assets, businesses can gain competitive advantage and enhance productivity. **Strategic Human Capital Development and Management in Emerging Economies** is a comprehensive reference source for the latest scholarly research on the intersection of globalization, organizational behavior, and human capital management in the context of developing nations. Covering a range of business-oriented topics, such as job proficiency, corporate social responsibility, and burnout syndrome, this book is ideally designed for managers, researchers, academics, professionals, and graduate students interested in sustainable

management of human behavior in modern organizations.
Analyzing Workplace Arrogance and Organizational Effectiveness: Emerging Research and Opportunities Multivariate Data Analysis Offering an applications-oriented approach which focuses on the use of each technique rather than its mathematical derivation, this textbook introduces a six-step framework for organising and discussing multivariate data analysis techniques. **Multivariate Data Analysis**
 This book takes an easy-to-understand look at the statistical approach called the person-centered method. Instead of analyzing means, variances and covariances of scale scores as in the common variable-centered approach, the person-centered approach analyzes persons or objects grouped according to their characteristic patterns or configurations in contingency tables. The main focus of the book will be on **Configural Frequency Analysis (CFA; Lienert and Krauth, 1975)** which is a statistical method that looks for over and under-frequented cells or patterns. Over frequented

means that the observations in this cell or configuration are observed more often than expected, under-frequented means that this cell or configuration is observed less often than expected. In CFA a pattern or configuration that contains more observed cases than expected is called a type; similarly, a pattern or configuration that is less observed than expected are called an antitype. CFA is similar to log-linear modeling. In log-linear modeling the goal is to come up with a fitting model including all important variables. Instead of fitting a model, CFA looks at the significant residuals of a log-linear model. The book describes the use of an R-package called confreq (derived from Configural Frequency Analysis). The use of the software package is described and demonstrated with data examples.

Empowerment, Transparency, Technological Readiness and their Influence on Financial Performance, from a Latin American Perspective showcases in-depth analysis, allowing companies to obtain information for a broader vision to help make

decisions about intervention, market performance and strategy development possibilities.

Advances in Hospitality and Leisure
Routledge

This book explores stereotypes that learners of six Asian languages—Japanese, Mandarin, Korean, Myanmar, Thai and Vietnamese—hold about the target language country, its cultures and people. Some of the findings, such as the language learners' mental images of Myanmar, Thailand and Vietnam, are presented here for the first time. Recognizing that stereotypes, and attitudes embedded in them, have an impact on people's actions and behavioural intentions, this book examines whether and how the country stereotypes held by the students influenced their motivation to learn the target language. Besides providing worthwhile insights into the content and structure of the country stereotypes and their relationship with language learning motivation, this book offers methodological and theoretical advancements. Drawing on intellectual heritage of Russian psychologist Lev Vygotsky (1896-1934) the

book highlights how the concepts of word meaning (znachenie slova) and word sense (smysl) could be fruitfully employed in studies on stereotypes that people learning a foreign language hold about a target language country. This book will appeal to all readers interested in stereotypes that people have about foreign countries and also to educators and researchers who study language learning motivation.

The Public Sector Accounting, Accountability and Auditing in Emerging Economies' IGI Global Volume 15 of Research in Accounting in Emerging Economies focuses on how NPM ideas have been conceptualised, implemented and affected the accounting, accountability and auditing practices in emerging economies characterised by different ideologies, social and political factors.

Cross-Cultural Interaction: Concepts, Methodologies, Tools, and Applications
Routledge

This commemorative volume honors the contributions of Prof. Joseph F. Hair, Jr., who through his writings,

leadership and mentoring has had a profound influence on marketing and other fields of business research. He is widely known for sidestepping mathematically complex ways of teaching statistical approaches with an eye toward making the tools accessible to the average behavioral researcher. Joe is also a bona fide researcher whose work has had a massive impact on marketing and business research in general. The book provides revealing insights on his works and acknowledges his role as an outstanding teacher and mentor who has shaped generations of researchers.

