Better Learning Solutions Through Better Learning Experiences When training and development initiatives treat learning as something that occurs as a one-time event, the learner and the

business suffer. Using design thinking can help talent development professionals ensure learning sticks to drive improved performance. *Design Thinking for Training and Development* offers a primer on design thinking, a human-centered process and problem-solving methodology that focuses on involving users of a solution in its design. For effective design thinking, talent development professionals need to go beyond the UX, the user experience, and incorporate the LX, the learner experience. In this how-to guide for applying design thinking tools and techniques, Sharon Boller and Laura Fletcher share how they adapted the traditional design thinking process for training and development projects. Their process involves steps to: Get perspective. Refine the problem. Ideate and prototype. Iterate (develop, test, pilot, and refine). Implement. Design thinking is about balancing the three forces on training and development programs: learner wants and needs, business needs, and constraints. Learn how to get buy-in from skeptical stakeholders. Discover why taking requests for training, gathering the perspective of stakeholders and learners, and crafting problem statements will uncover the true issue at hand. Two in-depth case studies show how the authors made design thinking work. Job aids and tools featured in this book include: a strategy blueprint to uncover what a stakeholder is trying to solve an empathy map to capture the learner's thoughts, actions, motivators, and challenges an experience map to better understand how the learner performs. With its hands-on, use-it-today approach, this book will get you started on your own journey to applying design thinking.

In this bold study of modern ethno-regional nationalism, the author examines the divergent paths taken by the nationalist insurgencies in Tigray and Eritrea. The author argues that Tigrayans, south

of the Mereb River, and Kebessa (highlands) Eritreans, north of the Mereb, are ethnically one people, tied by common history, political economy, myth, language and religion. Both fought against a common enemy, an oppressive Amhara ethnic state, for a period of seventeen and thirty years, respectively. In the process of the armed struggle, however, each evolved separate political identities and, after jointly marching to military victory in 1991, they followed separate political paths - Eritreans created the newest state in Africa and Tigrayans remained within the Ethiopian body politic.

Isla isn't happy that her family is changing, so her mother creates a clever family tree with Isla to teach her how to accept that families always grow. Her mother hands her two new leaves, but Isla doesn't think they belong. "There's no room left on our branch -- it's full!" she says. Isla tries to make them fit somewhere, maybe with her cousins, at Aunt Violet and Aunt Jasmine's house, or at Aunt Daisy and Uncle Doug's. There's definitely no room on her branch though! However, once she meets her new brothers she has a change of heart. She falls in love and finds room for them after all -- "Our branch grew a little," says Isla. "Our family is never too full." *Isla's Family Tree* is the perfect book for any family needing to find a way to introduce new family members, or to show children how they belong in their own family. The book explores important issues surrounding familial change and acceptance, while also providing a glimpse into a diverse family. Including adopted cousins and same-sex couples, it highlights that every family is normal. There are no rules about what a family looks like in a forest full of family trees.
