Understanding Australian Accounting

Standards Routledge

Understanding Australian Accounting Standards reflects the reporting and disclosure requirements under a number of Australian Accounting Standards,

providing detailed illustration on how publicly listed companies report in accordance with Australian Accounting Standards. This textbook offers students a comprehensive and well written introduction to the scope and financial reporting disclosures of Australian accounting standards issued by the Australian Accounting Standards Board. The text incorporates extracts from the 2011 annual report of Billabong International, as well as media articles profiling its recent corporate events, in all chapters to illustrate how a corporate entity measures, recognises, reports and discloses financial information required under Australian accounting standards. The integration of the Billabong International annual report will enable students to look beyond the numbers to develop interpretative and critical evaluation skills of accounting information. The integration of the Billabong 2011 annual report, with its disclosure notes, will provide students with a deep understanding of the financial reporting and business activity associated with the financial performance of a well-known company.

Financial Reporting Wiley

Loftus, Financial Reporting builds on the strengths of Loftus, Understanding Australian Accounting Standards and Leo, Company Accounting, bringing the strongest elements of those two respected titles into one combined volume. This 35 chapter text is designed to cover all of the 2nd and 3rd year financial accounting topics typically taught across two units, including accounting regulation, the conceptual framework, applying accounting standards, disclosures and group accounting. It explains accounting principles and practice to students in a

clear, understandable way and provides both a conceptual insight as well as a practical application of the various accounting standards. The author team is comprised of a group of academics who are actively teaching in this area incl. Janice Loftus (Uni of Adelaide), Noel Boys (Melb), Belinda Luke (QUT), Sorin Daniliuc (ANU), Hong Ang (Deakin) and Karen Byrnes (USQ). The authors have brought their collective teaching insights to bear on the learning design of the text and accompanying online course the result of which is a contemporary teaching and learning package that will engage and empower students to study independently and achieve greater success in these challenging units.

CORPORATE ACCOUNTING IN AUSTRALIA

The history of accounting in Australia is of interest because it provides an opportunity to examine how accounting techniques, institutions and concepts have been imported and adapted to an environment similar to, but not exactly the same as that of the exporters. The book emphasizes private sector accounting over public sector accounting which is a reflection of the available literature but not of the real world of Australian accounting and is divided into 7 sections: Early Accounting Records The Financial Year Corporate Financial Reporting Audit Professional Accountancy Accounting Literature

Biographies and Bibliographies
Solutions to Campus Cycle Shop
Covers the evolution of accounting, financial reporting and related institutions for major economies in the world in a comparable way. This title considers six nations from Asia and Oceania, including Australia, China, India, Indonesia, Japan, and the Republic of Korea.

Horngren's Financial Accounting

The Australian Practical Accounting Guide introduces fundamental accounting principles for decision makers. The aim of the book is to make readers aware of the role and importance of financial information within an organisation, and to set the platform for understanding financial implications of business decisions. The main purpose of accounting is to provide financial information for users inside an organisation (usually various levels of management) and those external to the organisation (often shareholders, creditors and the government) to assist these stakeholders in making sound economic decisions. Many people with limited knowledge of accounting must interpret financial data. Accounting plays a significant role in society and, in a broad sense, everyone is affected by accounting information. The book has been deliberately written using simple, easy-to-understand language, so that readers with a non-accounting background will find it easy to understand. The book is practical in nature and contains numerous worked examples, diagrams, flowcharts and commonly asked questions at the end of each chapter. Extracts are taken from listed Australian companies, such as JB

Hi-Fi, Qantas, Virgin Australia, Wesfarmers, Myer Holdings, Woolworths, Flight Centre and The Reject Shop to bring to life the accounting concepts discussed throughout the book and to provide a practical application of the accountancy principles contained in each chapter. Also included is a list of useful websites, a year-end checklist for bookkeepers and accountants and a comprehensive glossary of commonly used accounting and tax terms. This guide will be useful, interesting and informative for students completing an accounting unit.
