The extent of Islamicity, or what Islam demands, is measured to confirm that self-declared Muslim countries have not adopted foundational Islamic teachings for rule-compliant Muslim communities. Western countries, on the other hand, are demonstrated to have better implemented fundamental Islamic teachings for a

thriving society.

"While there is now no lack of books which regale the English reader with selections from the Talmud, tales from the Talmud and wise sayings of the Rabbis, there is no work which attempts a comprehensive survey of the doctrine of this important branch of Jewish literature. To supply that want is the

task undertaken in the present volume. Its aim is to provide a summary of the teachings of the Talmud on Religion, Ethics, Folk-lore, and Jurisprudence." The Rev. Dr. A. Cohen, 1931

The Great Exegesis BRILL
One of the great works of

mystical religious literature, the *Kimiya-i-Sa'adaat* strove to bring man closer to understanding God by helping him understand himself. These excerpts from that work, by a strikingly original thinker on Islam who lived and wrote in the 11th century, were first published in 1910. They serve as a potent reminder of how powerful an influence Al-Ghazzali had upon religious philosophers of the Middle Ages, both Christian and Islamic. With its wise and warmly

humanistic outlook, this little book may well foster a new measure of understanding in the current philosophical battle between the religious traditions of East and West. Also available from Cosimo Classics: *Field's Shadows Cast Before and Jewish Legends of the Middle Ages*. ABU HAMED MUHAMMAD IBN MUHAMMAD AL-GHAZZALI (1058-1111) was a Persian Islamic philosopher, theologian, psychologist, and mystic, known today as one of the most

famous Sunni scholars in history, sometimes cited as next-in-importance only to Muhammad. Born in Tus, Al-Ghazzali was a pioneer of methodic doubt; his work *The Incoherence of Philosophers* shifted early Islamic philosophy from metaphysics to the theory of occasionalism, an Islamic doctrine that states cause-and-effect is controlled by God. He also succeeded in bringing orthodox Islam in contact with Sufism. The author of more than 70 books on various subjects, his

influence continues to stretch far and wide even today.

Developmental Discipline in the Classroom Barron's Educational Series

This landmark book, first published in 1987, is now back in print, with a new introduction by its award-winning author. An interdisciplinary approach to the central themes of scientific and religious thought, this book was widely heralded upon its publication for the richness and depth of its contribution to the

science and religion dialogue. "notable for its breadth and depth . . . filled with admirably argued and powerfully presented treatments of critical issues."—Joseph Pickle, Colorado College, *Zygon: Journal of Religion and Science* "a superb and subtle book."—David Foxgrover, *Christian Century* "a monumental work . . . [T]he book is truly outstanding."—John H. Wright, Jesuit School of Theology, Berkeley, *Theological Studies* "Rolston's presentation of the methods of science,

along with up-to-date summaries of the main achievements of the various sciences, is commendable for its clarity and critical acumen.”—Choice According to Holmes Rolston III, there are fundamental questions that science alone cannot answer; these questions are the central religious questions. He uses the scientific method of inquiry to distill key issues from science, and then he integrates them in a study that begins with matter and moves through life,

mind, culture, history, and spirit. Incorporating religious and scientific worldviews, he begins with an examination of two natural sciences: physics and biology. He then extrapolates examples from two human sciences: psychology and sociology. Next, he moves to the storied universe and world history, raising and addressing religious questions. “Never in the histories of science and religion have the opportunities been greater for fertile

interaction between these fields, with mutual benefits to both,” states Rolston. The republication of this book provides current researchers and students in the field an invaluable, timeless methodological resource. The new introduction offers updated insights based on new scientific research.

INSIGHTS FROM THE MOZ BLOG

BRILL

Acclaimed worldwide as the definitive biography of the Prophet Muhammad in the English language,

Martin Lings' Muhammad: His Life Based to the Earliest Sources is unlike any other. Based on Arabic sources of the eighth and ninth centuries, of which some important passages are translated here for the first time, it owes the freshness and directness of its approach to the words of men and women

who heard Muhammad speak and witnessed the events of his life. Martin Lings has an unusual gift for narrative. He has adopted a style which is at once extremely readable and reflects both the simplicity and grandeur of the story. The result is a book which will be read with equal enjoyment by those

already familiar with Muhammad's life and those coming to it for the first time. Muhammad: His Life Based to the Earliest Sources was given an award by the government of Pakistan, and selected as the best biography of the Prophet in English at the National Seerat Conference in Islamabad in 1983.
