 This Brief discusses impacts of the COVID-19 pandemic on the Portuguese tourism sector. Taking into account real-world conditions and the importance of the tourism sector for the Portuguese economy, this book highlights the economic contexts of tourism in Portugal at the regional and municipal levels, discussing pre-pandemic economic frameworks and projecting potential implications for the future. Using data provided by Statistics Portugal, the Brief performs econometric analysis on three cases: new paradigms for overnight stays and guests, changes in tourism revenues and prospective alternatives, and a comparison of effects on changes in number of guests and overnight stays at the regional level. Providing cutting edge analysis of a dynamic global situation, this Brief will be useful for researchers interested in tourism economics and European economics as well as policymakers and industry professionals.

THE COMMONWEALTH

Livre de Lyon
 This volume includes papers from the 8th International Conference on Sustainable Tourism. Today tourism is becoming accessible to a growing number of people and is an important component of development, not only in economic terms but also for knowledge and human welfare. This collection of research aims to find ways to protect the natural and cultural landscape through the development of new solutions which minimise the adverse effects of tourism. The phenomenon has many more advantages than disadvantages. New forms of economic development and increasing wealth of human societies depend on tourism. Our knowledge of the world now includes a strong component due to tourism. Human welfare has physiological and psychological elements, which tourism promotes, both because of the enjoyment of knowing new territories and increasing contacts with near or far away societies and cultures. The tourism industry has nevertheless given rise to some serious problems, including social costs and ecological impacts. Many ancient local cultures have practically lost their identity. Their societies have oriented their economy only to this industry. Both the natural and cultural - rural or urban - landscapes have also paid a high price for certain forms of tourism. These problems will persist if economic benefit is the only target, leading to economic gains that eventually become ruinous. It is also a grave error to disregard the fact that visitors nowadays are increasingly demanding in cultural and environmental terms. The 'Global Change' is a set of natural environmental changes that are strongly affected by technological and social developments. Natural changes are inherent in the Earth's ecosystem (the 'ecosphere'). Also, technological and social changes are inherent to mankind (the 'noosphere'), and are now becoming widespread. Cities are growing rapidly and industry requires increasingly larger areas. Many traditional rural areas are being abandoned. Tourism should also play an important role in this context. Thus, interestingly, many historic agricultural districts have maintained, or even recovered, their local population numbers through intelligent strategies of tourism focused on nature and rural culture. Natural landscapes and biodiversity are becoming increasingly appreciated. The tourism industry must be able to respond to these aspirations.

 Tourism is an economic and social phenomenon that is centered on a tourist's experience and is dependent on the experiences that are co-created and provided to tourists. Tourism destination managers must understand what tourists perceive as engaging, intense, and memorable in order to remain successful. However, care must also be given to the residents' perception of local tourism development and how it impacts their community. This is a fundamental aspect for tourism development since host communities that support tourism development tend to be more hospitable with tourists, which influences their satisfaction and loyalty. Moreover, the interaction with residents of host communities is a crucial component of the quality of the tourist experience, contributing to the long-term success and sustainability of destinations. The Handbook of Research on Resident and Tourist Perspectives on Travel Destinations is a collection of innovative research that examines

travel destinations from the resident and tourist perspectives in order to better support and inform the tourism development process and to make the destinations attractive to visitors while at the same time contributing to resident quality of life and happiness. While highlighting topics including sustainable development, hotel management, and customer satisfaction, this book is ideally designed for government officials, tour developers, travel agencies, brand managers, advertising agencies, restaurateurs, public administrators, hotel managers, tourist industry professionals, academicians, researchers, and students.

 Tourism, as with many parts of the economy, is at a pause-reflect-rest stage in the post pandemic world. This book puts forward some positive and practical concepts for the reset stage in terms of pushing towards wholly sustainable tourism. The COVID-19 pandemic has been disastrous in terms of the loss of human life, the physical and mental strains placed on large numbers of populations across the globe who have been quarantined in their homes and in terms of the costs of dealing with the pandemic and supporting business and citizens through the period. Tourism has been comprehensively damaged, not only in advanced economies, but also in poorer developing economies where tourism provides a vital source of income and employment. The problem has been complicated by the shattering effect on mass tourism, which has been far more sensitive to the shutdown of travel and accommodation than ethical and responsible tourism activities focused at a local sustainable level. Therefore this book evaluates how the pandemic and economic decline affects ethical and responsible tourism - the type of tourism which sustains and develops local communities in a balanced way for the benefit of future generations. It reflects on the position the authors established in "Ethical & Responsible Tourism - managing sustainability in local tourism destinations" and then determines how ethically and responsibly focused tourism may adapt, develop and maintain safety for consumers in the post-virus world. This book will be essential reading for students, researchers and practitioners of tourism, environmental and sustainability studies.

