### **REED'S MATHEMATICAL TABLES AND ENGINEERING FORMULAE**

Schiffer Publishing Limited

This book covers the knowledge of shipboard operations required by candidates for professional qualification as Chief Officer and Master Mariner. It deals with the basic routines and procedures, and the many regulations governing their use, for the safe and efficient operation of merchant ships. The book is also designated a fundamental text for the Maritime Transport paper of the Chartered Institute of Transport's membership examinations. The second edition takes into account recent developments in technology and regulation, and in particular covers major international legislation on Safety of Life at Sea and on Maritime Pollution as well as recent UK regulations on occupational health and safety and on operation of ro-ro ferries.

World Bank Publications

The subjects treated in this book are those commonly required in mechanical and marine engineering, including naval architecture. The formulae are graduated to cover the subjects at all stages from technician level to degree, from cadet level to Extra First Class Certificate.

Inevitably some specialised or favourite formulae will have been omitted, so after each subject a few blank pages have been provided to allow extra formulae and design data to be recorded.

Ninth in a series of annual reports comparing business regulations in 183 economies, Doing Business 2012 measures regulations affecting 11 areas of everyday business activity: starting a business dealing with construction permits employing workers registering property getting credit protecting investors paying taxes trading across borders enforcing contracts closing a business getting electricity The report updates all indicators as of June 1, 2011, ranks countries on their overall "ease of doing business", and analyzes reforms to business regulation identifying which countries are strengthening their business environment the most. Doing Business 2012 includes a new set of indicators on the time, steps, and cost for a private business to get an electricity connection. The data on connection services can inform utilities, regulators and governments seeking to strengthen the performance of the electricity sector. Drawing on a now longer time series, this year's report introduces a measure to

illustrate how the regulatory environment for business has changed in each economy since Doing Business 2006 was published in 2005. A new "distance to frontier" measure complements the aggregate ranking on the ease of doing business, which benchmarks each economy's current performance on the indicators against that of all other economies in the sample for a given year. A fundamental premise of Doing Business is that economic activity requires good rules that are transparent and accessible to all. Such regulations should be efficient, striking a balance between safeguarding some important aspects of the business environment and avoiding distortions that impose unreasonable costs on businesses. Where business regulation is burdensome and competition limited, success depends more on whom you know than on what you can do. But where regulations are relatively easy to comply with and accessible to all who need to use them, anyone with talent and a good idea should be able to start and grow a business in the formal

sector. The Doing Business report, which was started in 2003, has become one of the key ways in which the bank and other observers gauge business climate within developing countries... -- The Financial Times [Doing Business started] as a way to encourage countries to reduce obstacles to entrepreneurship. Developing countries compete to land a spot on the top 10 list of most-improving countries because it is seen as a way to get attention and investment. -- The Wall Street Journal [Doing Business] has succeeded in putting the issue of business red tape on the international political agenda. -- The Economist **That Winter** Penguin UK Within the marine and offshore industry, there is a clear and growing need for increased training and education on the use of electrical power systems. The number of electrical plant and appliances now in service has grown at an alarming rate in recent years, as has the amount of electrical power generated and utilised on board. Large passenger ships now carry as many electrical officers as marine engineers, and

electrical propulsion is now in common use by LNG carriers, small parcel tankers, oil tankers, ferries, offshore support, the navy, fleet auxiliary, cable layers and cruise ships. A number of shipping companies now award the Chief Electro Technical Officer the equivalent rank to the ship's master and Chief Engineer. These developments have resulted in the establishment of a Foundation Degree programme for Electro Technical Officers and the current development of full degree programmes. As such, a targeted textbook for students on the subject is required. As with all titles in the Reeds Marine Engineering Series, this book will be written in clear, accessible language, so as to be of use to all students and particularly those for whom English isn't their first language. Technical drawings and diagrams will be used throughout and each chapter will be accompanied by example examination questions. **Condition Assessment Scheme** Routledge In Search of a Path is the first comprehensive analysis of Suriname's foreign policy from 1975

to 1991. The book provides readers interested in Caribbean and Latin American affairs with a detailed account of Suriname's external relations. Moreover, the young Republic may stand as a case study, as it confronted the difficulties and challenges that small developing states often face.

