Babies, Toddlers and the Foundation Years Andrews UK Limited

Historical changes in play are taking place in childhood all over the world, with the digitalisation of children's lives. Researchers are worried about the disappearance of advanced forms of play and the prioritization of time spent with loving adults, supporting play with babies and toddlers. At the same time, our understanding about the crucial importance of individual development is becoming clearer. The Routledge International Handbook of Early Childhood Play explores these issues and more. It proposes the importance of adult participation in play, as adult guidance brings the possibility of moral, cultural and symbolic elements to children's play, and enhances the educational opportunities in adult-child joint play. The book also examines the aesthetic dimension of play and its role in the development of imagination and creativity. With contributors from many parts of the world, this unique handbook brings together the latest research and highlights practice which focuses on play. This is an essential and engaging read for all students, academics, teachers and practitioners with an interest in play.

Early Childhood Practice Routledge

Increasing emphasis is now placed on how and what children learn in the early stages of life. The Government has drawn up Early Learning Goals for 3-5 year olds, setting a Foundation stage to the curriculum. Child Care professionals need to be aware of how to encourage children at this age, when the most important way of learning is through play. In this book Tina Bruce, an acknowledged expert in the field of play, presents the key ideas and best practice for child care students starting to work in this vital area.

Learning Through Play Oxford University Press, USA

Designed for students on Early Years Foundation Degrees and Early Childhood courses, Early Years professionals and Teaching Assistants, this engaging text provides a comprehensive introduction to the field of early childhood. Written and edited by experts in the field, the book clearly explains theory through illustrations of good practice, with case studies, reflective exercises and suggestions for further reading. Additional case studies and reflective questions for student or lecturer's use can be found on the SAGE website. Each chapter has been revised with an emphasis on encouraging reflective practice and there are new chapters on: - personal, social, and emotional development - EYPS - health and safeguarding children This brand new edition has also been updated in light of the new Early Years Foundation Stage, and addresses the needs of students working towards Early Years Professional Status (EYPS).

An Introduction SAGE

What are schemas and why do they matter? Again! Again! provides an introduction to understanding and supporting schemas and schema play in young children. Practitioners will find an overview of schemas with guidance on where they fit within the EYFS. There are examples of schemas, with illustrations and descriptions of common behaviour patterns, and these are set within the general context of child development. The intention is to help early years practitioners identify schemas and to understand both how important they are and the vital role they play in the growing child's learning. The aim is to help the reader understand how they can develop, plan and resource activities which support children's learning through experiment and play.

HOW TO USE WORK GROUP SUPERVISION TO IMPROVE EARLY YEARS PRACTICE

SAGE

This book considers the origins of Froebelian early childhood education providing context to the development of his theories and ideas, critically examines the key themes of this philosophy of education and explores the relevance of Froebelian practice today. Tina Bruce reflects on central aspects of Froebelian philosophy of education: the importance of family, highly trained teachers, engagement with nature, mother songs, movement games, play and self-activity of the child, the whole child and the Froebelian concept of unity. In exploring each element Bruce considers the implications for Froebelian practice and research today, and addresses the views of critics and supporters. Each aspect is considered within an international context, drawing on research and practice from across the world. The final chapter gathers together the next steps for Froebelian early childhood education, providing navigational tools and suggestions for what needs to be addressed if Froebel is to remain useful to future practitioners, researchers and policy makers. *Educating Young Children: A Lifetime Journey into a Froebelian Approach* A&C Black Have you ever wondered about the origins of the kindergarten and the influence of Froebel on early years practice? What did Froebel mean by a garden for children? Why did he believe that play is central in young children's learning? Bringing the Froebel Approach to your Early Years Practice looks at the founder of the kindergarten and his profound influence on provision and practice for young children today. The Froebelian approach is not a method but includes distinctive principles which shape and guide practice. This new edition has been fully updated in line with the revised EYFS and includes: extra material on using the approach with children of different ages and the role of the adult a discussion of key Froebelian principles such as play, imagination, creativity, learning through self-activity and making connections an examination of block play and how this can be developed in contemporary settings Froebel's ideas on nature and outdoor play and why these are fundamental to young children's learning how Froebel used movement, song, rhythm and rhyme to provide key learning experiences With examples of innovative practice and ideas for reflection, this convenient guide will help practitioners and students fully understand what the Froebel approach can offer their setting and children. *Introducing Creative Woodwork in the Early Years* Heinemann "For babies, toddlers and young children"--Cover. *Movement and Dance in Early Childhood* Routledge A major influence on the education of young children since the late nineteenth century, the

