Critics of the ecosystem concept have

noted the tendency of ecosystem-based studies to overemphasize energy flow, to rely on functionalist assumptions, to neglect historical and evolutionary factors, and to overlook the role of individuals as the locus of natural selection and decision making. In this volume, leading figures in the study of biological and human ecology evaluate these criticisms and propose ways to advance the state of knowledge in ecological research.

The Routledge Companion to Contemporary Anthropology is an invaluable guide and major reference source for students and scholars alike, introducing its readers to key contemporary perspectives and approaches within the field. Written by an experienced international team of contributors, with an interdisciplinary range of essays, this collection provides a powerful overview of the transformations currently affecting anthropology. The volume both addresses the concerns of the discipline and comments on its construction through texts, classroom interactions, engagements with various publics, and changing relations with other

academic subjects. Persuasively demonstrating that a number of key contemporary issues can be usefully analyzed through an anthropological lens, the contributors cover important topics such as globalization, law and politics, collaborative archaeology, economics, religion, citizenship and community, health, and the environment. The Routledge Companion to Contemporary Anthropology is a fascinating examination of this lively and constantly evolving discipline.

This anthology provides a single-volume overview of the essential theoretical debates in the anthropology of art. Drawing together significant work in the field from the second half of the twentieth century, it enables readers to appreciate the art of different cultures at different times. Advances a cross-cultural concept of art that moves beyond traditional distinctions between Western and non-Western art. Provides the basis for the appreciation of art of different cultures and times. Enhances readers' appreciation of the aesthetics of art and of the

important role it plays in human society.

Alessandro Duranti introduces linguistic anthropology as an interdisciplinary field which studies language as a cultural resource and speaking as a cultural practice. The theories and methods of linguistic anthropology are introduced through a discussion of linguistic diversity, grammar in use, the role of speaking in social interaction, the organisation and meaning of conversational structures, and the notion of participation as a unit of analysis. Linguistic Anthropology will appeal to undergraduate and graduate students.

## LINGUISTIC ANTHROPOLOGY

John Wiley & Sons

This anthology provides a single-volume overview of the essential theoretical debates in the anthropology of art. Drawing together significant work in the field from the second half of the twentieth century, it enables readers to appreciate the art of various cultures at different times. An essay from the editors, offering an intellectual critique of the history of the discipline and exploring the contribution that the analysis of art can make to human societies, prefaces the volume; each part also begins with a useful editorial introduction to the readings. The readings themselves cover all the major debates in the field, including: definitions of art and aesthetics; the nature of representational processes; the nature of authenticity; the Primitivism controversy; the history of trade and commodification; and the role of contemporary artists. This anthology is the ideal resource for readers new to the anthropology of art. At the same time, it allows those with some

knowledge of the discipline to see how art and aesthetics can contribute to their research.

Western Philosophy Springer

Anthropology conducted in Africa has been central to the methodological and theoretical development of the discipline since it was first institutionalized in the late 19th century. Written and edited by a team of leading cultural anthropologists on the subject, *A Companion to the Anthropology of Africa* compiles a collection of insightful essays that address all aspects of life on the continent of Africa. Chapters within explore the extent to which anthropological thinking on this topic has been, or remains, influenced by the theoretical traditions, whilst others consider the extent to which anthropological thinking has been transformed by growing interest in using anthropological knowledge to critically address practical concerns and public problems such as war, poverty, and public health. This Companion is presented in four parts. The first part looks at enduring themes—tracing the development of anthropological thinking and the current debates about themes such as witchcraft,

kinship, law and justice that have demonstrated remarkable staying power in the anthropology of Africa. The second section considers topics that began to garner attention during decolonization and in its immediate aftermath. Such topics include mobility and displacement, urbanism, and political violence. The third part comprises topics such as trauma, social justice, sex and sexuality that have become the central concern of anthropologists of Africa since its many nations gained their independence. It also looks at 'hot topics' like social media, humanitarianism, and environmentality. The final section considers the role that Africanist anthropology has played in informing other Africanist disciplines, and reflects on the politics of representation within the discipline as well. Filled with a wide variety of expert opinions and observations across chapters which are highly sophisticated in their coverage, *A Companion to the Anthropology of Africa* is an essential reference resource for undergraduate and graduate students, as well as researching anthropologists. *Anthropology for the 21st Century* John Wiley & Sons