CORPORATE SOCIAL RESPONSIBILITY: CONCEPTS, METHODOLOGIES, TOOLS, AND APPLICATIONS

MJP Publisher
Multivariate Data Analysis
Journal of Information Ethics, Vol. 24, No. 1 (Spring 2015) IGI Global
This book is about research in brand management and contemporary issues in marketing. It is designed to bring today's

professionals, managers, academicians and students the current research findings relating to issues in branding and marketing across the globe. Generally, branding has been accepted as an important strategy in managing business and marketing activities. This is because effective branding and marketing strategies can help improve business performance and bring up companies to a better position. Hence, this book is a good reference to those who wanted to understand factors influencing product and service brand performance, issues on brand loyalty, consumer purchase intention and Islamic retailing.
Emerging Technologies in Virtual Learning Environments Academic Conferences Limited
We experience here feeling of joy while presenting first issue of 2016. We thank you again researchers who have presented their articles in this issue. This Issue (Volume 3, Issue 2, No. 1) Published, January, 2016
Ecotourism and Community Intervention: Emerging Research and Opportunities Pearson Higher Ed
This is the eBook of the

printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. For graduate and upper-level undergraduate marketing research courses. For over 30 years, *Multivariate Data Analysis* has provided readers with the information they need to understand and apply multivariate data analysis. Hair et. al provides an applications-oriented introduction to multivariate analysis for the non-statistician. By reducing heavy statistical research into fundamental concepts, the text explains to readers how to understand and make use of the results of specific statistical techniques. In this Seventh Edition, the organization of the chapters has been greatly simplified. New chapters have been added on structural equations modeling, and all sections have been updated to reflect advances in technology, capability, and mathematical techniques.

A GUIDE TO DOING YOUR RESEARCH PROJECT

SAGE Publications
Advances in Hospitality

and Leisure delivers refreshing insights from a host of scientific studies in the domains of hospitality, leisure and tourism, providing a platform to galvanize thoughts on contemporary issues and merging trends essential to theory advancement as well as professional practices from a global perspective.

CLASSIC GROUNDED THEORY

Springer Nature
Project managers appear to accept the 'iron triangle' of cost, budget and quality but in reality focus more on being on time and budget. Quality in projects is often paid mere lip service and relegated to tick-box compliance. This lack of clarity and focus on quality is often the source of project failures. Ron Basu's *Managing Quality in Projects* shines the spotlight on this aspect of project management that can often be overshadowed by the pressure to deliver on time and on budget. His investigation focuses initially on defining the dimensions of quality in project management and identifying sources of measurement for project excellence. Thereafter he expands his focus to

discuss which tools can be effectively used in the quest for achieving and sustaining project excellence; and which processes are important in assessing the project maturity. The text also explores how the successes of operational excellence concepts, such as supply chain management, Lean Thinking and Six Sigma may be gainfully deployed in enhancing project quality and excellence. Finally a structured implantation plan guides those directly involved in project delivery, including suppliers, in how to 'make it happen'. A shared understanding and implementation of project quality by key project stakeholders will go a long way to ensuring a stable platform for delivering successful projects with longer lasting outcomes. It is also a fundamental building block in any organization's strategy for improving consistency and achieving sustainable performance. On that basis, Ron Basu's book is a must-have reference and guide for all project organizations.

Person-Centered Methods
Springer

Behavioural research is well established in the social sciences, and has flourished in the field of accounting in recent decades. This far-reaching and reliable collection provides a definitive resource on current knowledge in this new approach, as well as providing a guide to the development and implementation of a

Behavioural Accounting Research project. The Routledge Companion to Behavioural Accounting Research covers a full range of theoretical, methodological and statistical approaches relied upon by behavioural accounting researchers, giving the reader a good grounding in both theoretical perspectives and practical applications. The perspectives cover a range of countries and contexts, bringing in seminal chapters by an international selection of behavioural accounting scholars, including Robert Libby and William R. Kinney, Jr. This book is a

vital introduction for Ph.D. students as well as a valuable resource for established behavioural accounting researchers. *Mixed ANOVA and Multiple Regression* IGI Global
For graduate courses in Marketing Research, Research Design and Data Analysis. For the non-statistician, this applications-oriented introduction to multivariate analysis reduces the amount of statistical notation and terminology used while focusing on the fundamental concepts that affect the use of specific techniques.