philosophical and practical tenets of Froebelian early childhood education require urgent re-articulation in light of current debate and developments in research and policy. This seminal Handbook responds to this need, drawing together a unique and valuable body of literature, research and case studies to make explicit the specific features of Froebelian education and provide key impulses for future research and practice in this area. Chapters present the sometimes divergent perspectives of leading educationalists, and so offer a uniquely comprehensive overview of Froebelian approaches and their interaction with contemporary policies and insights. The Handbook explores five significant areas of scholarship and practice: Part I examines the original Froebelian principles and practices in early childhood education in different parts of the world. Part II presents case studies, development projects and practitioner publications exploring Froebelian approaches to early childhood education. Part III details research studies which document, debate and evaluate Froebelian approaches. Part IV considers how Froebelian approaches might be sustained and adapted for use in various cultural contexts across the world. Part V offers a re-articulation of research and policy. An essential resource for in-service and future practitioners, researchers and policy-makers involved in early childhood education, this key text will promote discussion, aid analysis and further the practical application of Froebelian principles.

EBOOK: War, Conflict and Play McGraw-Hill Education (UK)

Praise for the first edition: "I feel that this book is very well structured and progressive and the way it introduces the topics is coherent and developmental. The use of pictures is extremely helpful as they support the text very effectively...I have found that any work by Tina Bruce is well researched and accessible and always recommend her to my students." Maureen Brookson, University of East Anglia Cultivating Creativity, 2nd edition, shows how early years practitioners can promote creativity in children. It explores the journey children take in developing their creativity, and helps students and practitioners to nurture creativity. Written by a leading expert in creativity, development and learning in young children, Cultivating Creativity links theory and practice to provide a clear framework for this difficult, but vital, aspect of development and learning. Taking a broad conceptualised view of creativity, the author addresses the issue not just in terms of the arts but also the role that creativity has within sciences and humanities. This new edition covers recent and ongoing curriculum, legislative and policy changes that affect teaching in this area. Recent advances in the field are also addressed including, brain research, movement, outdoor learning and individual learning.

This is a must-read book for all students studying early childhood at a range of levels and practitioners who are looking to deepen their understanding of play and playful practices.

THE SELECTED WORKS OF TINA BRUCE

Routledge

In the World Library of Educationalists international experts compile career-long collections of what they judge to be their most significant pieces – excerpts from books, key articles, salient research findings, major theoretical and practical contributions – so the world can read them in a single, manageable volume. Readers will be able to follow the themes and strands and see how their work contributes to the development of the field. Educating Young Children: A Lifetime Journey into a Froebelian Approach draws together Professor Tina Bruce CBE's most prominent writings from her accomplished 40-year international career in education centred on the Froebelian tradition. Chosen to illustrate the changes that have occurred in Professor Bruce's thinking and practices over the last four decades, carefully selected readings address key Froebelian themes such as literacy, play, inclusion and creativity. Short introductions are provided for each chapter and excerpt, helping readers to understand the significance of what is presented and explaining how this relates to other chapters in the book. Including chapters from Tina Bruce's best-selling books and articles, as well as leading journals, this collection offers a unique commentary on some of the most important issues in Early Childhood Education over the last four decades; it will be engaging and inspiring reading for anyone interested in the development and state of early years education in the UK and internationally.

