Eye in the Sky Vintage

Fourteen strangers came to Delmak-O. Thirteen of them were transferred by the usual authorities. One got there by praying. But once they arrived on that planet whose very atmosphere seemed to induce paranoia and psychosis, the newcomers found that even prayer was useless. For on Delmak-O, God is either absent or intent on destroying His creations.

Interviews with the genius behind *The Man in the High Castle* and countless other science fiction classics. In the field of science fiction, Philip K. Dick is unparalleled. His novel *Do Androids Dream of Electric Sheep?* became the classic film *Blade Runner*. His short story “The Minority Report” was adapted for the screen by Steven Spielberg. *The Man in the High Castle* has become a hit series on Amazon, and those titles represent only a small fraction of his work. In November 1982, six months before the author’s untimely death, journalist Gwen Lee recorded the first of several in-depth discussions with Philip K. Dick that continued over the course of the next three months. This transcription is a fascinating read for anyone interested in the field of science fiction. “These transcripts bring fresh insights—notably, into the imaginative biotech plot line of the unwritten *The Owl in Daylight* . . . Dick also discusses music, writing, philosophers and his 1974–1975 mystical visions, when the revelation of his son’s undiagnosed birth defect—‘down to anatomical details’—saved the child’s life . . . Fans will rejoice.” —Publishers Weekly

The Man Who Japed McFarland

Weidenfeld & Nicolson

In the final, expanded version of the novella *The Unteleported Man*, Rachmael ben Applebaum becomes suspicious of the plan to reduce Earth's overpopulation by teleporting people to a colony on a distant planet and embarks on an eighteen-year voyage to that planet to see if anyone wants to return. Original. 10,000 first printing.

Minority Report HarperCollins

The Cities of Dead: the highly anticipated third book in Alys Arden's spellbinding *The Casquette Girls* series. Old World witches collide with the French Quarter's strangest denizens, setting off events that could tear the fabric of the Natural and Supernatural worlds, and only the most elusive, mischievous Voodoo Iwa hold the key to stopping it. As Adele struggles with her losses, Nicco's secrets draw her closer, but Isaac questions Nicco's motives and refuses to let go without a fight. While the coven works to make the streets safe from the Ghost Drinkers, Nicco's family of vampires is ready to break the Saint-Germain curse at all costs and settle a centuries-old feud. To save her loved ones and her cherished city, Adele must unearth New Orleans's best-kept Voodoo secret and piece together fragments of history from sixteenth-century Spain--even if it means discovering secrets she never wanted to know. If she fails, she may lose her magic forever.

The Simulacra Houghton Mifflin Harcourt

When the Alphane moon becomes an insane asylum, its inmates, left alone, form clans based on their respective psychoses, but when Earth psychologist Mary Rittersdorf attempts to rehospitalize these lunatics, they retaliate against her invasion of their privacy. Reprint.

Kucukalic looks beyond the received criticism and stereotypes attached to Philip K. Dick and his work and shows, using a wealth of primary documents including previously unpublished letters and interviews, that Philip K. Dick is a serious and relevant philosophical and cultural thinker whose

writing offer us important insights into contemporary digital culture. Evaluating five novels that span Dick's career--from *Martian Time Slip* (1964) to *Valis* (1981)--Kucukalic explores the intersections of identity, narrative, and technology in order to ask two central, but uncharted "Dickian" questions: What is reality? and What is human?

Canonical Writer of the Digital Age ABRAMS

Philip K. Dick was one of the most popular science fiction novelists of the 20th century, but the contradictory and wily writer has troubled critics who attempt encompassing explanations of his work. This book examines Dick's writing through the lens of ontological uncertainty, providing a comparative map of his oeuvre, tracing both the interior connections between books and his allusive intertextuality. Topics covered include time travel, alternate worlds, androids and simulacra, finite subjective realities and schizophrenia. Twenty novels are explored in detail, including titles that have received scant critical attention. Some of his most important short stories and two of his realist novels are also examined, providing a general introduction to Dick's body of work.

"Marvelous, terrifying fun, especially if you've ever suspected that the world is an unreal construct built solely to keep you from knowing who you really are. Which it is, of course."--"Rolling Stone"
Ragle Gumm has a unique job: every day he wins a newspaper contest. And when he isn't consulting his charts and tables, he enjoys his life in a small town in 1959. At least, that's what he thinks. But then strange things start happening. He finds a phone book where all the numbers have been disconnected, and a magazine article about a famous starlet he's never heard of named Marilyn Monroe. Plus, everyday objects are beginning to disappear and are replaced by strips of paper with words written on them like "bowl of flowers" and "soft drink stand." When Ragle skips town to try to find the cause of these bizarre occurrences, his discovery could make him question everything he has ever known.