The Architecture of Public Truth Routledge

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt *Practical Marine Electrical Knowledge* Routledge #1 NEW YORK TIMES BEST SELLER • In this urgent, authoritative book, Bill Gates sets out a wide-ranging, practical—and accessible—plan for how the world can get to zero greenhouse gas emissions in time to avoid a climate catastrophe. Bill Gates

has spent a decade investigating the causes and effects of climate change. With the help of experts in the fields of physics, chemistry, biology, engineering, political science, and finance, he has focused on what must be done in order to stop the planet's slide to certain environmental disaster. In this book, he not only explains why we need to work toward net-zero emissions of greenhouse gases, but also details what we need to do to achieve this profoundly important goal. He gives us a clear-eyed description of the challenges we face. Drawing on his understanding of innovation and what it takes to get new ideas into the market, he describes the areas in which technology is already helping to reduce emissions, where and how the current technology can be made to function more effectively, where breakthrough technologies are needed, and who is working on these essential innovations. Finally, he lays out a concrete, practical plan for achieving the goal of zero emissions—suggesting not only policies that

governments should adopt, but what we as individuals can do to keep our government, our employers, and ourselves accountable in this crucial enterprise. As Bill Gates makes clear, achieving zero emissions will not be simple or easy to do, but if we follow the plan he sets out here, it is a goal firmly within our reach. *Marine Diesel Engines* IMO Publishing Exhaustive Coverage of the Following Topics 1. Watch keeping 2. Engine running problems 3. Camshaft-less electronically controlled intelligent engines 4. Indicator card analysis 5. Engine performance and testing 6. Latest developments 7. Engine overhauls 8. Engine emission 9. Starting and reversing 10. Manoeuvring 11. Bridge control 12. VIT and Super-VIT 13. Faults, defects and problems of all engine components. Design, Building, and Operation World Bank Publications This book provides a collection of comprehensive, up-to-date, and broadly applicable guides to the research and development fields of oligonucleotide (ON) therapeutics. Covering

topics from the study of antisense and anti-gene effects to oligonucleotides in the context of drug discovery and development, the volume explores a wide-ranging and useful spectrum of methods and protocols needed to take full advantage of therapeutic applications involving ONs. Written for the highly successful *Methods in Molecular Biology* series, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Authoritative and practical, *Oligonucleotide-Based Therapies: Methods and Protocols* aims to be a great aid in the laboratory as well as an ideal reference guide when designing antisense and anti-gene oligonucleotides for therapeutic applications.

**Creating Jobs** World Bank Publications  
 French for Engineering prepares students to study and intern in France as engineers. Aimed at students at the CEFR B1 or ACTFL Intermediate-High level, the textbook uses a step-by-step progression of language-

learning tasks and activities to develop students' skills at the CEFR C1 or ACTFL Advanced-High level. Authentic documents present students with tasks they will encounter as engineering students or interns in France. Online resources include a teacher handbook and a workbook with vocabulary-building activities, grammar-mastery exercises, and listening and reading comprehension activities, followed by questions requiring critical thinking. It is organized in parallel with the textbook based on the flipped-classroom concept.

Methods and Protocols  
 Humana

Pamela Gillilan was born in London in 1918, married in 1948 and moved to Cornwall in 1951. When she sat down to write her poem *Come Away* after the death of her husband David, she had written no poems for a quarter of a century. Then came a sequence of incredibly moving elegies. Other poems followed, and two years after starting to write again, she won the Cheltenham Festival poetry competition. Her first collection *That Winter* (Bloodaxe, 1986) was

shortlisted for the Commonwealth Poetry Prize.

ANYONE AND THAT MEANS YOU CAN LEARN TO TRADE In *The Successful Trader*, you will gain knowledge of five books in one. You will walk away being able to trade successfully and virtually risk-free! Inside these pages, you will discover: PART ONE - will take you personally through the author's journey of experiencing the five biggest obstacles to trading success and how you can avoid these from day one. PART TWO - will introduce you to Trading Basics and simple strategies that produce monthly cash. PART THREE - will show you how to protect yourself from negative market influences. PART FOUR - will show you how to manage your trading income so that you build true wealth over time by multiplying your returns many times over through the compound effect. PART FIVE - will show you the tools that you can use to get started immediately. With Jeremy Downing's unbeatable winning formula, trading

will be the vehicle to secure your financial future over time with only a 5 minute commitment per day! Jeremy Downing is a successful trader and property investor. He has been trading successfully in financial markets for over a decade. Visit him at The-Successful-Trader.com