Learning Through Play Oxford University Press, USA

Focusing on the period from birth to school, this book is about babies' and young children's feelings, their learning; and the ways in which the adults in their lives can support their emotional, social and cognitive development. Looking at the perspectives both of the child and the adult, it presents thought-provoking ideas and questions on how adults can make the most of opportunities to support the children with whom they live and work. A story, in episodes embedded throughout the book, makes this an accessible and enjoyable read. In this third edition, there are new and updated chapters on: • Young children's transitions, with a particular focus on starting school • Young children's positive 'learning dispositions' • Brain research and its possible implications • Further reading, signposting some enchanting children's books as well as important new texts. The book explores the basis of the 'key person' relationship, looking at attachment 'in practice', and linking developmental issues with the early development of self esteem. Written for students on

early childhood courses and staff in early childhood care and education settings and integrated Children's Centres, the book will also be of interest to parents and carers.

AGAIN! AGAIN!

Developing Learning in Early Childhood

British Froebelian Women from the Mid-Nineteenth to the Twenty-First Century presents a series of critical case studies of individual women who worked and advocated for the cause of Froebelian and progressive pedagogy in Britain from the mid-nineteenth century until the present day. The book presents a compelling picture of how women have contributed in powerful ways to educational life and child-centred practices. The book examines the beliefs and values of its subjects, offering crucial insights into how these women forged their professional identities and practice as new thinking about education and childhood emerged, and considers the differing forms of inspiration they drew from their connections with the Froebelian community. This book will be of great interest for postgraduate students and academics in the fields of Women's Studies, History of Education, Early Childhood Education and Early Childhood Studies.

A Parent - Teacher Partnership A&C Black

This book makes explicit connections between young children's spontaneous repeated actions, and their representations of their emotional worlds. Drawing on the literature on schemas, attachment theory and family contexts, the author takes schema theory into the territory of the emotions, making it relevant to the social and emotional development strand in early childhood education. Based on research carried out alongside children, parents, workers and co-researchers at the world-famous Pen Green Nursery, and using case studies of a small number of individual children, the author shows new links between cognition and affect. The book includes a brief summary of a method of Child Study, using video and reflections on video sequences. This book will be of interest to students and practitioners on Early Childhood undergraduate and postgraduate courses, as well as those taking modules on schema theory.

Putting Storytelling at the Heart of Early Childhood Practice Bloomsbury Publishing

Praise for the first edition: "The key advantage to this book is the way in which it is easy to read and the amount of information it provides with regard to the role of play in supporting young children's learning." Karen Phethean, University of Winchester "This book is excellent. It is an invaluable resource for both qualified and trainee early years practitioners. Tina Bruce has a real talent with how she expresses ideas. The concepts are presented in an accessible way. The material is suitable across a range of levels of study." Caroline McGrath, Programme Manager for Foundation Degree in Early Childhood Studies, City of Bristol College in partnership with the University of Plymouth "I would always recommend books by Tina Bruce to my students as she is highly accessible, combining theory and practice closely together. They are attractively laid out and are therefore popular with students." Maureen Brookson, University of East Anglia Professor Tina Bruce CBE, an acknowledged expert on play, clearly presents the key ideas and demonstrates the best practices for cultivating play in an Early Years setting. The book covers historical perspectives, how we can observe and study play, and the role of play in learning, developing abstract ideas, helping children to relate to one another. She shows that play helps children to achieve the highest form of learning in early childhood. This new edition of Learning Through Play will provide students and practitioners with an invaluable guide to the core values behind play, the importance of play for children from 0 to 5 years old, and practical schemas for getting the best out of play in an Early Years or Educational setting. It will be an ideal text for those studying play at levels 3 and 4, Foundation Degrees, Undergraduate Early Childhood Studies and Primary Education courses, Post-graduate study and for those working in an Early Years setting.
