Then it is discussed in detail through a number of worked-out examples, which are explained using step-by-step procedure and illustrating drawings. Module A covers the fundamentals of manual drafting, lettering, freehand sketching and dimensioning of views. Module B describes two-dimensional drawings like geometrical constructions, conics, miscellaneous curves and scales. Three-dimensional drawings, such as projections of points, lines, plane lamina, geometrical solids and sections of them are well explained in Module C. Module D deals with intersection of surfaces and their developments. Drawing of pictorial views is illustrated in Module E, which includes isometric projection, oblique projection and perspective projections. Module F covers the fundamentals of machine drawing. Finally, in Module G the book introduces computer-aided drafting (CAD) to make the readers familiar with the state-of-the-art techniques of drafting. Key Features : Follows the International Standard Organization (ISO) code of practice for drawing. A stirring and romantic historical novel about nineteenth-century Vienna and the tragedy and dynamic passion that inspired Ludwig van Beethoven's Moonlight Sonata. Vienna, 1800. Countess Julie Guicciardi's life is about to change forever. The spirited eighteen-year-old is taking piano lessons with Ludwig van Beethoven, the most talented piano virtuoso in the musical capital of Europe. She is captivated by his volatile genius, while he is drawn to her curiosity and disarming candor. Between them, a unique romance. But Beethoven has a secret he's yet to share, and Julie is harboring a secret of her own, one so scandalous it could destroy their perfect love story. When Beethoven discovers the truth, he sets his emotions to music, composing a mournful opus that will become the Moonlight Sonata. The haunting refrain will follow Julie for the rest of her life. It's no secret that certain social groups have predominated India's business and trading history, with business traditionally being the preserve of particular 'Bania' communities. However, the past four or so decades have seen a widening of the social base of Indian capital, such that the social profile of Indian business has expanded beyond recognition, and entrepreneurship and commerce in India are no longer the exclusive bastion of the old mercantile castes. In this meticulously researched book ? acclaimed for being the first social history to document and understand India's new entrepreneurial groups ? Harish Damodaran looks to answer who the new 'wealth creators' are, as he traces the transitional entry of India's middle and lower peasant castes into the business world. Combining analytical rigour with journalistic flair, India's New Capitalists is an essential read for anyone seeking to understand the culture and evolution of business in contemporary South Asia.
