This book explores whether there is reason to be against entrepreneurship. Just like literature on the darker sides of entrepreneurs and entrepreneurship, the book is an answer to the one-sided, overly positive and uncritical image of entrepreneurship. The "twist" in this book, in comparison with literature on dark sides of entrepreneurship, is to explore being against entrepreneurship. From various perspectives such as lexical semantics, Marxism, philosophy of science and psychology, the contributors contemplate on why there may be reason to be against entrepreneurship discourse as well as entrepreneurship practice. Some chapters are based on first-hand empirical data, others are conceptual. The main overall conclusion is that there are some strong arguments for being against

entrepreneurship discourse, as well as for being against certain aspects of entrepreneurship practice. Before it is reasonable to be against entrepreneurship practice in total, a convincing and practicable alternative needs to be developed. This book will be valuable reading for entrepreneurship scholars, as well as academics working in the fields of business ethics, (critical) management, and international business.

### **LANGUAGE POLICIES AND (DIS)CITIZENSHIP**

Joel Jacobs

This volume explores the concept of 'citizenship', and argues that it should be understood both as a process of becoming and the ability to participate fully, rather than as a status that can be inherited, acquired, or achieved. From a courtroom in Bulawayo to a nursery in Birmingham, the authors use local contexts to foreground how the vulnerable, particularly those from minority language backgrounds, continue to be excluded, whilst offering a powerful demonstration of the potential for

change offered by individual agency, resistance and struggle. In addressing questions such as 'under what local conditions does "dis-citizenship" happen?'; 'what role do language policies and pedagogic practices play?' and 'what kinds of margins and borders keep humans from fully participating'? The chapters in this volume shift the debate away from visas and passports to more uncertain and contested spaces of interpretation.