#### **Operations Information Today**

The Doing Business series provides research, data, and analysis on regulation in 181 economies across 10 areas of the business life cycle. Doing Business 2009 identifies top reformers in business regulation and highlights best practices and global reform trends. This year's report builds upon the five previous editions, adding new economies and updating all indicators. This year's report covers 3 additional economies, bringing the total number of economies covered to 181. Now included are the Bahamas, Bahrain, and Qatar. The report also adds a preface on Doing Business methodology, as well as in-depth analysis throughout the report on the main trends and findings of the past six years of Doing Business. Doing Business is an invaluable resource for

entrepreneurs, investors, advisors, academics, professionals, and policymakers. The indicators benchmark regulation across 10 areas of a typical business lifecycle, and are used to analyze economic and social outcomes that matter such as equal opportunity, unemployment, poverty, and growth. This annually-published report gives policymakers the ability to measure regulatory performance in comparison to other economies, and learn from best practices. [Doing Business in 2005](#) Bloomsbury Publishing Doing Business in 2005: Obstacles to Growth is the second in a series of annual reports investigating the scope and manner of regulations that enhance business activity and those that constrain it. New quantitative indicators on business regulations and their enforcement can be compared across more than 130 countries, and over time. The indicators are used to analyze economic outcomes and identify what reforms have worked, where and why. Topics in Doing Business in 2005 include: Licensing and Inspections: Having registered a

business, now what? In most countries, firms face a myriad of sector specific licenses as well as inspections to enforce compliance. The Doing Business database constructs two sets of indicators on the regulation of operations. One measures the steps, time and costs of complying with licensing and permit requirements for ongoing. The other assesses the enforcement of regulations through two of the most common types of inspections-labor and tax. Registering Property: Property registries were first developed to help raise tax revenue. What was good for the tax authorities has since proven to be good for strengthening property rights-the registries strengthen incentives to invest, facilitate trade, and expand access to credit. New indicators cover the steps, time and cost to register property. Measures of the legal provisions that strengthen property rights and the efficiency of property registries are also developed. Protecting Investors: Corporate governance issues are often thought to affect only publicly listed companies in developed

countries. In fact, corporate governance is relevant for every large privately held company that has more than one owner. New indicators examine several possible types of shareholder expropriation, including related-party transactions, guarantees and loans to company managers and directors, mergers and acquisitions, disclosure of ownership information, and treatment of conflicts of interest. Including a new emphasis on gender, *Doing Business* not only provides insights into business constraints throughout the world but highlights particular barriers faced by women. *Doing Business* is a comprehensive resource that no investor, economic adviser, business developer, or economic policymaker should be without.

World Bank Publications  
Naseeruddin Shah's sparkling memoir of his early years, 'from zero to thirty-two', spans his

extraordinary journey from a feudal hamlet near Meerut, to Catholic schools in Nainital and Ajmer, and finally to stage and film stardom in Mumbai. Along the way, he recounts his passages through Aligarh University, the National School of Drama and the Film and Television Institute of India, where his luck finally began to change. *And Then One Day* tells a compelling tale, written with rare honesty and consummate elegance, leavened with tongue-in-cheek humour. There are moving portraits of family members, darkly funny accounts of his schooldays, and vivid cameos of directors and actors he has worked with, among them Ebrahim Alkazi, Shyam Benegal, Girish Karnad, Om Puri and Shabana Azmi. The accounts of his struggle to earn a living through acting, his experiments with the craft, his love affairs, his early marriage, his successes and failures are narrated with remarkable frankness and objective self-assessment. Brimming with delightful anecdotes as well as poignant, often painful revelations, this book is a tour de force.

*Doing Business 2012*  
Cargo Work  
Cargo Work and Maintenance  
A Collection of Important Topics for the Cargo Work and Ship Operation Functions of Phase 1  
Cargo Work  
For Maritime Operations  
Ship-shaped offshore units are some of the more economical systems for the development of offshore oil and gas, and are often preferred in marginal fields. These systems are especially attractive to develop oil and gas fields in deep and ultra-deep water areas and remote locations away from existing pipeline infrastructures. Recently, the ship-shaped offshore units have been applied to near shore oil and gas terminals. This 2007 text is an ideal reference on the technologies for design, building and operation of ship-shaped offshore units, within inevitable space requirements. The book includes a range of topics, from the initial contracting strategy to decommissioning and the removal of the units concerned. Coverage includes both fundamental theory and principles of the individual technologies. This book will be useful to students who will be approaching

the subject for the first time as well as designers working on the engineering for ship-shaped offshore installations.
