In this survey, Arthur der
Weduwen and Andrew
Pettegree have brought
together the first 6,000
advertisements placed in
Dutch and Flemish
newspapers between
1620 and 1675. Provided
here in an English

translation, and
accompanied by seven
indices, this work provides
for the first time a
complete overview of the
development of
newspaper advertising,
highlighting its impact on
the Dutch book trade,

economy and society.

THE WRONG GIRL

Springer Science &
Business Media

Discover how graph algorithms can help you leverage the relationships within your data to develop more intelligent solutions and enhance your machine learning models. You'll learn how graph analytics are uniquely suited to unfold complex structures and reveal difficult-to-find patterns lurking in your data. Whether you are trying to build dynamic

network models or forecast real-world behavior, this book illustrates how graph algorithms deliver value—from finding vulnerabilities and bottlenecks to detecting communities and improving machine learning predictions. This practical book walks you through hands-on examples of how to use graph algorithms in Apache Spark and Neo4j—two of the most common choices for graph analytics. Also included: sample code

and tips for over 20 practical graph algorithms that cover optimal pathfinding, importance through centrality, and community detection. Learn how graph analytics vary from conventional statistical analysis. Understand how classic graph algorithms work, and how they are applied. Get guidance on which algorithms to use for different types of questions. Explore algorithm examples with working code and sample datasets from Spark and Neo4j. See how connected

feature extraction can increase machine learning accuracy and precision Walk through creating an ML workflow for link prediction combining Neo4j and Spark *Geo-information for Disaster Management* University of Toronto Press Pieter Saenredam (1597–1665) was one of the magical painters of 17th-century Holland, a time known as the Golden Age of Dutch Art. He spent his career immortalizing the churches of Holland in

drawings and paintings. Working through a series of perspective drawings to the finished painting, he made innumerable fine adjustments to architectural details to create what may be justly called spaces of wondrous perfection of proportion and luminosity. Pieter Saenredam, *The Utrecht Work* is published to coincide with an exhibition of Saenredam's drawings and paintings, originally held at the Centraal Museum, Utrecht, and on view from April 16 through July 7,

2002 at the Getty Museum. This elegant volume brings together more than sixty drawings and paintings depicting the beautiful and historically venerable churches of the Dutch city of Utrecht.

THE CENTURY ILLUSTRATED MONTHLY MAGAZINE

"O'Reilly Media, Inc." Examines the small-scale works of the Flemish painter Jan Brueghel the Elder, and the aesthetic and cognitive operation of smallness in art of the

late sixteenth and early seventeenth centuries. *Rembrandt, Vermeer and the Dutch Golden Age*

Penguin

Accompanying the exhibition at Louvre Abu Dhabi, the catalogue *Rembrandt, Vermeer and the Dutch Golden Age* provides an image-rich overview of the artworks exhibited, complimented by four essays. The first situates The Leiden Collection within the context of the Dutch Golden Age. The second and third describe the major role that the

Netherlands played on a global scale in the in the 17th century, the specificities of the Dutch Golden Age as well as the work of Rembrandt and his contemporaries, rooted in the society of that time and place. The fourth essay sheds light on the particular role that drawing played in the creative process of Dutch artists.

A Corpus of Rembrandt Paintings Fodor's

Rembrandt. The very name of this legendary artist has come to signify excellence. But what

about the man himself?

Learn his unfortunate story—how he gained overwhelming commercial acceptance at an early age, only to have it slip away and never return. His personal life was tragic, filled with financial problems. Yet, despite all his troubles, the flame of genius never died inside him. Rembrandt, master of light, continued to be a master artist.

“Monumental.” —The New York Times Book Review
Pulitzer Prize-finalist

Stephen Kotkin has written the definitive biography of Joseph Stalin, from collectivization and the Great Terror to the conflict with Hitler's Germany that is the signal event of modern world history. In 1929, Joseph Stalin, having already achieved dictatorial power over the vast Soviet Empire, formally ordered the systematic conversion of the world's largest peasant economy into "socialist modernity," otherwise known as collectivization,

regardless of the cost. What it cost, and what Stalin ruthlessly enacted, transformed the country and its ruler in profound and enduring ways. Building and running a dictatorship, with life and death power over hundreds of millions, made Stalin into the uncanny figure he became. Stephen Kotkin's *Stalin: Waiting for Hitler, 1929–1941* is the story of how a political system forged an unparalleled personality and vice versa. The wholesale collectivization of some

