EMPLOYMENT PROGRAM REPRESENTATIVE

Career Examination
This is one of the most
significant military books
of the twentieth century.
By an outstanding soldier
of independent mind, it
pushed forward the
evolution of land warfare
and was directly
responsible for German
armoured supremacy in
the early years of the
Second World War.
Published in 1937, the
result of 15 years of
careful study since his
days on the German
General Staff in the First
World War, Guderian's
book argued, quite
clearly, how vital the
proper use of tanks and
supporting armoured
vehicles would be in the
conduct of a future war.
When that war came, just
two years later, he proved
it, leading his Panzers
with distinction in the
Polish, French and
Russian campaigns.
Panzer warfare had come
of age, exactly as he had

forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

In *Courtroom Interpreting*, Marianne Mason offers a new perspective in the study of courtroom interpreting through the exploration of cognitive and linguistic barriers that court interpreters face everyday and ultimately result in an interpreter's deviation from original linguistic content. The quality of an interpreter's rendition plays a key role in how well a non-English

speaking defendant's legal rights are served. Interpreters are expected to provide a faithful rendition of all semantic, syntactic, and pragmatic content regardless of how difficult the task may be at a cognitive level. From a legal perspective this expectation may be sound as it disregards the cost associated with the interpreter having to account for a great deal of linguistic content. Mason proposes that if the quality of interpreters' renditions is to improve and the rights of non-English speaking minorities is to be better served the issue of cognitive overload needs to be addressed more effectively by the court interpreting community.
