States, from January 1953
to January 1956.
Meticulously edited and
carefully annotated, these

memorandums, diary entries, and personal and official letters shed new light on some of the most important topics in recent American history.

Eisenhower won the presidency decisively after offering the American people an alternative to the New Deal and Fair Deal policies that had dominated public life for twenty years. He ended the unpopular Korean War and dealt effectively with crises in Guatemala and Iran. Problems in Egypt, Southeast Asia, and the

Formosa Straits, however, proved intractable. Meanwhile, Eisenhower wrestled with the demands of GOP leadership. His political coalition, built at the center, felt constant pressure from the Republican right, particularly from Ohio senator John Bricker, who opposed international commitments that might circumscribe U.S. sovereignty, and Wisconsin senator Joseph McCarthy, who claimed to find Communist conspiracies in the

highest reaches of government. In 1955, despite his having suffered a heart attack, the president reluctantly decided to seek another term, hoping thereby to secure his domestic successes and carry forward his work toward a stable, peaceful world order. Although diplomatic troubles in the Middle East and an anti-communist outbreak in Hungary kept him from much personal campaigning in the summer and fall of 1956, he won an impressive

mandate in November and began preparing for a second term. The Presidency: The Middle Way makes a new contribution to our understanding of the Eisenhower administration and Ike's role in creating the modern presidency. Taken together, the documents portray Eisenhower as a forceful leader who faced truly vexing domestic and cold war problems and handled them with great skill and a fundamental sense of decency. University of Pennsylvania

Press Anniversary Collection
Successful cycling planning depends on combining improvements to infrastructure with education. There are chapters examining both national strategies and local initiatives in cities around the world, including such topics as changes to existing road infrastructure and the integration of cycling with public transport. Since education is a critical element in cycling planning, contributors also consider such topics

as developing healthy travel habits in the young and ways of promoting cycling. A number of chapters look at the complex relationship between cars and cycling, discussing how roads can be successfully shared between these two modes of transport. With its blend of practical experience and suggestions for improvement, Planning for cycling is essential reading for urban planners, environmental groups and those researching in this area.

Describes how creating an effective policy for cycling involves combining improvements to infrastructure with education Chapters examine both national strategies and local initiatives in cities around the world Examines the complex relationship between cars and cycling and discusses how roads can be successfully shared between these two modes of transport

 Explorations Into Urban

Structure
 Six students of metropolitan development present a reappraisal and fresh approaches to the analysis of urban systems. Drawing on economics, sociology, political science, geography, and city planning, they reconceptualize urban structure and function, refocusing attention from the forms of population density to the processes of human interaction.
Preventive Medicine in World War II -
 The first of eight volumes in the 18-volume official

British History of the Second World War covering the Mediterranean and Middle Eastern theatres. After setting the political and military scene, the authors open the action with Italy's declaration of war and France's collapse in June 1940. Britain's painful neutralisation of the French fleet at Oran and Alexandria is followed by the first blows against the Italian empire in East Africa, and Italy's attacks on Egypt and Greece. The Fleet Air Arm's triumphant attack on the Italian Fleet

at Taranto, masterminded by Admiral Cunningham, is trumped by General Wavell's even more successful Battle of Sidi Barrani in December, when vast numbers of Italians were captured for negligible British losses. The victory was followed up by Britain's capture of Bardia and Tobruk, and the founding of the Long Range Desert Group - the germ of the SAS. The mopping-up of General Graziani's forces in Cyrenaica, however, ominously resulted in Germany's decision to

rescue their ally with General Rommel's Afrika Korps. However, the volume concludes optimistically with the successful campaign against Italy in Ethiopia, in which General Orde Wingate's irregular Gideon Force plays a prominent part. The military narrative is accompanied by descriptions of diplomatic developments and technological innovations such as the arrival of the Hurricane fighter plane, the Matilda tank and radar. The text is

accompanied by ten appendices, 30 maps and diagrams and 43 photographs.