120 million peasants necessitated levels of coercion that were extreme even for Russia, and the resulting mass starvation elicited criticism inside the party even from those Communists committed to the eradication of capitalism. But Stalin did not flinch. By 1934, when the Soviet Union had stabilized and socialism had been implanted in the countryside, praise for his stunning anti-capitalist success came from all quarters. Stalin, however, never forgave and never

forgot, with shocking consequences as he strove to consolidate the state with a brand new elite of young strivers like himself. Stalin's obsessions drove him to execute nearly a million people, including the military leadership, diplomatic and intelligence officials, and innumerable leading lights in culture. While Stalin revived a great power, building a formidable industrialized military, the Soviet Union was effectively alone and surrounded by perceived

enemies. The quest for security would bring Soviet Communism to a shocking and improbable pact with Nazi Germany. But that bargain would not unfold as envisioned. The lives of Stalin and Hitler, and the fates of their respective dictatorships, drew ever closer to collision, as the world hung in the balance. *Stalin: Waiting for Hitler, 1929–1941* is a history of the world during the build-up to its most fateful hour, from the vantage point of Stalin's seat of power. It is a

landmark achievement in the annals of historical scholarship, and in the art of biography.

 NOW A CBC TELEVISION SERIES WINNER OF THE MARGARET AND JOHN SAVAGE FIRST BOOK AWARD FOR NON-FICTION SHORTLISTED FOR THE KOBO EMERGING WRITER

PRIZE LONGLISTED FOR THE RBC TAYLOR PRIZE SHORTLISTED FOR THE STEPHEN LEACOCK MEMORIAL MEDAL FOR HUMOUR A hilarious story of family, getting into trouble, and finding one's place in the world. What could be better than growing up in the 1980s? How about growing up in 1980s Newfoundland, which—as Mark Critch will tell you—was more like the 1960s. Take a trip to where it all began in this funny and warm look back on his formative years. Here we find a young

Mark trick-or-treating at a used car lot, getting locked out of school on a fourth-floor window ledge, faking an asthma attack to avoid being arrested by military police, trying to buy beer from an untrustworthy cab driver, shocking his parents by appearing naked onstage—and much more. Best known as the "roving reporter" for CBC's *This Hour Has 22 Minutes*, Mark Critch has photo-bombed Justin Trudeau, interviewed Great Big Sea's Alan Doyle (while impersonating Alan

Doyle), offered Pamela Anderson a million dollars to stop acting, and crashed White House briefings. But, as we see in this playful debut, he's been causing trouble his whole life. Son of a Critch captures the wonder and cluelessness of a kid trying to figure things out, but with the clever observations of an adult, and the combination is perfect. Getty Publications
How the far North offered a different kind of terra incognita for the Renaissance imagination.

European narratives of the Atlantic New World tell stories of people and things: strange flora, wondrous animals, sun-drenched populations for Europeans to mythologize or exploit. Yet, as Christopher Heuer explains, between 1500 and 1700, one region upended all of these conventions in travel writing, science, and, most unexpectedly, art: the Arctic. Icy, unpopulated, visually and temporally "abstract," the far North—a different kind of terra incognita for the

Renaissance imagination—offered more than new stuff to be mapped, plundered, or even seen. Neither a continent, an ocean, nor a meteorological circumstance, the Arctic forced visitors from England, the Netherlands, Germany, and Italy, to grapple with what we would now call a “non-site,” spurring dozens of previously unknown works, objects, and texts—and this all in an intellectual and political milieu crackling with Reformation debates over

art's very legitimacy. In *Into the White*, Heuer uses five case studies to probe how the early modern Arctic (as site, myth, and ecology) affected contemporary debates over perception and matter, representation, discovery, and the time of the earth—long before the nineteenth century Romanticized the polar landscape. In the far North, he argues, the Renaissance exotic became something far stranger than the marvelous or the curious,

something darkly material and impossible to be mastered, something beyond the idea of image itself.

Picturing Punishment

Getty Publications

By the bestselling author of *The Killing*, *The Wrong Girl* is the second novel in David Hewson's gripping Detective Pieter Vos series set in Amsterdam. Sinterklaas, a beaming, friendly saint with a white beard, was set to mark his arrival in Amsterdam with a parade so celebrated it would be watched live on television throughout the

Netherlands. Today the crowds would run into three hundred thousand or more, and the police presence top four figures. The city centre was closed to all traffic as a golden barge bore Sinterklaas down the Amstel river, surrounded by a throng of private boats full of families trying to get close.' Amsterdam is bursting at the seams with children trying to get a glimpse of their hero and families enjoying the occasion. The police are out in force, struggling to manage the crowds on

one of the busiest days of the year. Brigadier Pieter Vos is on duty with his young assistant, Laura Bakker, when the first grenade hits. As Sinterklaas prepares to address the crowds a terrorist outrage grips the heart of the city. In the chaos a young girl wearing a pink jacket is kidnapped. But the abducted child isn't the daughter of an Amsterdam aristocrat as the terrorists first thought. She's the daughter of an impoverished Georgian prostitute, friendless and

trapped in the web of vice that is Amsterdam's Red Light District. As the security forces and the police clash over the ensuing investigation the perpetrator's horrifying demands become clear. Vos, trapped in a turf war with state intelligence, tries to unravel a conspiracy that reaches from the brothels of the city to the hierarchy of the security services. And at its heart lies an eight-year-old girl, snatched from a loving mother then ferried from one criminal lair to the next, her life in

the balance as Vos and Laura Bakker struggle to uncover the shocking truth behind her abduction. What is the life of one immigrant child worth in the greater political game emerging around them?