Devotional "occasions" or experiences by Irish Catholics form the crux of this powerful, first book-length anthropological study of Irish Catholicism. Rich in ethnographical material, wide-ranging archival sources, insightful cultural observations, vivid accounts of individual experiences, and thoughtful scrutiny of religious questions and theories illuminate twenty years of ethnographic fieldwork. From these varied resources Lawrence Taylor creates a memorable account of the forces that shape local forms of Catholicism in southwest Donegal.

Since the early 1970s, European thinkers have departed notably from their predecessors in order to pursue analytical programs more thoroughly their own. Rethinking the Subject brings together in one volume some of the most influential writings of Foucault, Habermas, Bourdieu, Pizzorno, Macfarlane, and other authors whose ideas have had a worldwide impact. *Cultural Anthropology A Toolkit for a Global Age* Routledge  
Western Philosophy: An Anthology provides the most comprehensive and

authoritative survey of the Western philosophical tradition from ancient Greece to the leading philosophers of today. Features substantial and carefully chosen excerpts from all the greats of philosophy, arranged thematically and chronologically. Readings are introduced and linked together by a lucid philosophical commentary which guides the reader through the key arguments. Embraces all the major subfields of philosophy: theory of knowledge and metaphysics, philosophy of mind, religion and science, moral philosophy (theoretical and applied), political theory, and aesthetics. Updated edition now includes additional contemporary readings in each section. Augmented by two completely new sections on logic and language, and philosophy and the meaning of life. *Ethnographic Fieldwork* Cognella Academic Publishing

The articles in this anthology, present a range of methodological approaches and well-known case studies that illustrate the interconnection of language, culture, and social practice. This book is a valuable introduction to linguistic anthropology and sociolinguistics courses and a resource for

anyone exploring the relation of language to psychology, political theory, feminist studies, and literature and folklore.

"This comprehensive anthology offers over 40 readings that are critical to the

understanding of anthropological theory and the development of anthropology as an academic discipline. The fifth edition of this popular theory reader maintains a strong foundation in both classical and contemporary anthropological theory with a sharpened focus on gender and anthropology, and the anthropology of new media and technology. Short introductions and key terms accompany every reading, and light annotations have been added to aid students. Used on its own, or together with the overview text *A History of Anthropological Theory, Fifth Edition*, this anthology offers a flexible and unrivaled introduction to anthropological theory that reflects not only the history, but also the changing nature, of the discipline today."--

*Contemporary Anthropology* University Alabama Press

*Readings in Cultural Anthropology and the Contemporary World: Critical Perspectives* provides students with a carefully curated selection of articles that address the principal issues inclusive in the history of the discipline, including globalization, gender, race and ethnicity, kinship, language, and climate change. The

anthology is divided into six units. The readings in Unit I address the history of the cultural anthropology discipline and its all-important and central concept of culture. In Unit II, students read selections that address race and ethnicity, including historical and contemporary conceptions of race and the highly politicized US-Mexico border. Unit III focuses on economic anthropology with readings that discuss women as economic agents and the economic factors and consequences

associated with migrants. Unit IV is about political anthropology and includes two readings that criticize some of the stereotypes associated with leadership among Indigenous people. In Unit V, the readings distinguish sex as biological for gender as social constructs and examine the reality of gender-based violence. The final unit explores the world system and globalization, including readings that cover a range of topics from the internet

to the globalization of fast food to climate change. Readings in Cultural Anthropology and the Contemporary World is an ideal primary or supplementary resource for courses in cultural anthropology and anthropological theory.

Second Edition Wiley-Blackwell

'Visions of Culture' describes the key ideas of 24 major theorists. Anthropologists covered include Durkheim, Benedict, Geertz, Levi-Strauss, Evans-Pritchard and Malinowski.