 This new volume, Post-Disaster and Post-Conflict Tourism, now going into its 2nd edition, takes an in-depth look at how global geopolitical tensions and global threats affect the tourism industry and offers tools and strategies for meeting these challenges. The book is updated with chapters that include new research, studies, and experiences, many of which consider the fall-out from the COVID-19 pandemic on tourism. It also includes five brand new chapters, for over 50 new pages of text. With chapters by well-versed scholars who have worked as experts in post-disaster and post-conflict tourism, the book presents a host of case scenarios along with innovative strategies that can be implemented by postcolonial, post-conflict, and post-disaster destinations to encourage travel and tourism in these areas. Topics include using tourism as a vehicle for economic recovery, educating tourists at the pre-visit stage, developing and employing postcolonial branding and self-branding, using sports tourism and food events as a marketing strategy, the ethics revolving around post-disaster consumption, and much more. The new chapters discuss tourism in the age of the coronavirus pandemic and its dramatic disruptive effect on the tourism industry. The authors delve into post-COVID tourism marketing, health and wellness education and practices, ethical considerations for tourism operators, and more. A chapter also considers the challenges of sustainable supply chain management in tour operations. With contributions from experts in this emerging field, this volume is a rich resource for travel and tourism professionals, policymakers, researchers, and others. It creates a bridge between the conceptual discussions around "dark consumption" (tourism directed to places that are identified with death and suffering) and the urgency to develop empirical models that support destination marketing organizations in a rapidly changing world.

Tour guides, a highly responsible group of professionals who are in direct communication with tourists traveling around the world, have a great impact on the proper promotion of the culture of countries, global peace, and tolerance. Additionally, they are also effective in the preservation of world natural heritage. Thus, the educational status of tour guides, as well as the characteristics and ethical values that they should possess, need to be examined on an international scale. In today's world, where tourism demand is directed towards all types of tourism, practices in special interest tourism should be customized in order to ensure the highest level of service quality and cultural appreciation. *Cases on Tour Guide Practices for Alternative Tourism* provides emerging research exploring the theoretical and practical aspects of the occupational issues that surround tour guides and their applications within international tourism. Featuring coverage on a broad range of topics such as cultural education, specialized learning, and international business, this book is ideally designed for tour guides, travel agencies, tour managers, tour developers, heritage sites, museums, academicians, researchers, students, industry experts, and hospitality professionals.

Post-Disaster and Post-Conflict Tourism, 2nd Edition WIT Press

The Bolsheviks took power in Russia 1917 armed with an ideology centered on the power of the worker. From the beginning, however, Soviet leaders also realized the need for rest and leisure within the new proletarian society and over subsequent decades struggled to reconcile the concept of leisure with the doctrine of communism, addressing such fundamental concerns as what the purpose of leisure should be in a workers' state and how socialist vacations should differ from those enjoyed by the capitalist bourgeoisie. In *Club Red*, Diane P. Koenker offers a sweeping and insightful history of Soviet vacationing and tourism from the Revolution through perestroika. She shows that from the outset, the regime insisted that the value of tourism and vacation time was strictly utilitarian. Throughout the 1920s and '30s, the emphasis was on providing the workers access to the "repair shops" of the nation's sanatoria or to the invigorating journeys by foot, bicycle, skis, or horseback that were the stuff of "proletarian tourism." Both the sedentary vacation and tourism were part of the regime's effort to transform the poor and often illiterate citizenry into new Soviet men and women. Koenker emphasizes a distinctive blend of purpose and pleasure in Soviet vacation policy and practice and explores a fundamental paradox: a state committed to the idea of the collective found itself promoting a vacation policy that increasingly encouraged and then had to respond to individual autonomy and selfhood. The history of Soviet tourism and vacations tells a story of freely chosen mobility that was enabled and subsidized by the state. While Koenker focuses primarily on Soviet domestic vacation travel, she also notes the decisive impact of travel abroad (mostly to other socialist countries), which shaped new worldviews, created new consumer desires, and transformed Soviet vacation practices.

Tourism, Travel, and Hospitality in a Smart and Sustainable World Introduction to Travel and Tourism

Despite the significance of tourism to the economic, social and environmental structures of Central and South America, little has been documented in the English literature about tourism in this sub-region, which in terms of population size, ranks fourth in the world with 652 million inhabitants. The first of its kind, this book focuses exclusively on tourism development, planning and their impacts in a wide number of Central and South American countries. It covers experiences, challenges, successful and unsuccessful stories, specific cases, and other tourism related issues of twelve countries in total. Each chapter is authored by scholars who have done extensive research on tourism in the countries covered.