Nanetti outlines a methodology for deploying artificial intelligence and machine learning to enhance historical research. Historical events are the treasure of human experiences, the heritage that societies have used to remain resilient and express their identities. Nanetti has created and

developed an interdisciplinary methodology supported by practice-based research that serves as a pathway between historical and computer sciences to design and build computational structures that analyse how societies create narratives about historical events. This consilience pathway aims to make historical memory machine-understandable. It turns history into a computational discipline through an interdisciplinary blend of

philological accuracy, historical scholarship, history-based media projects, and computational tools. Nanetti presents the theory behind this methodology from a humanities perspective and discusses its practical application in user interface and experience. An essential read for historians and scholars working in the digital humanities.

 The Getty Museum's

collection of drawings was begun in 1981 with the purchase of a Rembrandt nude and has since become an important repository of European works from the fifteenth through the nineteenth century. As in the first volume devoted to the collection (published in 1988 in English and Italian editions), the text is here organized first by national school, then alphabetically by artist, with individual works arranged chronologically. For each drawing, the authors provide a

discussion of the work's style, dating, iconography, and relationship to other works, as well as provenance and a complete bibliography.
[Index of Patents Issued from the United States Patent Office](#) Getty Publications
 Since the second half of the last century art historians, realizing that the image of Rembrandt's work had become blurred with time, have attempted to redefine the artist's significance both as a source of inspiration

to other artists and as a great artist in his own right. In order to carry on the work started by previous generations, a group of leading Dutch art historians from the university and museum world joined forces in the late 1960s in order to study afresh the paintings usually ascribed to the artist. The researchers came together in the Rembrandt Research Project which was established to provide the art world with a new standard reference work which would serve the

community of art historians for the nearby and long future. They examined the originals of all works attributed to Rembrandt taking full advantage of today's sophisticated techniques including radiography, neutron activation autoradiography, dendrochronology and paint sample analysis — thereby gaining valuable insight into the genesis and condition of the paintings. The result of this meticulous research is laid down chronologically in the

following Volumes: A Corpus of Rembrandt Paintings, Volume I, which deals with works from Rembrandt's early years in Leiden(1629-1631), published in 1982. A Corpus of Rembrandt Paintings, Volume II, covering his first years in Amsterdam (1631-1634), published in 1986. THIS VOLUME: A Corpus of Rembrandt Paintings, Volume III, goes into his later years of reputation (1635-1642), published in 1990. Each Volume consists of a number of Introductory Chapters as

well as the full Catalogue of all paintings from the given time period attributed to Rembrandt. In this catalogue each painting is discussed and examined in a detailed way, comprising a descriptive, an interpretative and a documentary section. For the authenticity evaluation of the paintings three different categories are used to divide the works in: A. Paintings by Rembrandt, B. Paintings of which Rembrandt's authorship cannot be positively

either accepted or rejected, and C. Paintings of which Rembrandt's authorship cannot be accepted. This volume (Volume III) contains 820 pages, starting of with three introductory chapters and discussing 86 paintings. In clear and accessible explanatory text all different paintings are discussed, larded with immaculate images of each painting. Details are shown where possible, as well as the results of modern day technical imaging. In this volume important paintings

including the Night Watch are discussed.

Non-monotonic Reasoning
Mitchell Lane Publishers, Inc.

Across an amazing sweep of the critical areas of business regulation - from contract, intellectual property and corporations law, to trade, telecommunications, labour standards, drugs, food, transport and environment - this book confronts the question of how the regulation of business has shifted from national to global institutions. Based on

interviews with 500 international leaders in business and government, this book examines the role played by global institutions such as the WTO, the OECD, IMF, Moody's and the World Bank, as well as various NGOs and significant individuals. The authors argue that effective and decent global regulation depends on the determination of individuals to engage with powerful agendas and decision-making bodies that would otherwise be dominated by

concentrated economic interests. This book will become a standard reference for readers in business, law, politics and international relations.

ART IN HISTORY/HISTORY IN ART

Little, Brown
Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at

the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and

conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century

landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.
